PREFACE

In this volume, an humble, though a pioneer attempt has been made to trace the beginnings and the later evolution of the rāga-system of Indian Music—from authoritative sources, many of which are still buried in unpublished and rare manuscripts. Orthodox music practitioners, opposing any manner of new developments and innovations—on the belief that Indian Music is a stereotyped system hide-bound by strict rules and conventions prescribed by ancient musical Sages, to depart from which is to assail the individuality of Indian Musical thought—and, therefore, a musical crime, may find in this Volume much material which will contradict such a belief. Indeed, the history of the rāgas, of which a bare outline, is, here presented demonstrates that in all periods of its development—Indian Music has grown and progressed by assimilating new ideas from non-Aryan and aboriginal musical practices—and that the Classical Rāga-System is firmly based on and is heavily indebted to Primitive Folk-music, having never disdained from borrowing and assimilating new data from alien or foreign sources. Yet the Indian Rāga-System—has a structure of peculiar form—having fundamental rules and conventions of its own—which must be understood—in its essential character—before any innovation or a new development can be initiated. In the coming new order of things, Indian Music is destined to play a great part in vitalizing national culture. It is hoped that the free liberalizing rôle of music should not be restricted and subordinated by being harnessed to political propaganda. Both the necessity of saving Indian Music from such slavery and of extending its rôle—in a larger expansion of national life—in forms of new applications to newer needs—it is necessary for all kinds of votaries,—the Practioners, the Connoisseurs, the Innovators, the Reformers, and the Students—to have a thorough know-

ledge of the basics of Indian Music, its grammar and conventions, the secrets of its peculiar charm, and its power of intense emotional expressiveness—both in its thematic and abstract applications. It is believed that from this point of view—this monograph may offer valuable educational data. In many of the Indian Schools of Music—the syllabus includes not only a knowledge of the practice of the Rāgas—and their differentiations—but also of some rudiments of the theories on which they are based. But very often authoritative data is not readily available to the average teacher—who has no time to undertake independent researches to dig out the facts bearing on the history of Indian Music-theories. It is humbly claimed—the data put forward in this Volume may go in some way to provide this essential materials for the study of Indian Music. The Political Life—and the freedom to coin our new political destiny—may be imitated in the sphere of Music. As the history of Indian Music demonstrates—our musical authorities have never opposed innovations—but have welcomed fresh ideas—and have assimilated them according to the fundamental principles of Indian Music. In this conception, it is useful to recall the remark of Plato in his *Republic*: “The introduction of a new kind of music must be shunned as imperilling the whole State; since styles of music are never disturbed without affecting the most important political institutions.”

This work has been respectfully dedicated to the great musical Savant the late Pandit V. N. Bhatkhande—whose services to Indian Music are invaluable. Unfortunately, the work could not be placed in his hands—until a short time before his death, when he was laid up with paralysis. It is reported that when the book was placed in his hands he sat up with great curiosity and enthusiasm and as he turned over the pages—in speechless silence—tears trickled down his cheeks—in affectionate appreciation of a tribute to the study of a subject of which he was a lifelong devotee, and an indefatigable exponent blessed with inexhaustible erudition.

Owing to circumstances beyond the control of the Author the work had to be published—in an extremely limited edition of only thirty-six copies which were subscribed for, two years before the actual date of publication,—so that the

work was out of print and was un-available from the date of its birth, not only to the general reader but to an everwidening circle of friends of Indian Music and Specialists. This was a crime which has been crying for atonement ever since 1935—the original date of its publication. The Author is therefore grateful to Nalanda Publication for coming forward to rescue the work from practical oblivion.

It is to be regretted that it has not been possible to revise and improve the text, and it is sent out in its original form with all its imperfections and blemishes—for a wider circulation which was not possible to secure in its first edition. This is not, therefore, a new edition,—but a cheap re-issue. The only addition made—is the Supplementary Bibliography setting out a list of publications and articles which have appeared since the year 1935.

1st December, 1947.

PANCHAM SARA SAMHITA—NARADA

INTRODUCTION

The conception of Rāgas is one of the basic principles of the system of Indian Music. A rāga (*Vulgo Rāg*) is generally mis-translated as a tune, air, or key. It is, in fact, a peculiar conception, having no exact parallel in any other system of music. Literally, rāga is something that colours, or tinges the mind with some definite feeling,—a wave of passion, or emotion.¹ In a special sense, a rāga is a sonal composition of musical notes (*svaras*) having a sequence, form, or structure of a peculiar significance. Some of its component notes stand in a significant relationship to one another to give a character to the rāga, *e.g.*, the starting, or initial note (*graha svara*), the predominant or expressive note (*aṁśa svara*), and the terminating, or the final note (*nyāsa svara*), has each a peculiar significance in the composition of a rāga.

The starting note (*graha*) and the terminating note (*nyāsa*) have now almost lost their significance. But the *aṁśa* (predominant note) is of great importance. It is also called the *vādī* (lit. the speaker, or announcer) *i.e.* the note which indicates, manifests, or expresses the peculiar character of the rāga, and receives the greatest emphasis in the structure of the rāga. It is also called the *jīva*, or the soul of the rāga. Just as the *vādī* note determines the general character of a rāga, the *vivādī*, or the dissonant note, distinguishes and differentiates it from other forms of rāgas, by avoidance of the *vivādī* note. For, this dissonant note destroys the character of the melody. The *vivādī* note gives the negative element, and, the other three, the positive determining elements of a rāga.² Every rāga has its special

(1) 'Rañjayati iti rāgaḥ'—'that which colours, is a rāga.'

(2) In the Sanskrit text-books on music (conveniently summarised by Sir S. M. Tagore in his *Saṅgītasaṅgraha*, p. 27), very

types of a serial of notes for ascent (*āroha*) and descent (*avaroha*) which determines its structure or *ṭhāṭ*. The degree of insistence or importance of particular notes lends flesh, blood, colour, and life to the scale and creates a Rāga.

Some definitions are given of the nature of rāga by ancient authorities. The earliest is that of Mataṅga (circa 5th century)—a fairly ancient authority, later than Bharata, but much earlier than Śārṅgadeva. His definition is repeated by all later authors. According to Mataṅga, 'A rāga is called by the learned, that kind of sound composition, which is adorned with musical notes, in some peculiarly stationary, or ascending, or descending, or moving values (*varṇa*), which have the effect of colouring the hearts of men'¹. In this definition a technical word *varṇa* (value) is used. *Varṇas* (values) are of four kinds: 'values of duration'

picturesque definitions and descriptions are given of the characteristic composing notes of a rāga, viz. *vāḍi*, *saṃvāḍi*, *anuvāḍi*, and *vivāḍi* (sonant, consonant, assonant, dissonant) notes: "sa *vāḍi* *kathyate* *pracuro* *yaḥ* *prayogeṣu* *vakti* *rāgādiniścayaṃ*"—"That note is called a *vāḍi*, by the abundant use of which a rāga is clearly differentiated.'

"*Samaśrutīṣca saṃvāḍi pañcamasya samah kvasit*"—"The *saṃvāḍi* note has similar quarter-tones (*śruti*) as the *vāḍi* note, or according to some, is equal to the fifth note.' '*Vivāḍi* is a note situated at a distance of two *Srutis* from the *vāḍi* note, e.g. *gāṇ-* *dhāra* (c) and *nikhāda*. (c). The other notes are *anuvāḍi*.

The following verses summarise the relationship:

"*Vāḍi rājā svarastasya saṃvāḍi syād amātyavat* |

Satrur vivāḍi tasy syād anuvāḍi ca bhṛtyavat | [Ibid.,

p., 28]

'Of the notes, *vāḍi* is the king, *saṃvāḍi* is the minister, *vivāḍi* is the enemy, *anuvāḍi* is in the position of a vassal.' The *vāḍi* note is translated by some as the 'regnal' note.

(1) "*Svara-varṇa-viśeṣeṇa dhvani-bhedena vā punaḥ* |

Rajyate yena yaḥ kaścit sa rāgaḥ sammataḥ satām | 290

Athavā: Yo'sau dhvani-viśeṣastu svara-varṇavibhāṣitah |

Raṇjako jana-cittānāṃ sa rāga udāhṛtaḥ | 291

Ityevaṃ rāgā-śabdasya vyutpattir-abhidhiyate |

Raṇjanājjāyate rāgo vyutpattiḥ smudāhṛtā | 293

Mataṅga-muni : 'Bṛhaddeśi' (Trivandrum edition, p. 81)

(*sthāyī*); ‘values of ascent’ (*ārohaṇa*); ‘values of descent’ (*avarohana*); and ‘values of movement’ (*sañcārī*). This definition of *rāga* may be paraphrased as a note-composition having a peculiar musical significance, in their values of duration, ascent, descent, or movement, capable of affecting the human mind with peculiar feelings.

A second definition ascribed to Bharata and quoted in the *Saṅgīta Nārāyaṇa* (circa 1750) is somewhat more subjective and vague.

“Those are called *rāgas* by Bharata and other sages by which the hearts of all the beings in the three worlds are coloured and pleased.”¹

A third version is also a paraphrase of the last two. ‘By which all people are coloured, or elated as soon as they hear it, and by reason of giving pleasure to all, that is known as *rāga*.’ In all the three definitions, the word *rāga* is derived from the root ‘*rañja*’, “to colour,” “to tinge.”

Rāgas are usually said to have descended from a certain parent stock which is technically known as a *ṭhaṭ* (lit. an ‘array’, or a ‘setting’). These *ṭhāṭs* represent modes, or types of some group of notes, from which distinct forms, or modes of somewhat similar texture can be derived. The difference between a *ṭhāṭ* and a *rāga* consists in the absence of any aesthetic value in the former which is only the ascent and the descent without the distinctive assonant, and consonant notes (*vādī*, *anuvādī*, or *saṃvādī*) and without the capacity of conveying any emotion. *Ṭhāṭ* is technically used in the instrumental music system of Northern India to denote the frets of string instruments (*Sitār*, *Vīṇā*, *Sur-bāḥār*) for the purpose of playing a given pattern of modes, for, one setting will serve for several modes of the same type,—e.g. *Bhairavī ṭhāṭ*, *Kāfī ṭhāṭ*. Thus *ṭhāṭ* is used in a classifying sense, the corresponding Southern or the Karnatic word is *mela-kartā*—the ‘union-maker,’ that is to say, the group-maker which groups together several allied *rāgas*.

- (1) *Yaistu cetāmsi rajyante jagattritayavarttinām|*

- (2) *Yasya śravaṇa-mātreṇa rajyante śakalāḥ prājāḥ|*
Sarvānurañjanād dhetos tena rāga iti smṛtaḥ||

A rāga may, therefore, be, more correctly, rendered as a “melody-mould,” a “melody-type,” or a “musical pattern.” “Except for the primary condition that certain notes are to come in a certain way, there is no other restriction imposed on the singing of a particular rāga” (R. Śrīnivāsa).

As Fox Strangways observes: “A Rāga gets its special flavour not so much from its being just what it is, as *from its not being something else, closely allied to it*, which is present all the time in the musician’s consciousness.” [The italics are ours.] It is, however, the distinct individuality of the rāga which makes for the consciousness of the difference and not the difference which creates the individuality which seems to be suggested by the italicised expression. And it sometimes requires long education and trained connoisseurship to distinguish between two apparently identical, but subtly distinguished, rāgas, which the less trained ears of the uneducated frequently confuse.

S. G. Kanhere² observes: “In the language of music the arrangement of notes which colour or affect certain emotion of the mind is called rāga. The definition of rāga given in Sanskrit books is “that a particular combination or relation of several notes which is pleasing to the ear is called Rāga.” Many conflicting explanations of rāga given by different scholars converge to the same centre, i.e., “the pleasant effect of the arrangements of notes.”

Clements in his excellent study of the fundamentals of type,—e.g. *Bhairavī thāt*, Indian Music thus describes the rāga:³ “The name of the Rāga connotes a scale bearing a fixed relationship to the drone, with its harmonic structure determined by a *Vādī* and *Samvādī*, a chief note (“aṁśa svara”) occurring more frequently than others, a lower limit described in terms of the Murchanā, occasionally an upper limit also, certain characteristic turns of melody, recurring with frequency, certain rules regarding the employment of embellishments,

(1) Fox Strangways : *The Music of Hindostan*, p. 170.

(2) S. G. Kanhere : “Some remarks on Indian Music,” Bulletin of the School of Oriental Studies, vol. IV, pp. 105-120.

(3) E. Clements : ‘Introduction to the Study of Indian Music’, London 1913, pp. 3-4.

and a stated time of the day for its performance. It is a common practice, after singing an air in a Rāga, to improvise a series of free fantasia passages each returning in due course to a characteristic snatch of the melody, only to wander off again in still more elaborate variations. The whole performance must be "within the Rāga," that is, without transgression of the elaborate rules governing its structure."

Philippe Stern ("La Musique Hindoue", *La Revue Musicale*, Mai 1923, p. 31, 55-6) thus defines a rāga:—"It is the deepening of the idea of mode that which gives not only the mode but also the choice of principal notes, the degrees to be avoided, the difference of the descending and ascending movements, the prescribed sequences, the movement, this ambient, this coloration, this peculiar physiognomy, this personality constitutes the rāga (lit. the taint). A rāga, when transcribed in notes, should include the rise, fall and often the prescribed sequences. It can be taken for a melody. Often however an actual melody is given as an example and we have there the appearance of a skeleton on account of the fact that the Indian notation does not generally indicate the ornaments. We are simply told that—it is that rāga. Indeed, but quite a different melody might also be that rāga and give that ambient. The Indian musician is in a situation which is analogous to that of the sculptor of the Middle Ages, who being a prisoner of the canons of religious iconography, tried there to specialise thoroughly in certain types, marked his personality with details so very striking for the initiated that these types remained enclosed within a limit, and he following the same rules created either a mediocre work, or a masterpiece."

In a recent article, the same author has made another attempt to translate the idea of a rāga: "What is a rāga? It is an atmosphere, a musical colouring. This colouring is associated with a mood of feeling, a sentiment. It is often, also, associated with the time of the day, and it is quite obvious that the musical colouring should differ for dawn or dusk, for heat or for middle of the night How is this musical colouring attained? How is the rāga to be defined in musical terms? The rāga belongs to the realm of modes and of different scales. In modes, Indian

music is extremely rich, but the *rāga* is not *only* the scale. The various explanations of the *rāga* have often been misleading, because they stop short or go too far. It has been sometimes said that the *rāga* is a mode; but the *rāga* is far more precise and much richer than a mode. On the same mode there are several *rāgas*. The *rāga* is therefore in that direction, but goes further. The *rāga* has been also likened to a skeleton of melody which is to be clothed with varied ornaments. But this goes too far; the *rāga* is much less fixed and much richer than a musical outline given; several melodies, all different, can be composed on the same *rāga*; so that the definition as regards melody is beyond the truth. The *rāga* is more fixed than the mode, and less fixed than the melody, beyond the mode and short of the melody, and richer both than a given mode or a given melody. It is a mode with added multiple specialities.”¹

Mr. Fox Strangways defines *rāga* as “an arbitrary series of notes characterized, as far as possible as individuals, by proximity to or remoteness from the note which marks the *tessitura* (general level of the melody), by a special order in which they are usually taken, by the frequency or the reverse with which they occur, by grace or the absence of it, and by relation to a tonic usually reinforced by a drone.” Mr. Popley paraphrases this definition in a simplified form: “*Rāgas* are different series of notes within the octave, which form the basis of all Indian melodies, and are differentiated from each other by the prominence of certain fixed notes and by the sequence of particular notes. We may perhaps find in the term ‘melody-type’ the best way to transcribe *rāga* in English.”²

In rendering or interpreting a *rāga*, it is not necessary to reproduce, or repeat slavishly, or mechanically, its component notes in a given sequence. If one keeps to the main features, or outlines of the pattern, considerable latitude is allowed by way of improvisations. Indeed no rendering of the same *rāga*, even by the same interpreter need be, iden-

(1) Philippe Stern : “*The Music of India and the Theory of the Rāga*” (*Indian Art and Letters*, New series, vol. VII, no. 1 1933, p. 1-9).

(2) Herbert A. Popley : ‘*The Music of India*,’ 1921, p. 39.

tically alike,—like ‘copies’ of a stereotype, or the repetitions of a gramophone. The actual form varies, according to the mood, or skill of the singer, or the response of the audience, though adhering to the main outline of the types,—so as not to call up the mental picture (*tasbīr*) of any other rāga, however, closely related. In order to keep to this identity of pattern, or mould, it is necessary to avoid notes, which will alter the individuality of the ‘picture,’ the peculiarity of the physiognomy, or in other words, will introduce dissonance, or a jarring feeling. This dissonant note to be avoided, is, as we know, the *vivādī* (the inimical note). *Samvādī* is, on the other hand, the consonant note. While the *anuvādī* (assonant, or subservient) note stands for all other notes which are not *vādī*, *samvādī*, or *vivādī*.¹

According to the number of notes composing them rāgas are classified as *oḍava* (pentatonic) using five notes, *ṣāḍava* or *khāḍava* (hexatonic) using six notes, and *sampūrṇa* (heptatonic) using all the seven notes. With less than five notes, no rāga can be composed.²

According to Mātāṅga, an ancient authority on Music, ‘no classical melody (*mārga*) can be composed from four notes and less; melodies with notes of less than five are used by tribes such as Śavaras, Pulindas, Kāmbojas, Vaṅgas, Kīrātas, Vālhikas, Andhras, Draviḍas, and foresters.’³ An exception is made in the case of a class of stage songs known as *dhruvās*, which though regarded as classical melodies,

(1) It is sometimes believed that a *vivādī* note is to be avoided, and is absent in a rāga. This is not correct. A *vivādī* note is occasionally introduced to demonstrate its dissonant character in the scheme of a particular melody.

(2) According to some authorities, the Mālava-śrī rāgiṇī is a melody of less than five notes.

(3) “*Catuḥ-svarāt prabhṛti na mārgaḥ śavara-pulinda-kāmboja-vaṅga-kīrāta-vālhikāndhra-draviḍa-vanādisu prayujyate|*

are found to be composed of four notes.

If the combinations, growing out of the component members or elements (*svaras*) of a rāga-composition, have any significant qualities, or functions, the *ensemble* of the rāga-form must spell and express some particular states of feelings and emotions. Indeed, they are believed to represent particular moods, association, or atmosphere of the human mind, or of nature,—and to be able to call up and invoke a distinctive kind of feeling answering to the state of the mind,—or its physical environment, for the time being. Rāgas have, therefore, the power of producing certain mental effects and each is supposed to have an emotional value, or signification which may be called the *ethos* of the rāga. Rāgas may be said to stand for the language of the soul, expressing itself variously, under the stress of sorrow, or the inspiration of joy, under the storm of passion, or the thrills of the expectation, under the throes of love-longing, the pangs of separation, or the joys of union.

RĀGINI KAKUBHĀ

HISTORY OF THE RAGAS

By legend and tradition Indian music is supposed to be derived from, and have its roots in, the Vedas.¹ Let us see if the music of the Vedic age offer any materials for the rāgas. The Sāman chants appear to be melodies of three notes (tetrachord?) known as *udātta* (raised), *anudātta* (not raised) and *svarita* (sounded, graced). This seems to be borne out by the sūtras of Pāṇini (5th century B.C.) who defines the *svarita* note as an adjustment or amalgamation of the two notes *udātta* and *anudātta*.² If the Vedic chants were music confined to three notes, they were not melodies or rāgas in our sense, for a *rāga* must at least have five notes (pentatonic). The *śikṣās* (branches of the Prātiśākhya) seem to give a different interpretation to the three Vedic notes. According to this later definition, *udātta* stands for *niṣāda* and *gāndhāra*, *anudātta* for *ṛṣabha* and *dhaivata*, and *svarita* for *ṣaḍja*, *madhyama* and *pañcamā*.³ According to the tonic values of the notes, *ṣaḍja* and *madhyama* are made of 4 śrutis which is made to equate with the Vedic notes known as 'svarita.' The notes *ṛṣabha* and *dhaivata* are made of 3 śrutis and answer to *anudātta* notes, while *niṣāda* and *gāndhāra*, made of 2 śrutis, correspond to *udātta*. The seven notes therefore are implied in the three

Svarita-prabhavāhy ete ṣaḍja-madhyama-pañcahāḥ ||"

notes of the Vedic melodies.

There is a long standing tradition, still surviving in current musical practices, that after Vālmiki had composed his *Rāmāyaṇa*, it was set to music by Bharata himself¹ and sung by Lava and Kuśa, who were fortunate in finding as their auditor Rāma himself. We have no means of knowing the character of the melodies to which the *Rāmāyaṇa* was sung.

Bharata.

It may be remarked that a greater part of what now passes under the name of classical music, at one time or other, belonged to the world of *deśi*, or folk music, and which being refined and affiliated to the rules and system of the traditional classic music have contributed to its growth and development. Materials are very scanty for tracing the processes by which *rāgas* evolved in their present forms, characters and classifications. It is certainly difficult to contend that the *rāgas* as understood to-day, had evolved and were recognized as such, at the time² when the *Nāṭyaśāstra* attributed to Bharata was compiled;³ though there would be nothing improbable in the supposition that

(1) *Rāmāyaṇa*: “*Tam sa śuśrāva kākutsthaḥ pūrvācārya—vinirmīṭam*” which a commentator explains: ‘*gāthakānām gāna?sidhaye pūrvvācāryyeṇa Bharatena nirmmitam.*’

(2) According to Keith: “The date of that text (*Nāṭyaśāstra*) is uncertain, but we cannot with any certainty place it before the third century A.D.” (*The Sanskrit Drama*, Oxford, 1924, p. 13.)

(3) The remarks of J. Grosset (*Contribution à l'étude La Musique Hindoue*, 1888, p. 88) are very pertinent in this connection: “We believe that the introduction of the theory of *rāga* is of relatively recent date, Bharata in his *Nāṭyaśāstra* no-where gives it a definition. He does not devote any *adhyāya* to the exposition of this musical element which had subsequently such an important development. Therefore in spite of the definition of *rāga* being attributed to our authority by W. Jones, Mohun Tagore etc., in spite of the quotations that they give as emanating from him (Bharata) and some commentators of dramas, we are of opinion that in the period of the composition of the *Nāṭyaśāstra*, the *rāgas* did not constitute one of the elements of the musical theory but that they were gradually substituted for the *jātis* which, however, they resembled, and, it seems, permitted a double use.”

they may have evolved, though not known and recognized by definite names or associated with any cult, season, or particular areas of culture. In the musical data of the *Nāṭyaśāstra* (chapter 38) we have definite evidence of the theory of the consonance of notes (*samavāditya*) in the terminology used viz., *vādī*, *saṁvādī*, *anuvādī*, *vivādī*,— words which are indeed as old as the second century A.D., for, they occur in the *Mahābhārata* (XIV, 14, 19), which is believed to have taken their present form some time between 400 B.C. and 200 A.D. In the *Nāṭyaśāstra* (ch. 38, śloka 23) we have not only a recognition of the relationship between the consonant, assnant, dissonant notes, but also an allusion to a theory of the relative values of initial and terminal notes *graha*, *nyāsa* and *apanyāsa* (ch. 28, ślokas 80, 81).

But these data appear to be forestalled by Dattila, a musical authority (*Saṅgītācārya*), who seems to be earlier than Bharata.¹

According to the text attributed to Dattila,² *vādī*, *anuvādī* and *vivādī* notes are recognised and defined.

The text of Dattila also refers, in a summary way, to the 18 *jātis*, or species of melodies, of which seven take their names after the seven notes. The remaining eleven are also named and described according to their component parts. Of these, seven belong to the *ṣaḍja* scale (*grāma*) and the

(1) According to an old tradition, Dattila is supposed to be one of the five Bharatas (Nandi, Kohala, Dattila, Bharata and Mataṅga) who made the science of music and dramaturgy current in the world. Dattila is sometimes associated with Kohala, and they were supposed to have collaborated in a work known as *Dattila-Kohalyam*. Kohala being undoubtedly an earlier authority than Bharata, who quotes Kohala, it follows that Dattila is earlier than Bharata. This view is supported by two scholars who have recently investigated into the relative positions of the early authorities on music: (i) V. V. Narasiṃhachary "The Early Writers on Music" (*The Journal of the Music Academy*, Madras, October, 1930, p. 259) and (ii) V. Raghavan: "Some names in early Saṅgīta Literature" (*Ibid.*, Vol. III, 1932, No. 1 & 2, p. 12): "The present text (of Bharata) is later than Kohala and even Dattila".

(2) Published in the Trivandrum Sanskrit Series. No. CII.

rest to the madhyama scale.

We have also, a classification of melody-types according to the number of notes used, into three classes known as pentatonic (oḍava), sextatonic (khāḍava) and septatonic (sampūrṇā). Both Dattila and Bharata, therefore, give us all the ingredients or materials for the structure of a melody.

In fact Bharata, following Dattila, classifies the melodies under the name of *jātis* (species). These he classifies under two modes or scales (grāmas), the ṣaḍja-grāma and madhyama-grāma. Under these two modes (grāmas) Bharata enumerates the 18 *jātis* of melodies, the same as given by Dattila (See Appendix 1 and 2).

According to Mataṅga (an authority who comes next after Bharata), the *jātis* generate the *grāma-rāgas* with the use of the tonic-initial the predominating or *aṃśa* note.¹ Mataṅga gives the following definition of *jāti*: "The *jātis* are born out of the initial notes and śrutis (microtones). Hence they are called *jātis*, from which is born (that is to say, from which begins) the consciousness of flavour *that is jāti*. In the alternative, by reason of the birth of all kinds of melodies, *jātis* are so-called."² The same author expounds the 18 *jātis* enumerated by Bharata, with somewhat greater elaboration.

In the next chapter (29), Bharata indicates the *rasa* (passion) and *bhāvas* (sentiments) of each of the *jātis* and what *jātis* should be employed to interpret a particular sentiment.

Bharata's *jātis*, therefore, for all practical purposes provide the *genus* out of which the *rāgas* have been derived although Bharata does not actually use the term *rāga*. In fact Mataṅga asserts that "he is including in his work informations on such subjects as "courses of *rāgas*" with their marks and characteristics,—matters which have not been dealt with by Bharata and other sages".³

irivamsa.

That the *rāgas*, associated with the modes (grāma)

were in existence already before Bharata summarised them in his sections devoted to music, is proved by significant allusions in the *Harivaṃśa*, (which is regarded as a supplement to the *Mahābhārata*) and is ascribed to about 300 A.D.¹

In more than one passages, *grāma-rāgas* are referred to and it is very likely, these *grāma-rāgas* were of the types indicated by Bharata. In the 89th chapter of the Viṣṇu-parva in connection with a water carnival, various musical and dramatic representations are described in the *Harivaṃśa*. The women of the descendants of Bhīma sang various songs.

“O king! the skill required to perform a fraction of the forms of the different varieties of the six *grāma-rāgas* (modal melodies), in their fine and subtle classifications (*jātis*), can only be attempted by human beings with great difficulty” [ch. 89, 82].

According to a different reading, the first passage in the quotation would refer to eleven varieties (*ekādaśa avayava*) of modal melodies answering to the eleven composite modes referred to in Dattila [Appendix 1].

*

*

*

(Chapter 93, verses 23, 24):

“Thereafter, the women of the Bhīma tribe sang *Chālika* songs in the melody of Devagāndhāra,” sweet to the ear like nectar, and pleasant to the ear and a delight to the mind.”

“Then they sang songs beautifully, having for their subject the *Descent of Gaṅgā* in the *grāma-rāgas* which

(1) The date 200 A.D. has been assigned to the *Harivaṃśa* on the ground of the occurrence of the word *dināra*. See Hopkins, *Great Epic of India*, p. 387; Winternitz, *A History of Indian Literature* (Cal. Ed. Vol. I, 1927, p. 464) remarks “We may assume that it did not come into existence very long before the 4th century A.D.” R. G. Bhandarkar (*Vaiṣṇavism*, p. 36) assigns it to “about the third century of the Christian era.”

(2) It is surprising to find, here, a reference to the well-known melody of Deva-Gāndhāra (Deo-Gāndhā). [See Notes on Plate LXXI]. It is a derivative of the archaic *grāma-rāga* known as *Bhinna-ṣaḍja*.

went up to Gāndhāra (grāma), with the grandeur of beautiful notes, pierced (*viddham*) and elaborated (*āsāritam*)”.

“The *grāma rāgas* referred to above, it may be assumed, were identical with the *grāma-rāgas* described in the *Nāṭya-śāstra*. Only the latter describes the *grāma-rāgas* appertaining to two grāmas viz. *ṣaḍja* and *madhyama*, while the passage of the *Harivaṃśa* alludes to *rāgas* belonging to the *gāndhāra-grāma*. As some ancient authorities have explained, the last named grāma (scale) was obsolete amongst men and were current in celestial practices. In fact, one text suggests that according to Nārada, the *ṣaḍja-grāma* has grown out of the terrestrial regions, the *madhyama-grāma* from the ethereal regions, and the *gāndhāra-grāma* from the celestial regions, and not from anywhere else.

Anyhow, the *grāma-rāgas* of Bharata are referred to and described in the *Nārādīyā Śikṣā*,¹ under the names of “Niṣāda-Khāḍava”, “Pañcama”, “Madhyama-grāma”, “Ṣaḍja-grāma”, “Sādhāritam”, “Kaiśikam”, and “Kaiśika-madhyama”. The two last named melodies are described as follows:

“After expressing the Kaiśika (V) in the presence of

(1) *Nārādīyā Śikṣā (Sāma-vedīya)* edited by Satyavrata Sāmaśramī, Calcutta, 1890. Popley (*The Music of India*, page 14) suggests that it was “probably composed between the tenth and twelfth century”. Considering that its rāga system corresponds very nearly to that of the Kuḍumiyamālai inscription, the data, if not the text of the *Nārādīyā Śikṣā*, must be earlier than the 7th century and considering the fact that it only refers to seven melodies, while the *Pañcatantra* refers to thirty-six, the former must be earlier than the *Pañcatantra*. Kielhorn suggests that some of the *Śikṣās* are not earlier than the date of Patañjali (2nd century B. C.) “That the *Śikṣās* in verse were in existence when Patañjali composed his great commentary on Kātyāyana’s “Vārtikas” seems to me very probable. *The Indian Antiquary*, May 1876, p. 143., foot-note.

M. Rama Krishna Kavi (‘Literature on Music,’ *Journal, Andhra Historical Research Society*, Vol. III, 1928-29, pp. 20-29)) believes that the *Nārādīyā Śikṣā*, or, at least, the view of Nārada, the traditional author of the *Śikṣā*, is quoted by Bharata in Chapter 34. He is therefore inclined to place the musical data of the *Nārādīyā Śikṣā* earlier than Bharata.

all the notes, where (the melody) terminates in the *madhyama*, there arises “Kaiśika-madhyama” (VI) where the *Kākalī* (?sharp Nīkhāda) is seen and the *pañcama* predominates. Kāśyapa calls it “Kaiśika”, born of the “Madhyama grāma” (VII), (11th śloka).

The next available evidence of the currency of the grāma-rāgas is furnished by the inscription of Kuḍumiyamālai¹ in the Pudukkottai State (Southern India), written in characters of the seventh century. Though not designated as such, seven different varieties of melodies are given in the form of notations namely: (i) Madhyama-grāma (ii) Sādja-grāma (iii) Sādava (iv) Sādharita (v) Pañcama (vi) Kaiśika-madhyama (vii) Kaiśika, which seem to correspond to the grāma rāgas given in the *Nāradyā Śikṣā* the text of which should, therefore, be considered as earlier than the seventh century.

Kudumiya-
mālai
Inscriptio

In editing this inscription P. R. Bhandarkar¹ remarks: “It is clear that the seven rāgas of this inscription did not exist in the time of Bharatiya *Nāṭya-śāstra*. When they came into existence is not known, the present inscription being the earliest record.” There is no doubt that these seven rāgas, even if they existed at the time, are not indicated in the *Nāṭya-śāstra*. But a glance at the seven melodies will show that they are identical with the seven melodies described in the *Nāradyā Śikṣā*, quoted and translated above. In the last named text their compositional forms are verbally described, while in the inscription their “skeleton notes are given for the benefit of students” (*śiṣya-hitārthāya kṛtaḥ svarāgamah*). Excepting two viz. ‘Pañcama’ and ‘Kaiśika’, none of the others in their names, seem to suggest any of the rāgas known in later texts. There is no doubt that here we have the rāgas in their nascent stage, crudely described with reference to their salient notes, long before they came to be associated with any season, region, or cult, and assumed proper names.

It will be convenient to consider here, a curious reference to the so-called thirty-six rāgas in the *Pañcatantra* (dated about the fifth century, being anterior to A.D. 570).

Pañcatan-
tra.

(1) P. R. Bhandarkar: “Kudumiyamālai Inscription of Music”, *Epigraphia Indica*, Vol. XII, 1914, p. 266.

In the tale of "Ass as Singer",¹ the ass inspired by the beauty of the night expresses a desire to sing, and, being exhorted by his friend the jackal not to sing, boasts of his knowledge of the musical science as will appear from the following extract:

"O! sister's daughter! Look here. It is a very clear beautiful night. I am, therefore, going to sing. Well then, in what melody (rāga) must I sing? * * * * * What? Don't I know how to sing? Listen, I will tell you of the theory. It is thus. There are seven notes, three scales, twenty-one grace modes, forty-nine melodic improvisations, three units of time, three voice-registers, six ways of singing, nine emotions, thirty-six variations of the melody (*varṇa*); and forty minor melodies are known. Thus, the mode of singing will embrace all the 185 parts of song, pure as gold."

The word actually used in the last passage is *varṇa* which cannot be taken as equivalent to rāgas. On the other hand, in the first passage, the term rāga is actually used in the sense of a song being set to a particular melody. This would certainly suggest that more than one rāga, in the sense we understand to-day, had come into existence and were current in practice. Whether they were still in the stage of *grāmarāgas*, or had been recognized and labelled by proper names it is impossible to say from the data of this allusion to the science of music in the *Pañcatantra* (5th century). From the above reference it is difficult to say,—if the six rāgas and thirty-six rāgiṇīs, popular in North India, had been evolved by that time. The passage refers to thirty-six classes altogether.

We now come to an important text, recently come to light, and known as *Bṛhad-deśī* by Matanga-muni,² which, though fragmentary, throws a flood of light on the history of the rāgas. As its name implies it is a comprehensive (*Bṛhat*) treatise on *deśī* or folk-music, current on the earth, as distinguished from the *mārga* or celestial music, cur-

rhad-desī
by
Matanga-
muni

(2) Published in the Trivandrum Sanskrit Series (Vol. XCIV., 1928.)

rent in the heavens.

After devoting a chapter to the *Jātis*, Mataṅga devotes a special chapter to the *rāgas*. Indeed, it is in this chapter of the *Bṛhad-deśī* that we first come across the word “*rāgas*” as understood in all later literature on Indian music. In the history of the *rāgas*, *Bṛhad-deśī* is, therefore, a very important landmark. Chronologically, the work stands between the *Nāṭyaśāstra* of Bharata, and the *Saṅgita-makaranda* of Nārada, that is to say, some time between the 4th and the 7th century.¹

Mataṅga regards *rāgas* as one of the seven classes of songs (*gītis*) current in his time. He cites Yāṣṭika, an earlier authority, according to whom the *gītis* were of five classes: *śuddha*, *bhinna*, *vesara*, *gauḍa*, and *sādhārīta*. At the time of Mataṅga, the *gītis* were of seven varieties.² (1) *śuddha* (2) *bhinnaka* (3) *gauḍika* (4) *rāga-gīti* (5) *sādhāraṇī* (6) *bhāṣā-gīti* (7) *vibhāṣā-gītis*. The *raga-gītis* are fourth in Mataṅga’s list (*rāga-gītis-caturthikā*). He defines the various classes of *gītis*, and describes *rāga-gītis* as follows: “Attractive note compositions, with beautiful and illuminating graces are known as *rāga-gītis*. Where the four *varṇas* (probably the four characters of values of duration, ascent, descent, and movement) are met with in

(1) According to V. Raghavan, Mataṅga cannot be earlier than the 9th century, while Ram Chandra Kavi seems to assign to him an earlier date, on the basis of an alleged reference by Mataṅga to Rudraṭa, who is not the great rhetorician of the 9th century. According to a quotation given by Kallinātha who cites Mataṅga as quoting Rudraṭa (*Saṅgita-Ratnākara*, p. 82), V. Raghavan is of opinion that Mataṅga’s *Bṛhaddeśī* cannot be earlier than the 9th century. Ram Chandra Kavi (“Literary Gleanings”, *Journal, Andhra Historical Research Society*, Vol. III, 1929, nos. 2, 3, 4 at pages 200-206 takes Rudraṭa cited by Mataṅga, as Rudrācārya, the protégé of the kind Mahendra Vikrama, referred to in the Kuḍumiyamālai music inscription (7th century). (See the discussion of the date in V. Raghavan’s paper “Some names in early Saṅgita Literature”, *Journal of the Music Academy*, Madras, Vol. II No. 1 & 2, 1932, p. 19, 25-26). Having regard to the archaic nature of the

(2) Published in the Trivandrum Sanskrit Series (Vol. XCIV., 1928).

data relating to rāgas cited in *Bṛhaddeśi*, it is difficult to assign it to a period as late as the 9th century.

a graceful combination that is known as rāga."

Of the seven classes of *gītis*, sub-divisions are enumerated. Thus 'śuddha' (*cokṣa*), and 'bhinnaka' have each five varieties, 'gauḍas' three varieties; 'rāgas' are of eight varieties and 'sādhāraṇas,' of seven varieties; 'bhāṣās' are of sixteen kinds and 'vibhāṣās,' of twelve kinds. The eight varieties of rāgas went by the name of (1) Takka, or Taku (2) Sauvīra (3) Mālava-pañcama (4) Khāḍava (5) Voṭṭa-rāga (6) Hindolaka (7) Takka-Kaiśika.¹

Here then we have the first enumeration of eight of the earliest rāgas known by name. Some of them may have been derived from the 18 jātis described by Bharata.

That the 'bhāṣā', 'vibhāṣā' and sādhāraṇa gītis, were later related to and amalgamated with the rāga system appears to be suggested by the names given to these gītis.

Thus the 'sādhāraṇa gītis' bear six names (1) Śaka (2) Kakubha (3) Harmāṇa-pañcama (4) Rūpa-sādhārīta (5) Gāndhāra-pañcama (6) Śaḍja-kaiśika. (Appendix 3).

Even from the time of Bharata, the melodies were used and they naturally developed in association with the different sections of the body of a drama. Thus, in a passage of Bharata quoted by Maṭaṅga (*Bṛhad-deśi*, p. 87), it is laid down that the madhyama-grāma melodies should be used in the *mukha* (opening of the drama), the śaḍja-grāma melodies in the *pratimukha* stages (progression), the sādhārīta melodies in the *garbha* (development) stages, and the pañcama-jāti melodies for the *vimarśa* (pauses) and so on.²

It is from this point of view that the 18 jātis of melodies are assigned by Bharata (Ch. 29, 1-4 verses) their *rasa*

values, that is to say, their appropriateness for particular passion, sentiment, or atmosphere of feeling, with reference to particular situations in the plot of a drama (*"tat pravṛtte rase kāyaṃ gāṇaṃgeye prayoktṛbhiḥ,"* Ch. 29, verse 11.) This is made clear by the more elaborate descriptions of jāti melodies or gītis given by Mataṅga who, while describing the component notes of each gīti, mentions the *rasa*, or the flavour of sentiment appropriate to each, and the place in the body of the drama where a gīti can be appropriately introduced. And it is very probable that the *rāga-gītis*, were first distinguished from other classes of gītis (e.g. Śuddha, Bhinna, Gaūdī), on account of the *rasa*—quality, the power of evoking emphatic and clearly differentiated sentiments, or qualities of feeling.

The only other comment which the text of Mataṅga calls for is that it represents a very early stage in the development of the *rāgas*, when Kakubha, destined to be pushed to a subordinate position as a *rāgiṇī*, later on, figures as a major melody, to which several minor melodies (*bhāṣās*) are affiliated. At this stage, Bhairava, which was later derived from Bhinna-ṣaḍja,¹ an ancient jāti-rāga, had not yet come into existence. Unfortunately the successive developments are not supported by documents as there is a considerable gap between the text of Mataṅga and the next landmark.

In the well-known encyclopædia known as *Mānasollāsa* or *Abhilāṣārtha-cintāmaṇi*,² by Someśvara which we owe to a royal author, there are two chapters devoted to music and music data. The work was composed in 1131 A.D. by king Someśvara, son of Vikramāditya of the Western Cālukya dynasty, who had their capital city at Kalyāṇī (Kalyān).

(2) Portions of *Abhilāṣārtha Cintāmaṇi* have been printed and published in the Mysore Oriental Publication Series, 69, 1926, and in Gaekwad's Oriental Series No. 28, Vol. 1, 1925. But the published portions do not include the chapters on music. The informations here cited are borrowed from a Ms. in the collection of the Bhandarkar Research Institute, Poona.

As an authority on music, the Prince is mentioned by Śāraṅgadeva in his work.¹ He was also the author of a special treatise on music entitled *Saṅgīta-ratnāvalī* which is known only by references in other works.² The discussion of rāgas is confined only to the first 80 verses in the chapter in the encyclopædia devoted to music, but the chapter does not contain any reference to the system of rāga-classification, which is attributed to Someśvara in the *Rāga-darpana*, (Appendix 8) and other works; probably, the system was set out in the *Saṅgīta-ratnāvalī*. The topic is introduced by tracing the rāgas indirectly from the Sāma-veda. 'From the jātis the rāgas were ascertained. From the rāgas came the *bhāṣās*, and then the *vibhāṣās*, and the *antara-bhāṣikās*.³ According to the author, Deśi-rāgas derived from the names of regions, have been current in his time, in popular and beautiful forms.⁴ "The rāga develops by hearing, and the mind is always pleased and elated by it, therefore they are called rāgas; I am proceeding to recite them by names."⁵ Then, the author gives a catalogue of the different classes or types of rāgas, apparently current in his time. Thus, the five śuddha rāgas are stated to be: (1) Śuddha-ṣaḍava, (2) Śuddha-pañcama, (3) Śuddha-

Tena rāgaḥ samākhyātā nāmatastān vravimyaḥam||4|| Ibid.

sādhārīta, (4) Śuddha-kaiśika-madhyama, (5) Śuddha-kaiśika. The names of the five Bhinna-rāgas are: (1) Bhinna-ṣaḍja (2) Bhinna-tāna(?) (3) Bhinna-kaiśika-madhyama (4) Bhinna-pañcama (5) Bhinna-kaiśika. The three Gauḍas are: (1) Gauḍa-pañcama, (2) Gauḍa-kaiśika-madhyama, (3) Gauḍa-kaiśika. The rāgas proper are said to be eight in number : (1) Ṣaḍava, (2) Voḍḍa-rāga, (3) Mālava-pañcama (4) Takka-kaiśika, (5) Sauvīra, (6) Mālava-kaiśika, (7) Hindola, (8) Taka.¹ Of Sādhāraṇa melodies, seven names are given: (1) Narta, (2) Śaka, (3) Kakubha, (4) Harmāna-pañcama, (5) Rūpa-sādhārīta, (6) Gāndhāra-pañcama, (7) Ṣaḍja-kauśika.

The author then gives a series of verses describing the structure of the following melodies : Śrī-rāga, Soma-rāga, Mālava-kauśika, Harṣa-purī(?) Hindola, Deśi-Hindola, Bhairivī, Mahlāra, Sāverī, Valitī (? Vahuli), Vaṅgāla, Karṇāṭa-Vaṅgāla, Gurjarī, Saurāṣṭrī, Pun-nāṭa, Kaiśiki, Śuddha-varāṭī, Karṇāṭa-varāṭī, Drāviḍa-varāṭī, Śuddha-naṭī, Megha-rāga, Āhirī, Chāyānaṭī, Toḍī, (?), Dullī-Toḍī, Vahlānā, Vahuri, Velā-ullī, Chāyā-velā-ullī, Cundyī, Haṃsa, Khambhārī, Kāmōḍa, Siṃhalī-Kāmōḍa, Deśānaka (? Deśākhyā), Dantibhi(?), Kolāhala, Saindhavī, Dāmva-kṛtī, Rāmakṛtī, and Nuṇḍa-(? Tuṇḍa)-kṛtī. This is an interesting list and helps us to realise that many of the melodies had come into existence of a century before Śaraṅgadeva wrote his treatise. The different varieties of Toḍīs are of interest. The original form of the name Velā-ullī, apparently an aboriginal melody, later sanskritized into Velāvalī, also deserves notice.

Unfortunately, the successive developments are not supported by documents, as there is a considerable gap between the text of Mātāṅga and the next landmark.

The text of *Saṅgīta-makaranda*, the next available record of the history of the rāgas, though bearing testimony to the considerable development that has taken place bet-

ween the fifth and the eleventh century,¹ is very poor in actual musical data. Beyond giving some important lists of names of rāgas the text does not offer any descriptions of the melodies mentioned. Nārada, the author of this work, (not the mythical sage associated with the early legends of Hindu music), for the first time, perhaps, gives us an elaborate enumeration and classification of rāgas as known to the Northern system at the time of its composition. The author in fact gives two stages in the development of the classification. (Appendix 4).

But the most important data, furnished by this text, is the origin of the distinction between rāgas and rāgiṇīs. Here, we have for the first time a classification of the melodies into masculine and feminine groups, thus initiating the differentiation between rāgas and rāgiṇīs. In fact, Nārada gives three classifications, viz., Masculine melodies (*pum-līnga-rāgāḥ*), Feminine melodies (*śtrī-rāgāḥ*) and Neuter melodies (*napuṃsaka-rāgāḥ*). The principle of classification is according to the character of the feeling (*rasa*)

(1) On the basis of a reference to Mātṛgupta, a contemporary of Śilāditya partāpśīla of Mālava (A. D. 550-600), Mr. M. R. Telang the Editor of *Saṅgīta-Makaranda* by Nārada (Gaekwad's Oriental Series, No. XVI), ascribes this text to a period between seventh and the eleventh centuries. Mr. Telang in discussing the date omits to consider the bearing of the word Turuṣka, as the melody Turuṣka-tuṇḍī (=Turuṣka-Toḍī?) is twice mentioned (p. 16, 18), suggesting a contact with Mussulman music which is believed to have taken place about the time of Āmir Khusru, the court-poet of Sultan Alau-d-din Khiliji (1290-1360). The connotation of the word Turuṣka as such would not necessarily imply the Moslem invaders of the eleventh century. For, Kalhaṇa (11th century) in his *Rājatarāṅgiṇī* uses the word to refer to the Kuṣāna Kings who came from Central Asia (Turkestan=*Turuṣka-deśa*). It is doubtful if the word could have been applied to the Hunas, the nomad hordes, from Central Asia which poured into India in 455 A. D. 'The land of the Turuṣkas' is actually referred to in seventh century. (Bāna's *Harṣa-carita*, Cowell & Thomas' Translation, London, 1897, p. 290). So that the name Turuṣka-Toḍī, would not, necessarily, imply a contact with the Mussulmans, and may stand for a Kuṣāna melody like the Śaka-rāga.

evoked by the melodies. Thus it is laid down that in interpreting feelings or sentiments of *passion, admiration or heroism*, the masculine melodies should be employed. In interpreting feelings of *love, humour, and sorrow*, the feminine melodies should be employed. In interpreting feelings of *terror, abhorrence, and peace*, the neuter melodies should be employed.¹ Mātāṅga, as we have seen, indicated the emotive values of the major melodies described by him. Unfortunately, none of these figures in the list given in the *Saṅgīta-makaranda*, and we have no materials to compare the *rasa* values of melodies prevailing during the respective periods represented by Mātāṅga and Nārada. The latter prefaces his list of the three sets of *rāgas*, with the remark that the names given by him represent the principal melodies whose numbers are incalculable and vary in different regions.² So that we cannot take his enumerations as exhaustive. He gives a list of 20 masculine *rāgas*, 24 feminine *rāgas*, and 13 neuter *rāgas*.

Whatever may have been the basis of the subsequent development, the six *rāgas* enumerated in the *Saṅgīta-makaranda* formed the earliest group and was made the foundation of the earliest mythology of the melodies. The earliest legends ascribe to Śiva, or Naṭarāja, the origin of the science of music and dramaturgy. Śiva the cosmic dancer, is known as the arch-dramatist, and the whole of the *Nāṭya-śāstra* (embracing singing, dancing, and dramatic representations) is derived by ancient legend from this great-god (Mahā-deva). According to this legend, the *rāgas* are said to have been derived from the union of Śiva and Śakti (female energy),—Pārvatī, or Giri-jāyā. From the five faces of Śiva at the beginning of his dance (*narttā-rambhe*) came out the five *rāgas*:—Śrī-rāga, Vasanta, Bhairava, Pañcama, and Megha, while the sixth *rāga*, Naṭa-

nārāyaṇa came out of the mouth of Pārvatī (Giri-jāyā), the daughter of the Himālaya when she performed the elegant *lāsya* dance.¹

One is inclined, not without some diffidence, to place the text of the *Pañcama-sāra-saṃhitā*,² attributed to Nārada, after the *Saṅgīta-makaranda*. It has some archaic features, particularly in the peculiar absence of the Bhairava rāga.³ On the other hand, the allusions to names of some rāgas which distinctly bear the impress of later times (e.g. Koḍā, Kānoḍā, Sindhuḍā, Āsāvarī, Māhārāṭi etc.) tend to pull the date of the text towards a period, centuries later than the *Saṅgīta-makaranda*. This apparent contradiction may, perhaps, be explained by the fact that the melodies mentioned in this text were current, as suggested by the author, in an area embracing some parts of Rajputana, Guzerat, Cutch and the regions near the sea,⁴ that is to say, surviving in a small area, long after other developments had overtaken other musical centres of Northern India. The text evidently relates to musical theories prevalent in the North, at the time, and belongs to a period, when out of the large mass of floating melodies, six had been selected as major melodies

RAGINI SARANG.

to each of which five or six minor melodies are related and assigned. According to this text, the major melodies, or rāgas proper, come in the following order: "First comes Mālava, the king of the rāgas, then comes Mallāra, and after it comes Śrī-rāga and then Vasanta, Hindola and Karṇāṭa coming next,—these are the rāgas known by fame, and they are dressed as males."¹ We have, here, for the first time, the minor, or the derivative melodies designated as the 'wives of the rāgas' (*rāga-yoṣita*) and the word 'rāgiṇī' is used in the text, for the first time. They are assigned to their appropriate rāgas in a scheme given in Appendix 13.

This would be a convenient and appropriate place to notice the rāga data offered by the unpublished manuscript of the *Nāṭya-locana*, a compendium of dramaturgy of somewhat uncertain date, not earlier than the ninth century and not later than the thirteenth.² The rāgas enumerated in this text, offer some peculiar features, which suggest an early stage. They belong to a time, when the distinction between 'male' or 'female' rāgas had not come into existence. It purports to cite 44 rāgas, of which eight are stated to be *śuddha rāgas*, sixteen of the *sālamka* class (*chāyā laga*), and twenty-two are said to be *sandhi rāgas*.³ In the muti-

Nāṭya-
cana:

- (1) *Ādau Mālava rāgendrastato mallāra-saṃjñakah*
Śrī-rāgastasya paścāttu vasantastadanantaram.||
Hindolaścāthakarṇāṭa ete rāgāḥ prakīrtitāḥ
Puruṣa vastra-bhūṣāḍhyā rāgāḥ śaḥ Mālavādayaḥ.|| Ibid.

(2) The work seems to survive in a single Ms. in the collection of the Asiatic Society of Bengal No. III, E. 158. As it quotes *Anargha-rāghava* (c. 850) the upper limit of the date cannot be earlier than the ninth century. Its lower limit can only be inferred from the list of rāgas which it enumerates and which include some very archaic names, e.g. pañcama-mālava, śuddha-nāṭa, sālamka, mādhavāri, sāverī, vicitrā and himakīrika. It does not mention Bhairava the absence of which suggests an early date.

(3) It is not clear what class *sandhi rāgas* represent. It may mean *miśra* or *saṅkīrṇa* (mixed type). Perhaps it corresponds to the *jāti-sādhāraṇa* of Bharata who calls it 'sandhi' or 'twilight of the rāgas'. (See Fox-Strangways' *Music of Hindostan*, p. 138-139). Alternately, *sandhi-rāgas* may mean rāgas suitable for singing at

lated text available, some of the names cannot be read and accurately deciphered. The first group of eight consists of:—Pañcama-mālava, Mādhavāri, Hindola, Mālasikā, Velā-
vali, Toḍi, Gāndhāra, and Naṭa. The second group consists of: Lalitā, Bhairavī, Bhāṣa, Vasanta, Gurjjarī, Koḍā-Deśākh, Deśa-Varāṭī, Vicitrā, Gaṇḍa-kirī, Varāḍī, Mānavatī, Vāṅ-
gāla, Karṇāṭa, Rāma-Kirī, Sālamka, Navanāṭa, Deśākh, Nṛpa-mālava. The third group consists of:—Mallāra, Patha-
mañjarī, Dhanāsikā, Karṇāṭī, Hemakirikā, Savarī, Divāḍī, Khamvāvati, Takka, Kāmōda, Devakirī, Laungirāṭī (?), Moṭaki, Bhallāta, Vāhedī, Guṇakirī, Kokirikā, Madhukarī, Gaudī and Anunī(?) (Appendix 6).

The list undoubtedly includes many archaic and obsolete melodies which did not survive in later times. The absence of Bhairava provides an additional archaic feature, while the presence of Bhairavī in the list suggests that the Bhairava came into existence later and was related to Bhairavī, already in existence.

Bengali
hist
s

We have a very interesting corroboration of the existence of some of these melodies at last some time prior to the tenth century in the archaic Bengali songs of the Buddhist mystic of the Sahajiyā sect, by name Siddhācārya Luipā, whom Haraprasad Sastri, associating with Dīpaṃkara Śrī-jnāna, places in the tenth century,¹ while Benoytosh Bhattacharya believes Luipā lived about 669 A.D.² Each of these songs collected under the name of *Caryācarya-viniścaya*, bears on the heading of each song, the name of the melody in which it is required to be sung. The following names of rāgas are indicated: Paṭamañjarī, Gaudā, Gavaḍā (Gauḍa), Aru, Guñjarī (? Gujjarī), Deva-kirī, Deśākh, Bhairavi, Kāmod, Dhanasī, Varāḍī, Valāddī, Mallārī, Mālaśī, Mālasī-Gavaḍā (Mālava-Gauḍa), Kahnu-Guñjarī, Vaṅgāla, Śivarī Śavarī (Sāverī). Nearly all of

the five *sandhis*, 'intervals' of the five portions of a drama, cp. "*Vini-yukto garbha-sandhau śuddha-sādhāritobudhaiḥ*". (*Saṅgita-ratnā-kara*, part i, p. 157).

(1) Hara Prasad Sastri: *Bauddha Gān O Dohā*, Calcutta, 1323, Introduction, p. 15-16.

(2) Benoytosh Bhattacharya: *An Introduction to Buddhist Esoterism*, 1932, p. 69.

these melodies are cited in the *Saṅgīta-makaranda*.

A very interesting reference to the uses of melodies in connection with rituals is furnished by the rules as to the consecration of the *Nava-patrikā* ('a new plantain shoot', symbolizing the great goddess) laid down in the *Kālikā-purāṇa* in connection with the initiatory ceremonies of the Durgā-cult, the great autumnal festival (*śārādīyā-pūjā*) still current in Bengal. The rules and the formulas for the consecration are not set out in the printed edition of the *Purāṇa*, and have been borrowed, here, from a manuscript in the possession of a professional priest. The ritual consists of bathing and consecrating the 'new shoot' by waters from eight different sources collected in eight different jars. As each jar of water is poured over the shoot, it has to be accompanied by singing a particular rāga, with specified manner of drum accompaniment, together with the recitation of *mantram* invoking the auspicious influences of eight different gods and celestial beings:

Kālikā-
purāṇa

"The Lustration of the New Shoot: It should be placed in the court-yard of the house and then consecrated by bathing with waters from the eight jars.

"After singing the Mālava-rāga, with drum accompaniment of 'victory', pouring from the jar filled with water from the (river) Ganges, (the following words to be recited): 'Om! Let the Gods Brahmā, Viṣṇu, and Maheśvara sprinkle Thee with this first jar filled with water from the celestial Ganges' ||1||

"After singing the Lalita-rāga, with accompaniment of the drum *duṇḍubhī*, pouring from the jar filled with rain-water, (the following words to be recited): 'Om! Let the devoted celestial Winds (*Marutah*) sprinkle Thee, O! Thou goddess of the Gods! with this second jar, filled with water from the Clouds' ||2||

"After singing the Vibhāṣa-rāga, with accompaniment of the drum *duṇḍubhī*, pouring from the jar filled with water from the river Sarasvatī, (the following words to be recited): 'Om! Let the Vidyādharaes sprinkle Thee, O! Thou the Best of the gods! with this third jar, filled with water from the Sarasvatī' ||3||

"After singing the Bhairava-rāga, with drum accompaniment in the 'Bhima-measure,' pouring from the jar

filled with water from the Sea, (the following words to be recited): 'Om! Let Śukra and the other Lokapālas descend and sprinkle Thee with this fourth jar, filled with water from the sea' ||4||

"After singing the Kedāra-rāga, with drum accompaniment proper for the lustration of Indra, pouring from the jar filled with water mingled with pollens of lotuses, (the following words to be recited): 'Om! Let the Nāgas (the snake-gods) sprinkle Thee with this fifth jar, filled with water fragrant with pollens from lotuses' ||5||

"After singing the Varāḍī-rāga, with accompaniment of the blowing of the conch-shell pouring from the jar filled with waters from the water-falls, (the following words to be recited): 'Let the Himavat (Himālaya), the Hemakūṭa and other Mountains sprinkle Thee with this sixth jar filled with water from the Cascades' ||6||

"After singing the Vasanta-rāga, with accompaniment of the 'Five Sounds,' pouring from the jars filled with waters from all the sacred pools, (the following words to be recited): 'Om! Let the Seven Sages (Ṛṣis) sprinkle Thee O! Thou Goddess of the Gods, with this seventh jar filled with waters from all the sacred pools of the Holy places' ||7||

"After singing the Dhanāsī (Dhanā-śrī)-rāga, with drum accompaniment of 'victory,' pouring water from the jars filled with pure consecrated water, (the following words to be recited): 'Om! Let the Vasus sprinkle Thee with water from this eighth jar. I adore Thee! Goddess Durgā, with accessions of eight sacred and auspicious influences!' ||8||

[Ritual for the Worship of Durgā, as enjoined in the Kalikā-Purāṇa].

(1) 'The Five Sounds' (*pañca śabda*) is probably the same as the 'Five Great Sounds' (*Pañcamahā-śabda*) which an Imperial Sovereign is entitled to use as the Royal insignia of his office. According to a text cited in the *Prabandha cintāmaṇi* (Tawney's translation, p. 214), they represent five kinds of music emanating from metal, throat, drum, vinā, and bugle. The matter is discussed by Grouse (*Indian Antiquary*, Vol. V, p. 534), Pathak (*Ibid*, Vol. XII, p. 96) and recently in the *Journal of the Bombay Royal Asiatic Society* 1933.

The reading of the text suggests that words are to be preceded by singing of the rāgas. Very probably, what is intended is that the priest should sing the words of the eight invocations in the melodies prescribed for each, with the specified accompaniment in each case. The *Kālikā-purāṇa*, one of the minor *purāṇas*, is of uncertain date, but must belong to a period prior to the currency of the Durgā-pūjā as an established cult in Bengal about the tenth, or eleventh century, to which date this text may be approximately assigned.

The next important text is that attributed to king Nānyadeva who is supposed to be a prince of a later branch of the Rāṣṭra-kūta (Karnāṭa) dynasty and who, according to Jaysawal¹, reigned in Mithilā between 1097 and 1133 A.D. His capital was at Simarampur (modern Simraon) now lying within the border of Nepal. Professedly written as a commentary (*bhāṣya*) on Bharata's *Nāṭya-śāstra*, his work *Sarasvatī-hṛdayālamkāra*² is in a way an independent

Nānyadev

(1) *Journal of the Bihar and Orissa Research Society*, Vol. IX, pp. 200-310; Vol. X, pp. 31-46. Mr. R. C. Mazumdar in his article 'Nānya Deva of Mithila,' (*Indian Historical Quarterly*, Vol. VII, 1931, p. 679), discusses his date. Following Sylvain Lévi, Mazumdar accepts 1037 A. D. as the date of his accession, and suggests that Nānya Deva must have died before 1154 A. D. Manmohan Chakravartty in his 'History of Mithila during the Pre-Mughal Period' (*Journal, Asiatic Society of Bengal*, Vol. XI, 1915, pp. 407-433) discusses the position of general culture during the period. The other outstanding musical composition of the time is Jagaddhara's *Saṅgita-Sarvasva* and the chapters dealing with music in Jyotirīśvara's *Maithil Encyclopædia, Varṇa-ratnākara*.

(2) The work survives in a unique Ms. of 221 folios in the Collection of the Bhandarkar Oriental Institute, Poona, No. 111, 1869-70, catalogued under the title *Bharatabhāṣya*. It is an incomplete Ms. with the 16th and 17th chapters missing. Each chapter ends with a Colophon. The terminating Colophon runs as follows: "Iti mahā sāmāntādhipati dharmāvalauka Śrī-man-Nānyapati-viracite Sarasvatī-Hṛdayālamkāra Bharata-vārtike vācīkāmśo ṣaṣṭho kadhyāya samāptaḥ." We are indebted to Ramchandra Kavi who discovered the work and drew our attention to it. By the courtesy of the

treatise as he has introduced much new matters not touched by earlier authorities, the grāma and jāti rāgas being very fully treated. The treatise stands between the *Bṛhad-deśī* and *Saṅgīta-ratnākara*, the date of which are anticipated in this work. Nānyadeva derives most of his materials from Nārada, Yāṣṭika, Kaśyapa,¹ and Mataṅga, the last two of whom are profusely quoted as important authorities. He remarks: "How could people of lesser intelligence succeed in swimming across the ocean of melodies which such early exponents of rāgas as Mataṅga and others failed to cross,"² meaning thereby that it is impossible to describe the melodies exhaustively. Yet he devotes two long chapters (sixth and seventh) in describing the *lakṣaṇa* (structure), the *ālāpaka* (improvisation), and the *rūpaka* (notation) of numerous melodies current during his time. In each case, the definitions of Kaśyapa and Mataṅga are given followed by the notation for each melody. Following Mataṅga, he gives the various classifications of melodies (Appendix 6). He divides gītis under five instead of under the seven groups given by Mataṅga (Appendix 3). He uses the word root-rāgas (*mūla-rāga*) for the major melodies (*mukhyā*) which are so called "because of their extremely soothing qualities."³ He uses a new term called 'Svarākhya rāgas', i.e., melodies which take their names according to the notes (*svara*) e.g. the grāma rāgas such as Ṣaḍjī, Āṣabhī, Dhai-vatī, etc. A similar term used in Deśākhya rāgas, i.e., melodies which borrow their names from the country, province, or region of their origins.⁴ They are five in number, and, are classed as Upa-rāgas: Dākṣiṇātyā, Saurāṣṭrī, Gūrj-

Bhandarkar Institute the original Ms. was lent to the writer for the purpose of study.

(1) He quotes from two musical authorities of the same name of Kaśyapa, one of whom he describes as Bṛhat-Kaśyapa the Senior" (in describing the melody 'Gandharvamodana' at folio 111).

jarī, Vaṅgālī, and Saindavi.¹ Of various melodies described by their note structures and notations we come across some new names such as 'Stambha-patrikā' and 'Tumburu-priya'.² An interesting information is cited by the author as to the authorship of the well-known rāga known as 'Reva-gupta.' It is said that a person called Saṃgrāma Gupta was the creator of this melody.³ It is tempting to believe that he may have been a music expert associated with the Gupta dynasty. Nānyadeva devotes a small section of his work in indicating the presiding deity of the principal melodies. Some indications are also given as to the appropriate hours and seasons for the melodies.

The most elaborate and authoritative exposition of Indian musical theories and practices is furnished by the *magnum opus*, known as *Saṅgita-Ratnākara*, which we owe to Śāraṅgadeva, who is justly regarded as the greatest authority of the mediæval period. He lived in the first half of the 13th century (A.D. 1210-1247) and was associated with the Court of the Yādava dynasty of the Deccan which had its capital at Devagiri (Daulatabad) which was a centre of intellectual activity having contact with both the north-

ern and southern streams of art and culture. Śāraṅgadeva's work undoubtedly bears signs of this contact with the music of the Northern and as well as the Southern School. "It is possible," as Popely has suggested, "that he (Śāraṅgadeva) is endeavouring to give the common theory which underlies both systems." After considering the texts of Bharata, Dattila, Mataṅga, and Nārada, one can have no doubt that Śāraṅgadeva, gives an elaborate *résumé* of the general system of Indian music in theory and practice as had been developed in the centuries previous to the thirteenth. He gives detailed exposition of the *jātis*, and the *grāma-rāgas*, accompanied by actual notations. He devotes a large section of his chapter on melodies (*rāga-vivekādhyāya*) to the *deśī* melodies famous in ancient times (*prāk-prasiddha-deśī-rāgāḥ*). He gives an historical survey of *rāgas* according to Yāṣṭika and Mataṅga. He then gives a preliminary list of 8 *uparāgas* : Tilaka, Śaka, Takka-saindhava, Kokila, Pañcama, Revagupta, and Pañcama-śāḍava. Next he gives a general list of 20 *rāgas* namely: Bhāvanā-pañcama, Nāga-gāndhāra, Nāga-pañcama, Śrī-rāga, Naṭṭa, Vaṅgāla, Bhāsa, Madhyama-śāḍava, Raktahamṣa, Kollahāsa, Prasava, Bhairava-dhvani, Megha-rāga, Somarāga, Kāmōda, Ābhra-pañcama, Kandarpa-deśākhyā, Kakuba, Kaiśika, Naṭṭa-nārāyaṇa (Appendix 9).

We notice here several melodies of the *bhāṣā* class accepted as major *rāgas*. He then enumerates, on the authority of Yāṣṭika, fifteen melodies—which are asserted as generic *rāgas* from which the minor melodies *bhāṣās* (*rāgiṇīs*) are derived.¹ These are: Sauvīra, Kakubha, Takka, Pañcama, Bhinna-pañcama, Takka-Kaiśika, Hindolaka, Vhoṭṭa, Mālava-kaiśika, Gāndhāra-pañcama, Bhinna-śāḍja, Vesara-śāḍava, Mālava-pañcama,² Tāna, Pañcama-śāḍava.

The list of so-called major or generic *rāgas* improves on the list of the eight generic *rāgas* given by Mataṅga, by incorporating some melodies of the Bhinnaka and Sādhārīta

(1) "*Bhāṣāṇām Janakāḥ pañca-daśaite Yāṣṭikoditaḥ*," *Saṅgitaratnākara*, p. 152.

(2) "*Mālava pañcamāntaḥ*," probably stands for 'Mālava-pañcama'.

types. Then he proceeds to enumerate the different *bhāṣās* or derivative melodies affiliated to these *rāgas*. In the next section he describes the further subdivisions of the melodies into *rāgāṅgas*, *bhāṣāṅgas* and *kriyāṅgas* on the authority of Kaśyapa, son of Sodhala¹ and enumerates 34 melodies. "These 34 *rāgas* are said to have been famous in early times."² "Now," says Śāraṅgadeva, "I am proceeding to enumerate those which are famous in modern times."³ These are famous in modern times" "The aggregate numbers of these *rāgas* amount to 264," so says Śāraṅgadeva.⁴ Kallinātha, commenting on this list, explains Deśavāl as equivalent to Kedāragauḍa, and Tauruṣka as equivalent to Mālava-gauḍa.

But the most valuable information that this text conveys to us is as to the ancestry of several of the *rāgas*, whose names occur for the first time in the *Saṅgīta-makaranda* and which *rāgas* must have acquired those names some time before the last named text, say about the eighth century. The text of Śāraṅgadeva affords the only evidences as to the sources from which these well-known *rāgas* derive their character and existence.

Very instructive examples are offered as to the melody-bases from which some of the *rāgas* famous in later times, derive their character, though no clue is available as to their proper names. Thus, we are informed by Śāraṅgadeva for the first time, that the *rāga* Bhairava is derived from the archaic melody, Bhinna-ṣaḍja. "It has 'dha' for its tonic note, 'ma' for its finale, and it avoids the notes 'ṛi' and 'pa'; it is a melody of equivalent values for prayers."

After Śāraṅgadeva, the musical authority that claims our attention is Pārśvadeva. Born of Brahmin parents he was a convert to Jainism. He wrote a work entitled *Saṅgita-Samayasāra*,¹ devoted to music and dancing. Very probably he was a contemporary of Śāraṅgadeva, or lived shortly after him,² say, about the middle of the thirteenth century. Most probably he belonged to the group of musical authorities of Northern India, as he quotes Mātṛgupta king of Kashmir, king Bhoja Pāramāra of Malva, king Someśvara of the Cālukya dynasty of Anhilwara (Gujarat), and king Pramārdi of the Candela dynasty. Pārśvadeva, who calls himself as a 'Mine of music' (*Saṅgitākara*), devotes a short chapter of 75 verses to the rāgas. He does not state what are the major rāgas, and he principally deals with the minor melodies under the various sub-divisions of *rāgāṅgas*, *bhāṣāṅgas*, *upāṅgas* and *kriyāṅgas* which he defines as follows: '*Rāgāṅgas* are so-called by the learned as they imitate the appearances (shadows) of rāgas. Similarly *bhāṣāṅgas* are imitators of the visages (shadows) of *bhāṣās*. The *upāṅgas* are so-called by the learned by reason of imitating the visages of *āṅgas*.³

The author then proceeds to enumerate the *rāgāṅgas*, *bhāṣāṅgas*, *upāṅgas* and *kriyāṅga-rāgas* under the three

(1) Edited by T. Ganapati Sastri from a single Ms. and published in the Trivandrum Sanskrit Series, No. LXXXVII, 1925.

A second Ms. of this work is in the Madras Oriental Library, No. 13028.

(2) He is not mentioned by Śāraṅgadeva. He quotes King Bhoja, (1010-1055 A.D.), King Someśvara (C. 1330 A.D.) and King Paramārdi (C. 1165-1203 A.D.). He is quoted by Singha Bhūpāla (C. 1330 A.D.), he must therefore have lived some time between 1200 and 1300 A.D. V. Raghavan, who discusses his date ('Some names in early Saṅgita Literature,' *Journal Music Academy of Madras*, Vol. III, Nos. 1 and 2, 1932, at p. 30), suggests that his date falls between 1165 and 1330 A.D.

groups of sampūrna, śāḍava, and oḍava.

It is curious that Pārśvadeva does not mention which of the 101 melodies cited by him he considers as rāgas proper, or major melodies, except that the early major rāgas (e.g. Takka, Mālava, Pañcama etc.) are mentioned incidentally as the sources of the derivative melodies described by him. Out of his list, he gives the characteristics of 43 rāgas which he says are popular in practice.¹ (Appendix 10).

A typical example of his descriptions may be cited in the description of Varāṭi, "Varāṭikā is the vibhāṣā (i.e. rāginī) of Pañcama, the king of the melodies. It has 'dha' as its tonic note, 'sa' for its initial and final notes, 'dha' in the high scale and the madhyama in the soft tone. It is a fully toned melody applicable to sentiments of passion, according to Yāṣṭika".² It appears that at the time of Pārśvadeva, Pañcama occupied the place of honour among the melodies.

After the *Saṅgīta-samaya-sūtra*, one is inclined to place the work *Rāgārṇava* which we owe to an unknown author. The exact date of the upper limit cannot be definitely fixed, but the lower limit is furnished by *Śāraṅgadhara-paddhati*, an encyclopædia in Sanskrit, compiled in 1363 A.D. As the latter work derives all its musical materials from *Rāgārṇava*, it may be reasonably accepted that the last named work must have been composed at least about half a century before. The fact that Śāraṅgadhara borrows some of his materials from *Rāgārṇava*, seems to place this work in the position of the leading authority on music about the end of the thirteenth century, in Northern India.

Rāgārṇava

Its rāga-system deserves notice, and, compared with an analogous system referred to in the *Saṅgīta-makaranda*, indicates changes in the 'system' of the major-melodies. Confin-

ing itself to the system of thirty-six melodies, *Rāgārṇava*, accepts the following six as the generic melodies : Bhairava, Pañcama, Nāṭa, Mallāra, Gauḍa-Mālava, and Deśākha. The list is somewhat nearer to the one given in *Śaṅgīta-makaranda*,¹ with the peculiar difference that Megha, Śrī-rāga and Vasanta are replaced by Mallāra, Gauḍa-Mālava, and Deśākha as major melodies. The derivative rāgas ascribed to the major rāgas are, however, quite different from those given in the *Śaṅgīta-makaranda* as will appear from the scheme set out in Appendix 4. It should be noted that these derivative melodies are designated as *rāgas* and not yet as *rāgiṇīs*. The new names of derivative melodies offered are Sālaga (? Sālanka), Trigunā, Dhānī, Haripāla, and Dhorāṇi.

Subham-
kara:
Saṁgāna-
sāgara

To the beginning of the fourteenth century, belongs a very curious text called *Samgāna-Sāgara* which we owe to Śubhaṁkara, who lived in Nepal, during the reign of Mahārājā Bhūmalla Deva. The work survives in a very much mutilated palm-leaf Ms. written in Newāri character with Colophon which gives the date 428 Newāri samvat equivalent to 1308 A.D.² The author enumerates the eighteen *jātis*, and mentions and describes 34 rāgas. He seems to give the same system which we find elaborated in the *Śaṅgīta-ratnākara*. He mentions such rāgas as *Madhyamādi* and *Śaṅkarābharaṇa*.³ He also quotes the opinion of Someśvara. Owing to the mutilated condition of the Ms., it is not possible to obtain detailed information as to the state of the melodies prevalent at the time of the author.

Jyotirīś-
vara:
Varna-
ratnākara.

Belonging to the first quarter of the fourteenth century, there is an interesting document hailing from Mithilā which was, for several centuries, a seat of Hindu culture, particularly, of music and poetry. This work which is an encyclopædia in old Maithilī language, known as “Varna-

(1) *Śaṅgīta-makaranda* (G. O. S. m XVI), page 20, verse 74.

(2) Colophon: “Śroyastu sāmvat 428 Phālgun Kṛiṣṇa Kṛitipadyāyāntithou śanivāsare likhitamiti Mahārājādhi rāja-śrī-mat-Bhūmalladevasya vijaya-rājye Iti gitādhyāya samāptaḥ. Śubhaṁkara viracita saṁgāna-sāgara.” Ms. Asiatic Society of Bengal, Calcutta.

(3) “Śṛṅgāre prastute nityam madhyamādi-rihocyate”.....

“Chāyāntarīna kryate śaṅkarābharaṇsthā.” Ibid.

Ratnākara”¹ we owe to a learned scholar and connoisseur of music named Joytīrīśvara. He was a high official attached to the court of king Harisimha Deva of the Karṇāṭa dynasty, who ruled in Mithilā some time between 1300 and 1324 A.D., having his capital at Simraon. In the seventh section of this encyclopædia entitled *Bhaṭṭādi-varṇana* (folio 60b. ff.) there are references to poetry, music, and dancing. In this connection the qualification of a *Vidyāvanta* that is to say, a professional singer and music-master, a person now commonly known as *Kalāvanta* or *Kalāwāt* is described. This leads to an enumeration of the śrutis (semi-tones) and the rāgas. Unfortunately, the list is a mere string of names without any order and without any indication of the system of the rāgas, or principles of classification known at the time:

“Madhyamādi, Mālava-Kaiśaka, Mallāra Megha, Mālasī, Muddhaki, Malāri, Desākhī, Dīpaka, Desī, Devakiri (Devakriyā, Devagiri), Vasanta, Vangāla, Vegha-ravani, Valāra (? Bhallāra, Bhallārī) Varāṭi, Vicitra, Karkka, Toki-Kauha (? Takka-Kaiśika), Kāmōda, Karṇāṭa, Kambhuda (? Kambhātī),² Bhairava, Bhairavī, Paṭamañjarī, Trāna, Ganugara, Gunagari (Gunakriyā=Gunakali), Gāndhāra, Guñjari (? Gujjari), Gaula (? Gauḍa), Larita (? Lalita), Pañcama, Hindola, Vati, Rāmakari (Rāmakelī), Andhāri, Dhanacchi (Dhannāsī), Naṭa, Cokhasara (? Cokṣa), Khambhāvati, Śrī-Rāga, Sakabja (Sakañja), Savari (Sāverī), Saṃkarābharina ādi aneka rāgaka gāyan.”

As the last four words “and various other melodies are sung” indicate, the list is not exhaustive and merely enu-

(1) The work survives in a single palm-leaf Ms. in the Government Collection of the Asiatic Society of Bengal No. 48134, with a Colophon dated 388 of Lakṣmaṇsaṃvat corresponding to 1507 A.D. The Ms. is analysed and described by Prof. Suniti Kumar Chatterjee in the Proceedings and Transactions of the *Fourth Oriental Conference*, Vo. II, Allahabad, 1928, pp. 553-621, in an article entitled “The Varṇa-Ratnākara of Joytīrīśvara Kaviśekharācārya.” The general dynastic history and culture of Mithilā of this period is very ably described by Manmohan Chakravarti in an article published in the *Journal of the Asiatic Society of Bengal*, 1915, at pp. 407-433.

(2) Kambhātī, or Kambhātikā is described in “*Saṅgita-samaya-sūtra*” (T.S.S. No. LXXXVII, 1925) p. 21, verse 58.

merates the principal popular melodies current at the time.

The beginning of the fourteenth century marks the most significant stage in the development of Indian music. The differentiation in the classification of the *rāgas* had already marked a cleavage between the Northern and the Southern systems, two centuries before. But the new contact with Persian melodies in the fourteenth century further accentuated the differences, so that while the Southern system remained immune from the contact of Persian music, the Northern system received the new-comers with open arms, and absorbed and assimilated many new melodies imported from Persia, and incorporated them in the indigenous *rāga*-system, giving them their places in the classified lists, according to their structural affinities. Indeed, this was not the first time, that Western Asiatic melodies were adopted by Indian musicians. As we have seen, the Śaka *rāga* and the Turuṣka-Toḍī indicate that in earlier times, melodies from Chinese Turkestan had already established contacts with Indian music. The comparative era of peace established by the Khiliji dynasty afforded opportunities for cultural developments. And the new contacts with Persian music was an interesting phase of this cultural revival. The great pioneer of this contact was Hazarat 'Āmīr Khusrau, the great Persian poet, musician, and administrator who was associated with the reign of Sultan Alauddin Khiliji (1296-1315 A.D.). To 'Āmīr Khusrau, a liberal-minded connoisseur, we owe the first pioneer effort of foreigners to approach Indian culture and to understand and appreciate the principles of Indian music. The later royal patronage of the art under Akbar seems to be anticipated by this cultured poet and administrator. The part that 'Āmīr Khusrau took in developing the growth of the Indian melodies is indeed valuable. By a judicious combination of Persian airs (*muqqams*) and Indian *rāgas*, 'Āmīr Khusrau introduced many derivative melodies, hitherto unknown to the Indian *rāga*-system. Having acquired sufficient proficiency in Indian musical science, 'Āmīr Khusrau made very interesting innovations by producing a number of mixed melodies (*saṅkīrṇa rāgas*), in which Indian *rāgas* were crossed with Persian airs.

In the life of 'Āmīr Khusrau by *Shibli*, known as *Shir-u'l-'Ajam* (Lit. 'verses from Persia'), a chapter is devoted

ed to Music, from which we have a list of the hybrid melodies invented by the Persian exponent under the Indian rāga-system. We quote below a free English translation of the chapter:¹ “Music: ’Āmīr’s versatile genius turned to this delicate and fine art too, and raised it to such a degree of excellence that he has remained unrivalled during the long period of six hundred years. Naik Gopal who was acknowledged as a master all over India was the famous world-renowned *ustād* (master) of his time. He had twelve hundred disciples who used to carry his *Simhāsan* that is, throne, upon their shoulders, like palanquin-bearers. The fame of his perfection and consummate skill (in music) reached the ears of Sultan (Alauddin Khiliji, who called him to his *durbār* (court). ’Āmīr Khusrau made the submission (to His Majesty) that he would conceal himself under the throne, and that Naik Gopal be commanded to sing. Naik displayed his perfect skill in six different assemblies. On the seventh occasion ’Āmīr, too, came to the *durbār*, along with his disciples. Gopal too had heard of his fame, and asked him to sing. Āmīr said ‘I am a Moghul. I have just a smattering knowledge of Hindustāni songs. You please let us hear something first, and then I, too shall sing a little.’ Gopal commenced to sing. ’Āmīr said, ‘I set this *rāga* (melody) long ago, and then he rendered it himself. Gopal commenced another *rāga*, Āmīr rendered that too, and said that he had rendered it long ago. In short, ’Āmīr continued to prove every *rāg rāginī*, and *sur*, (tune, scale) rendered by Gopal to be his own invention. In the end he (Khusrau) said: “These were all hackneyed, vulgar (*am bazāri*) rāgas. Now I shall let you hear my own special inventions.’ Then he started singing and Gopal became mute with astonishment.”

As Āmīr Khusrau was conversant with Persian *rāgas* along with Hindu ones, he compounded the two music, and created a new world, or chapter of musical practice. Thus the rāgas invented by him are as follows:

(1) We are indebted for this translation to Mr. A. Alim, one of the translators of High Court, Calcutta.

MAJIR	Ghar and one Persian rāg.
SAZAGARI	Pūrvi, Gorā, Kānglī and one Persian rāg.
IMAN	Hindol and Nairez.
USHA-SHAQ	Sārang, and Basant and Nawa.
MUWAFIQ	Tori, and Mālvi, and Dogah and Hosainī.
GHANAM	A slight modification of Pūrvi.
ZILF	Shāhnāz mixed with Khat rāg.
FARGHANA	Ferghana mixed with Kānglī and Gorā.
SARPARDĀ	Sārang, Patawal and Rast compounded together.
BAKHARĀR	One Persian rāg mixed with Deskār.
PHIRDOST	Kānrhā, Gauḍi, Pūrvi, and one Persian rāg.
MANAM	One Persian rāg added to Kalyān.

"It is mentioned in the *Rāga-Darpana* that out of these rāgas, he has shown the perfection of music in Sazgari, Bakharār Ushashaq, and Muwafiq. In the remaining rāgas he has made some alterations and given them new names: Qawl, Tarana, Khyal, Naqsh, Nigar, Baseat, Talana, Suhla—all these, as well, are 'Āmīr Khusrāu's inventions. Some of these are specially his own inventions. The names of some others existed previously in Hindu music. 'Āmīr made some modifications in them and changed their names." (*Shir-u'l'-Ajam*, by Shibli, p. 135).

The invention or adoption of new melodies and affiliation thereof to Indian rāga-system was no new innovation in the 14th century. As we have seen, the process has been going on throughout the long career of the development of music.

Śaka and Pulinda rāgas were apparently non-aryan melodies accepted by the Hindu musicians in early times. Turuṣka-Toḍī a new version of Toḍī was apparently composed in contact with some airs from Turkestan. The power of receiving new-comers and assimilating them in the forms of rāgas, bespeaks the strong vitality and living quality of the growth and development of Indian music. This interesting contact of Indian rāgas with Persian melodies at the time

RĀGINĪ SHĀVIRĪ

of 'Āmīr Khusrau has been somewhat misinterpreted as a record of the dominating influence of Persian music on Indian music. Indeed, Indian music quite held its own against the tide of Persian culture, and by adopting new rāgas tinged with Persian airs, did not sacrifice one iota of the principles of its rāga-composition, or the basic foundations of Indian musical science. The sympathetic interest and patronage that was extended to Indian music under the influence of such an able connoisseur, lent an impetus to the indigenous art which had no parallel, before the age of the Moghuls.

The rāgas current in the North about the middle of the fourteenth century, can be gleaned from the well-known Sanskrit anthology, already referred to, *Śāraṅgadhara-paddhati*. It was composed in the year 1363 A.D. In chapter 81, under the heading 'gāndharva śāstram' (verses 1942-2081), the author summarises the current musical data¹: He gives a list of 36 generic (*pravartaka*) rāgas, on the basis of the *Rāgārṇava*.¹ We have already cited these rāgas, (*ante* p. 19). After reciting the 36 rāgas, the author states that there are various melodies prevailing in particular localities or areas such as Mārū etc. which are regarded as local melodies. So that the enumeration of Śāraṅgadhara is not at all exhaustive. In fact he says that 'there is no end of 'rāgas' or 'tālas', they are to be sung by the learned for the pleasure of Śiva.'²

Śāraṅga-
dhara-
paddhati:

It would be convenient to notice here the text of *Rāgatarāṅgiṇī* by Locana Kavi, of uncertain date.³ The author

Locana
Kavi's
Rāgata-
raṅgiṇī:

(1) *Atha śaṭ-triṃśat-pravartaka-rāgā ucyante:*

2052: "Bhairavaḥ, pañcamo nāṭo mallāro gauda-mālavaḥ|
Deśākhaśceti śaḍrāgāḥ procyante loka-viśrutaḥ"|| 111

(1) 2054: "Matā rāgārṇave rāgāḥ pañcaite
pañcamāśrayāḥ"|| 113

(2) 2059: "Anye ca bahavo rāgā jātā deśa-viśeṣataḥ|
Mārū prabhṛitayo loke te ca taddeśikāḥ smṛtāḥ"|| 118

2060: "Na rāgāṇaṁ na tālānāṁ antaḥ kutrāpi vidyate|
Samtoṣāya śivasyaite geyā vudha-janaiḥ sadā"|| 119

(3) Edition of D. K. Joshi, printed at Arya Bhusana Press, Poona City, 1918.

According to the date given in the colophon, Locana Paṇḍita's *Rāgatarāṅgiṇī* comes in order of chronological sequence before the

asserts that the ancient masters of the melodies sang twelve melodies on which all the other melodies are based.¹ He enumerates the following twelve melodies as the basic *rāgas*:—Bhairavī, Ṭoḍī, Gaurī, Karṇāṭa, Kedāra, Iman, Sāraṅga, Megha-rāga, Dhanāśrī, Pūravī, Mukhārī and Dīpaka. The author describes these 12 melodies with their characteristics.

On the authority of this text it may be asserted that by this time, the Pañcama melody had been dethroned, and that at this time the Megharāga was now on the throne, occupying the place of honour amongst the melodies. Curiously, the Dīpaka rāga is not described and it is euphemistically suggested that the structure of this melody should be settled by an assembly of musicians which suggests that Dīpaka had lost its place in current practice.² The author gives a list of derivative melodies (*janya rāgas*) which are said to be

Saṅgīta-Ratnākara, but the reference to the new Indo-Persian melody of the name of Phirodast which is supposed to have been invented by Āmīr Khusrau, makes it incumbent on students to push the date of *Rāga-taraṅgiṇī* to a period after Āmīr Khusrau (c. 1375-1400). The colophon runs as follows:

*Bhuja-vasu-daśamita-śāke śrīmad-vallāla-sena-rājyādau
Varṣaika-ṣaṣṭi-bhoge munayastvāsan viśākhāyām.*

This chronogram yields the date of 1082 *śeka* (i.e. 1160 A.D.). But if the poet Vidyāpati referred to in the work is the great Maithili poet (1395-1440 A.D.) of the same name, patronized by Śiva-Siṃha, then *Rāga-taraṅgiṇī* cannot be earlier than the fifteenth century.

The melody Phirodast is referred to in the following passage:—

*Dhanāśrīḥ Kānarāyogāt
vāgīśvaryaḥya-rāgiṇī|*

*Phirodastastu pūravi-gaurī śyāmābhireva ca||
Varāḍi-vaṅga-pālābhyām vibhāsa-milanā api|
Aḍānā-rāgiṇī proktā, phirodastāt dhanena ca||*

Rāga-taraṅgiṇī, p. 9.

- (1) *Tāstu saṁsthitayah prācyo rāgāṇām dvādaśa smṛtāḥ|
Yābhi-rāgāḥ pragīyante prācinā rāga-pāragaiḥ||
Eteṣām eva saṁsthāne sarve rāgā vyavasthitāḥ||*

Rāga-taraṅgiṇī, p. 3.

- (2) *Dīpakah sarvair militvā dīpako'pi lekhyah.||*

Rāga-taraṅgiṇī, p. 6.

founded on each of the twelve major melodies cited by him. The list set out in Appendix 16 indeed is very curious and does not give any clue to the principle of the system. In this list, we come across, for the first time, many new *rāgiṇīs*, which became very common in the Northern system *e.g.* *Khamāici*. Probably, *Khamāici* is the well-known melody familiar to us under the name of *Kammāj* (*Khamvāj*), and which is distinguished from '*Khamvāvati*' which is ascribed to the group of *Karṇāṭa*.

A short but important treatise, bearing on the iconography of *rāgas*, *Pañcama-sārasaṃhitā* (sometimes called *Pañcama-Saṃhitā*) composed by an author called *Nārada* deserves notice. It survives in two Mss., one¹ in the collection of the *Baṅgīya Sāhitya Pariṣad* (the copy bearing a date 1700 Śaka=1778 A.D.). The second Ms. belongs to the Asiatic Society of Bengal² with a Colophon dated 1440 A.D. (1362 Śaka). It is the most important document for the history of the Northern *rāga*-system. It must have existed in earlier recensions, and appears to have undergone changes and modifications by later hands. In its chapter on *Rāgas*, it suggests that the melodies treated by the author have been current in the region to the north of the *Vindhyā* mountains and its immediate vicinities, including the region of *Cutch*

Pañcama-sāra-saṃhitā by *Nārada*:

(1) Ms. No. 716 in the collection of Sanskrit Mss. in the *Baṅgīya Sāhitya Pariṣad*, Calcutta entitled: '*Nārada-kṛta Pañcama-sāra-saṃhitā*':

"Meroruttarataḥ pūrvve paścime dakṣiṇe tathā|

Samudra-Kacchape ye deśāḥ tatrāmīṣāṃ pracāraṇā|

Likhitam śrī Vaiṣṇava Vairāgi| Sakābda 1700."

(2) Ms. No. 5040, in the collection of the Asiatic Society of Bengal. The colophon runs as follows: "*Iti Nārada-kṛta Pañcama saṃhitāyāṃ rāga-nirṇayo nāma tṛtiyo 'dhyāyāḥ|| Yuga-tṛṣaṭ-candramite śāke notha (?) prayatnataḥ sangita-mālā bahubhī rātrau vārau raver api|| Śrī Hariḥ|| Śrī Curave namaḥ"*|| This chronogram yields two alternative dates: 1632 or 1932.

bordering on the sea. Its rāga-system consists of the six rāgas: Mālava, Mallāra, Śrī-rāga, Vasanta, Hindola and Karnāṭa. This seems to point to an early time, as in this list, Mālava rāga is described as the 'King of the Melodies'¹ and Bhairava which came to occupy the throne, later, has no place in this group, the rāgiṇī Bhairavī being assigned to Mālava-rāga. The six rāgiṇīs attributed to each of the rāgas, according to this system is set out in Appendix 13. The names of some of the rāgiṇīs are curious, and seem to indicate later interpolations. The list includes Pūravī, Koṭā, Gadā, and Mārhaṭī. The late form of the last-named rāgiṇī militates against the suggestion of an early date for this work. At the same time, the inclusion of some early rāgiṇīs e.g. Māyurī, and Dīpikā suggests an early date. It is quite possible that the system was confined to a particular region, and its earlier system had undergone modifications, from time to time, by the affiliation of later melodies. But the most important feature of the work is the citation of contemplative verses for the *dhyāna* formula of the melodies giving the iconographic pictures of the six rāgas and thirty-six rāgiṇīs belonging to the system. The citations of these prayer-formulas are preceded by a significant assertion that 'the beautiful images of the six rāgas and the thirty-six rāgiṇīs have emanated from the 'Abode of Brahmā,' the Supreme Being, and they love to offer their prayer to the same Supreme Deity'.² The descriptive verses visualizing the melodies, cited in this work, have been frequently quoted by later text-writers from this work, and the work and its author are referred to by names.

1-
ia by
dās:

It is well-known that the advent of Chaitanya, the great Vaiṣṇavaite preacher (1486-1533 A.D.), flooded Bengal with torrents of devotional songs and music. But it is seldom recognized that the age preceding this new religious wave was rich in mystic Vaiṣṇavaite lyrics and songs, of which the central figure was the great poet Caṇḍidās (c. 1400 A.D.),

Asiatic Society of Bengal Ms., Folio 2.

the Chaucer of Bengali literature. His early poems “Kṛṣṇa Kīrtana” (‘songs of Kṛṣṇa’), of which more than one early Mss. have now come to light, is a collection of songs, which were set to music and musical accompaniments. In two old Mss. (one of them dated 1237 sāl=1830 A.D.) recently discovered in the collection of the University of Calcutta.¹ Scholars have agreed to date this work in the second half of the fifteenth century.² In these lyrical composition by Caṇḍī-dās, each song is set to a rāga (melody) and tāla (time-measure) and the name of the melody and of the time-measure³ in which each song is to be sung are indicated at the top of each. The names of these rāgas are very interesting, as they introduce to us many new names not previously known Vāgaśrī, Rāgiṇī Maṅgala, Rāgiṇī Dīpanāśrī, Rāgiṇī Pāhiḍā, Rāga Vasanta, Rāga Vādārī, Rāg Śui (? Yui), Rāgiṇī Dhānāśī, Rāgiṇī Rāmagirī (? Rām-Kirī=Rāmakelī). The most surprising name in the list is the melody named ‘Śui’ and ‘Dhīpanāśī’, which has not, so far, been cited in any of the texts. It is quite possible that they were local Bengali melodies adopted in the pantheon of the rāgas.⁴

To about the middle of the fifteenth century belongs an important musical text by a royal author, recently brought to

Saṅgītarāja
by Rānā-

(1) These Mss. are described by Manindra Mohan Basu in the *Sāhitya Pariṣad Patrikā* (Bengali) Vol. 39, No. 3, 1339, pp. 176-194, in an article: “Śrī Kṛṣṇa Kīrtaner Navāviṣkṛta Puthi.”

(2) On philological data, Prof. Radha Govinda Basak and Prof. Suniti Kumar Chatterjee have assigned “Śrī-Kṛṣṇa-Kīrtan” to the second half of the fifteenth century, *vide* “Comments on the Ms.” by Prof. S. K. Chatterjee, *Ibid*, p. 198.

(3) The authority for the tālas used is borrowed from 18 tālas described in the text of Nārada from which a quotation is cited in the manuscript. Unfortunately, the authority for the rāgas indicated is not cited.

(4) Harekrisna Mookerjee in a paper published in the *Sāhitya Pariṣad Patrikā*, vol. 38, 2nd part, has conjectured that the songs of the *Kṛṣṇa Kīrtana* were originally sung in popular folk-melodies known as “jhumur” which never attained the dignity of classical music, or were used for devotional songs.

light. It is the *Saṅgīta-rāga'* composed by Rāṇā Kumbha-karna of Mewar (c. 1419-1460 A.D.). It is an important contribution to Indian music. The author extends a graceful invitation to those interested in music to listen to him, i.e. to study his work. 'If you have curiosity in songs, if you have skill in music, then listen, oh! connoisseurs and learned men! to Kumbha-karna' ("Yadi kautikino gāne saṅgīte cāturi yadi rasika Kuṁbha-karṇasya śṛṇvantu budha-sattamaḥ" quoted in *Rasika-priyā*). In the preliminary sections, he gives the mythical history of music and then proceeds to provide definitions of the various technical terms. The author does not cite any other ancient authorities save and except Yāṣṭika, 'according to whom the bhāṣā gītis are thirty in number.'² His definition of rāga is a revised paraphrase of those of older authorities: 'A pleasant composition of notes, (initiative notes and others), distinguished by descents, ascents, and movements, and also by decorative graces, is called a rāga'.³ A distinction between 'gīta' and 'rāga' appears to be indicated. All gītas (songs) are not rāgas, but only those which have the ten characteristics

(1) We owe the discovery of this work to V. Raghavan. The work is extensively quoted by the author himself in his commentary on '*Gīto-Govinda*, called *Rasika-priyā*, published by the Nirnaysagar Press, Bombay, 1913, under the editorship of Telang and Pansikar. The work survives in a single Ms. in the collection of the Bhandarkar Oriental Research Institute, Poona, No. 365, 1879-80. Unfortunately, the Ms. is a fragment and contains the introductory portions and definitions, but the portions bearing on the rāgas are missing in the Ms. The data on rāgas have, therefore, been cited, here, from the fragmentary extracts quoted by the author in his *Rasika-priyā*. In the Poona Ms. the work is also described as *Pāḍya-ratna-kośa*. Each section has a colophon which runs as follows: "Iti śrī rājādhirāja śrī Kuṁbha-karṇa viracite saṅgīta-rāje pāḍya-ratna-kośe parikṣaṇaṁ nāma dvitīyaṁ samāptaṁ."

(2) "Bhāṣādhyā gītaya-stiśro Yāṣṭiken-orari-kr̥tāḥ |
Tatra bhāṣā samākhyātā
mukhyān anyopajivini || 38 | Saṅgīta-rāja

(3) "Vicitra-varṇāṁkāro viśeṣo yo dhvanir iha (?) |
Grahādi svāra-sandarbhō rañjako rāga ucyate" || 34 || Ibid.

(*Nāṭya-śāstra* ch. 26, verse 16-46).⁷

In the available fragments of the work, no principle of classification of the rāgas is indicated. The author, however, cites two different lists, or catalogues of important rāgas, eighteen, according to one view, and, seventeen, according to another. The lists are as follows:

A. (1) Madhyamādi, (2) Lalita, (3) Vasanta, (4) Gur-jarī, (5) Dhanāśī, (6) Bhairava, (7) Gaunḍa-Kṛti, (8) Deśā-kṣikā, (9) Mālava-śrī, (10) Kedāra, (11) Mālavī, (12) Ādi-Gauḍaka (?) (Ādi-Gauḍa), (13) Sthāna-Gauḍa (Gauḍa), (14) Śrī-rāga, (15) Mahlāra, (16) Varāṭikā, (17) Megha-rāga, (18) Dhorāṇa.

B. (1) Naṭṭa, (2) Kedāra, (3) Śrī-rāga, (4) Sthāna-Gauḍaka, (5) Dhorāṇi, (6) Mālavī, (7) Varāṭī, (8) Megha-rāga, (9) Mālava-śrī, (10) Deva-śākha, (11) Gaunḍa-kṛt (12) Bhairavī, (13) Dhannāsikā, (14) Vasanta, (15) Gur-jarī, (16) Mahlāra, (17) Lalita.

Of the citations of rāgas, given in short sections (*pra-bandhas*), two typical examples are quoted below.² The

(1) "Prabandho rūpakam vastu nibanddham gītam-ucyate|
Nibaddhāvayava dhātur-dharādhiśasya sammataḥ" || 57 ||
Ibid.

"Rāgo 'bhidhiyate gīta daśa-lakṣaṇa lakṣitaḥ"|
Lakṣaṇāni ca tatrāmśa-nyāsau śāḍava mau puna (?) || 55 ||
Ibid.

(2) "Tathā ca saṅgīta-rāje| Mālavīyāḥ smṛto gauḍo
rāgastālo'dda-tālakaḥ|
Śṛṅgāro vipralambhākhyo raso devādi-varṇamam|
Pada santatitas-tenāḥ pāḥḥ svara-samuccayah||
Tataḥ padyāni yatra syur-laya-madhya-mānataḥ||
Sa prabandha-varo jñeyo dhanya-vaikuṇṭha-kuṅkumaḥ||
Iti dhanya-vaikuṇṭha-kuṅkuma-nāma- dvādaśaḥ praban-
dhaḥ||" Sangīta-rāja.

According to this authority, Mālava-gauḍa rāga is appropriate in anecdotes of 'love in separation,' and for descriptions of gods.

"Tathā ca saṅgīta-rāje| Rāgaḥ syāt Sthāna-
gauḍākhyas-tālo varṇayati rasaḥ|
Śṛṅgāro vipralambhākhyah pramadā madanākulā||
Pakṣanāmāvaleḥ pāḥḥ-gumphitā yatra 'gītake|
Snigdha Madhu-Sūdano'yam rāsa-valaya-nāmakaḥ||

author does not describe their structures, but indicate their *rasa*-values, or emotional flavours, that is to say, their significance in arousing particular flavours of emotion. As will appear from the examples of the sections quoted, that very picturesque names are given to each section.

But the most important contribution of Rāṇā-Kuṁbha—is the view which appears to be propounded in this work, namely, that each *rāga* has its appropriate time-measure (*tāla*) which brings out the genius of the *rāga* in its characteristic qualities.¹ As the author seems to suggest that it is the time-measure which gives the true interpretation of a *rāga* (“*tālo varṇayati rāsaḥ*”), it is the time-measure which reveals its real flavour (“*tālo varṇayati rasaḥ*”). It does not follow that a *rāga* can only be interpreted in a fixed time-measure, but what is intended to be suggested is that particular *rāgas* receive the happiest interpretation and expression in particular time-measures.

A very interesting text called *Rāga-mālā*,² available in

Prabandhaḥ pṛthivi-bhartā prabaddha prīṭaye Hareḥ||

Iti snigdha-Madhu-sūdana-rāsa-valaya-nāmā pravandhas-trayodaśaḥ|| *Sangīta-rāja.*

According to this authority, songs which are set to the ‘Sthāna-gauḍa’ *rāga* make the lady-lovers in separation, stricken with the shafts of Cupid.

- (1) “*Yatra syāt-Gurjari-rāgas-tālo jhampeti bhāgaśaḥ*”
 “*Śrī rāgo yatra-rāgaḥ syāt tālastu druta-manīhakaḥ*”

Sangīta-rāja.

(2) Asiatic Society of Bengal, Ms. No. 1195 (211) Govt. Collection. The colophon which gives the date of the copy of the Ms., not of its composition, is as follows: “*Iti śrī-rāga-mālā samāptā|| Samvat 1833|| Subham bhūyāt|| Grantha saṅkhyā śloka 275||* The first few ślokas seem to contain a reference to the king in whose reign it was composed:

“Manuja-danuja-devairvanditaṁ mama-devaṁ dhṛta-śaśi-dhara-mauliḥ kṣemakarṇaṁ praṇamy|

Apahata muru-daityaṁ sundaraṁ rāga-mālāṁ racayati sukha sidhyai Jaṭivā bhūpateśaḥ”||

It is difficult to identify the king referred to under the name of “Jaṭivā bhupateśaḥ.”

Three verses about the end of the manuscript furnish (folio 13)

two manuscripts, one with a colophon dated Samvat 1431 (1509 A.D.), deserves to be noted here. It comes from Rewa and is the work of Kṣema Karṇa (Meṣa Karṇa) son of Maheś Pāṭhak, the family priest of a chief named Jātalendra, reigning in the Fort of Rewa. This work follows a scheme of classification on the basis of six major rāgas,¹ viz. Bhairava,

further informations relating to the author of the work and the prince who patronized him.

The verses seem to describe the fort of Rewa at the foot of which the city lay washed by a river. There ruled a line of chiefs of whom three names are given in succession viz. Surava, Virajit, and Jātalendra (=Jaṭivā), the last of whom was the patron of the author who was, in fact, the priest of the royal patron. The author's name, twice stated as Meṣa-Karṇa, probably the dignified form of the vulgarised Khem Karan, a name very common in the North and Rajputana.

A Ms. copy of this work (No. 1125-15165) with a similar colophon is in the India Office (Eggeling: *Catalogue*, p.). The name of the author is given as Kṣemakarṇa Pāṭhaka.

The Colophon runs as follows: "*Iti Maheśa-Pāṭhakātmaja-śrī-Kṣema - karṇa - Pāṭhaka - Jātiava - bhūpatisukhārtha-viracitā Rāga-mālā samāptā śubhamastu Śrī-mad-Akbara-rājye samvat 1867 jaiṣṭha vadi 8 vāra Bhṛgu-vāsare li(khitam) śiva-vālaka Brahmanamidam pustakam samāptam*||

As pointed out by Eggeling, 'The copyist's allusion to Akbar (1556-1605 A.D.) seems to have come either from the author's own Ms. or from an early copy'. As a matter of fact that Asiatic Society Ms. proves that the work is earlier than Akbar.

The name of the work is called Rāgamālā, but the author also seems to suggest that it is not an original work, and that probably its materials are derived from an earlier work called Saṅgita-ratnākara (*Iti Saṅgita-ratnākara-sāroddhāraḥ*, folio 13, line 9). This must be a treatise quite different from the famous work of Śaraṅgadeva.

A work called *Rāgamālā*, attributed to Kshem Karana and said to be dated 1570 A.D. is referred to by Fox Strangways (*The Music of Hindustan*, p. 105).

- (1) "*Rāgādaḥ bhairavākhyastadanu nigadito mālakaṣīr-dvitiyo*||
Hindolo dipaka śrīriha vivudha-janair-amudākhyah
krameṇa||

Mālava-Kauśika, Hindola, Dipaka, Śrī and Megha (Aṃvuda), each having five wives and eight sons, set out in Appendix 15. The list offers many new names of rāgiṇīs, and melodies with similar names are differentiated and separately described. Thus Velāvalī and Velāval are treated as two different melodies, which are justified by different descriptive verses and also by distinct pictorial conceptions. Similarly Vaṅgāl, and Vaṅgālī are sought to be distinguished as two different melodies. Illustrative pictures corresponding to them may be taken to be represented by Plates VIII, IX & X.

Mān-
kutūhala:

The next stage in the development of the rāgas is represented by the contributions made by Rājā Mān Siṃha Tomar of Gwalior (not to be confused with Rājā Mānsingh of Amber). Rājā Mān, who succeeded Kalyāṇa Malla in 1486, died in 1517 A.D. According to Cunningham,¹ Rājā Mān was a "proficient composer, as well as a munificent patron, and many of his compositions still survive to justify the esteem in which they are held by his contemporaries. He was specially fond of the *saṅkīrṇa rāgas*, or mixed modes of which no less than four specimens are named after his favourite Gujarī (Guzerati) queen, *Mṛga-nenā* (*Mṛga-nayanā*), or the "fawn-eyed." These are *Gujari*, *Bahul-Gujari*, *Māl-Gujari*, and *Maṅgal Gujarī*." Gunningham thinks that the lady had a hand in their composition. Rājā Mān's love of mixed rāgas is particularly noteworthy. Rājā Mān's valuable contribution to Indian music is represented by a Hindi treatise known as "Mān-Kutūhala" (Curiosities of Mān).² It is said to contain the records of the proceedings of a great conference of musical experts assembled under the order of the Rājā. This seems to be corroborated by Abdul Fazl (Gladwin, *Āīn-i-Akbarī*, p. 730) who states that three

Ekaikasyāṣṭa-putrāḥ sulalita-nayanāḥ pañca-bhāryyāḥ

prasiddhāḥ

*Sve sve kāle śadete nījakula-sahitāḥ sampadam vodiṣan-

(2) A Ms. of this work is in the possession of H. H. the Nawab Saheb of Rampur.

of Rājā Mān's musicians, Naik, Mukshoo, and Bhanau formed a collection of songs suited to the tastes of every class of people." According to Sir W. Ouseley (*Anecdotes of Indian Music*)¹ Rājā Mān Siṃha's work was translated into Persian by Fakur Ullah. Three of these masters patronized by Rājā Mān, viz. Bikshoo, Dhondie and Charjoo, contributed a new type of Mallāra, to the stock of Indian melodies, called after them, "Mukshoo-ki-mallār," "Dhondia Mallār," and "Charjoo-ki-mallār." Bukshoo's name is also associated with a new variety of Velāval, and the melody 'Bāhādurī-Ṭoḍī.' These artists subsequently passed into the service of Sultan Bāhādur of Gujerat.

Before we proceed to consider the development of the rāgas during the sixteenth century in the North, it is necessary to notice the changes and development in the old Indian system as preserved in Southern practices and theories. After Śāraṅga-deva (c. 1210-1247), the great landmark in the South is provided by a short but an eminently scientific treatise entitled *Svara-mela-kalānidhī*,¹ the composition of which we owe to Rāmāmātya (1550), said to be a minister (amātya) of the Vijayanagara prince, Rāma-rāja, and a descendent of the famous commentator Kallinātha.

Rāmā-
mātya's
Svaramela-
kalānidhī:

The most important contribution of Rāmāmātya was in the formulation of a scientific principle of classification of the rāgas, on the basis of the common elements of their characteristic note structures. This was certainly a great improvement on the system of classification recorded in *Saṅgīta-ratnākara*, which Mr. Aiyar characterises as nothing more than a mere catalogue. Śāraṅgadeva's classification, though not exactly an enumeration of a catalogue, was more an historical presentation of the older and current systems of classification, rather than an attempt to classify the melodies on a new system on any empirical basis. Following the

(1) Reprinted in Captain N. A. Williard's *A Treatise on the Music of Hindustan*, 1882, p. 167.

(2) This text is available in two editions, one published with a commentary in *Maharatti* by *Bharadvāja Sarma* (Pandit V. N. Bhat-khande) san 1910, and the other published by the Annamalai University (1932) and edited with an excellent critical introduction and translation by M. S. Ramaswami Aiyar.

precedent of Yāṣṭika, whom he cites, he merely enumerates the fifteen major melodies, but he also indicates that these fifteen melodies are the father (*janaka*), that is to say, the genus of the minor melodies (*bhāṣās*).¹ This old *janya-janaka* system (corresponding to the *rāga-rāgiṇī-putra* system of the North) is replaced by Rāmāmātya by an independent analysis of the melodies and by a scientific classification based on a study of the common elements of the note compositions of the different varieties of melodies, unified (*mela*) by a recognition of their basic structural unity of the groups tabulated under a common *genus*. As Mr. Aiyar concedes, "doubtless the germ of the idea of the *genus-species* system may be found long before Rāmāmātya." But "he was the first to introduce a chapter on *mela* called *Mela-prakaraṇa*." In this chapter, he enumerates, the *melakas* (unifiers) and then explains their characteristics. As Pandit Bhatkhande has pointed out, the *mela* corresponds to what is called in the North, the *ṭhāt*, (the array or moulds of particular types under which a group of minor melodies can be classified on the basis of their unity). Following an older precedent, Rāmāmātya takes the Mukhārī *mela*, as the *śuddha* scale and gives it the place of precedence.² "Of all the *melas* Mukhārī is the first. Other *melas* are as follows: Mālava-gaula, Śrī-rāga, Śāraṅga-nāṭa, Hindola, Śuddha-rāma-kriyā, Deśākṣī, Kannaḍa-gaula, Śuddha-nāṭa, Ahirī, Nāda-rāma-kriyā, Śuddha-varālī, Rīti-gaula, Vasanta-Bhairavī Kedāra-Gauḍa, Hejūjī, Sāma-varālī, Reva-gupta, Sāmanta, Kāmbhojī. Thus there are twenty *melas*." (Appendix 17).

Tān Sen

With the advent of Akbar (1542-1605), the most enthusiastic patron of Indian culture in all its branches, North Indian music approaches the most glorious period of its his-

(1) "Bhāṣānām janakāḥ pañca-daśaite Yāṣṭikoditāḥ" | 20 | *Saṅgita-ratnākara*, Vol. I, p. 152.

(2) Although he accepts Mukhārī, as the Śuddha scale, following the older practice, he was inclined to take Mālava-gaula as his model for the Śuddha scale: "Rāgo Mālava-gaulaśca**rāgāṇāmuttamottamaḥ" (Svara-mela-kalānidhi, p. xxxi). As Mr. Aiyar remarks: "Evidently he did not come to deduce his twenty *melas* from any kind of principles but perhaps recorded such of the *melas* as were in vogue during his time."

tory. At the head of the new development under Akbar was the famous singer Miyān Tān Sen, who was a close associate of Sūr Dās, the great poet-saint, and who received his musical education at Gwalior under the discipleship of a great musician Rām Dās Svāmī. It is generally believed in conservative musical circles, that Tān Sen was principally responsible for abjuring many old traditions and for introducing innovations and questionable novelties which lead to the deterioration of the old Hindu system. "He is said to have falsified the *rāgas* and it is stated that two, Hindola and Megha, of the original six have disappeared since his time."¹ There is no doubt that Tān Sen introduced new *rāgas* and new versions, or unconventional variations of old forms. It is well-known that Tān Sen was the first to introduce the E-Flat (*Komala gāndhāra*) and both varieties of Niṣāda (B flat and sharp) into the *rāga mallār* which came to be known as "Miyān-ki-mallār." Similarly, he is the inventor of a new type of *Ṭoḍī* known as *Miyān-ki-Ṭoḍī*. The modified forms of Kānarā known as Darbārī Kānarā are attributed to him. Nevertheless, our innovator was not tardy in paying his respects to the *rāgas* of hoary antiquity. In a Hindi treatise on music, called *Rāg-mālā*,² he accepts the six *rāgas* (*ṣaṭ-rāg*) enumerated by the school of Hanumān and analyses them into their component parts. He claims to have examined the schools (*mats*) of Śiva, Bharata, and Hanumāna and describes his own views, set forth in the work as the School of Tān Sen' (*Tānseni mat*),³ based on the authorities of Maṭaṅgamuni and Bharata. The author claims to analyse the six principal *rāgas* and to give their component

(1) *Rāg-mālā, prasiddha Miyān Tān Sen racita*, Lahiri Press, Kasi (Benares), 1907.. Pandit Bhatkhande believes that this is a spurious work compiled by some later authors and fathered on Tān Sen to lend a halo of authority to the work. The fact that the name of Tān Sen is introduced somewhat aggressively in almost every alternate line throws ample doubts on the authenticity of the attribution.

(2) *Dekhyou Śiva-mat Bharat-mat, Hanumān-mat joyi| Kahai saṅgīt vicārī kai, Tānseni mat soyi.|| 2 || Rāg-mālā.*

(3) Francis Gladwin: *Ayeen Akbery*, 1800, London, Vol. II, pp. 456-464.

elements, an analysis of which would apparently suggest that these rāgas are mixed melodies (*saṅkirṇa*) compounded of other independent melodies. What is really meant is that the so-called component melodies, are affiliated to and, hence, can be derived from these major rāgas considered as *genus*.

Like Āmīr Khusrau, Akbar himself is credited with the introduction of many Persian melodies to the India rāgas of his time. According to the *Akbarnāmā* (Beveridge, Vol. I, p. 50), His Imperial Majesty had “composed over 200 of the old Khwarizmite tunes, especially the tunes of Jalasahi, Mahamir, Karat, and Nauroj, which were the delight of the young and the old.” We have no records of their musical characters, but the melody Nauroj, later sanskritized as “*Navarocikā*” still survives in current practice. The author of the *Āin-i-Akbarī* devotes a chapter under heading *Sungeet*¹ where he cites certain data collected from some contemporary treatises. He mentions six rāgas or ‘musical modes’: *Sree Rāg*, *Bussunt*, *Behrowng*, *Punchem*, *Megh*, and *Nutnārāin*. Under each rāga, he cites rāgiṇīs, which he describes not as *rāgiṇīs*, but as “Variations” of the *rāgas*. He refers to the two classes of songs *marug* (*mārga*) and *deysee* (*deśī*). And under the former he cites seven out of the melodies then current in the Deccan: *sūrya-prakāś*, *pañca-tal-eśvara*, *sarvato-bhadra*, *candra-prakāśa*, and *rāga-kadamba*.

undarik
iththal:
adrāga-
androdāya:

But the most important contribution to the developments of the Akbar period we owe to a great scholar, named Puṇḍarik Vittal, who came from some part of the Deccan.² He was the author of four remarkable treatises in Sanskrit² in which the theories and the musical practices of his time are systematised. Although he cites the Southern Mukhārī or Kanakāṅgi scale, the music that he treats of is without doubt Northern music. Our author wrote his works under the aus-

(1) As indicated in the concluding portion of the “*Sadrāga-candrodaya*”, he came from a village called Sātanūrvā (?) near Śiva-gaṅgā in Karṇāṭa (Kanarese District).

(2) Three of his treatises have been published by Prof. V. N. Bhatkhande and the data available has been very lucidly discussed by him in his article in *Saṅgeeta* (Vol. I, No. 4) under the title: *A comparative study of some of the leading music systems of the 15th, 16th, and 18th centuries*.

pices of three successive royal patrons. The first one *Sadrāga-candrodaya* was written some time between 1562 and 1599 under the service of the Farōqī Prince Burhan Khan of Khandesh which was incorporated in the Moghal empire after the seige of Asirgarh in 1599.¹ In this work he deals with both the Southern and Northern systems of rāgas and classifies them under nineteen ṭhāts or parent-scale, viz.: Mukhārī, Mālava-gauḍa, Śrī, Śuddha-naṭṭa, Deśākṣī, Karṇāṭa-gauḍa, Kedāra, Hijeja, Hamir, Kamode, Toḍī, Abhīrī, Śuddha-varāṭī, Śuddha-rāmakrī, Devakrī, Śāraṅga, Kalyāṇa, Hindola and Nāda-Rāmakrī. Out of these nineteen original (*mela*) rāgas, he attributes to five of them their respective derivative forms (*janya-rāga*). (See Appendix 18). As Prof. Bhatkhande remarks, "the Hindusthāni musician will find this classification very interesting. He will find many of his own rāgas in the list. Some of these latter seem to have retained their original *svaras* (notes) to this day." The work, is, therefore, of great significance for the data provided for the history of the rāgas. It is noteworthy, that when the author composed his works, the recognized melodies in the north far exceeded the limits of an exhaustive enumeration as is evident from the author's remark: "Owing to the rāgas being innumerable it is impossible to describe each individual ones, I am reciting, here, some of them, following a particular school."²

Rāga-
mālā:

In his next treatise *Rāgamālā*, written probably under the patronage of the Jaipur princes, Mādho Singh and Mān Singh Kacchwas,³ Puṇḍarīk Viṭṭhal classifies the melodies

- (1) "Tajjah śrī-burahāna-khāna-catūraḥ kāmānukāri varah
Saṅgitādi-kalā-prapūrṇa-vimalaḥ sāhitya-tejomayaḥ|| 5
Sadrāga-candrodayaḥ, p. 7.

- (2) Anantatvāttu rāgānām pratyekam vaktumakṣmaḥ|
Keṣāñcin-matam-āsritya kati rāgān vadāmyaham||
Rāga-mālā, p. 12.

(3) The colophon to a Ms. of *Rāga-mālā* in the Collection of the Bhandarkar Oriental Research Institute (Ms. Nq. 1026 of 1884-87) runs as follows: "Śāke vasvambaka-vedābja ka pariḡaṇite dhātr-
saṁvatsare'smīn| Āśāḍhe kṛṣṇa- pakṣe-śaśa-dhara-sudine pañcamī
revatībhe| Nāgāmavā dharmasūnur-dvijavara-tilako Viṭṭhalo'sti?

under six male rāgas, and attributes to each, five 'spouses' (*bhāryās*) and five 'sons' which may be conveniently set forth in a table in Appendix 18.

In this list of 66 melodies, we miss some of the rāgas cited in the first treatise, given above. The 66 rāgas tabulated in the list probably represented the current melodies as Puṇḍarik Viṭṭhal found them in Northern India when he sat down to compose his work. But the *Rāgamālā*, from our point of view, is the most important document, as it is in this work that we come across *for the first time* descriptive verses, actually giving the visual pictures, along with the component notes of the melodies, and also an indication of the time allocated to the singing of the rāgas.

Rāga-
mañjari:

The third treatise, *Rāgamañjarī*, was probably composed by the author under the patronage of Rājā Mānsingh Ka'chwa and after he was introduced to the Imperial Court at Delhi. In this work, he cites twenty melodies as parents of the derivatives. They are as follows: Mukhārī, Soma-rāga, Ṭoḍī, Gauḍī, Varāṭī, Kedāra, Śuddha-nāṭa, Deśāksī, Deśī-kāra, Sāraṅga, Āherī, Kalyāṇa, Kāmōda, Hijeja, Rāma-kṛī, Hindola, Karṇāṭa, Hamīra, Mālava-kaiśika, and Śrī-rāga.

But the most important feature of this work is the recognition of the place of as many as sixteen Persian melodies and relating them to the Indian melodies by their nearest equivalents. Most probably these imported melodies had already obtained a place in current Indian music of the North and the author only confirmed the practice by including them in his work and by indicating their characters by assigning them to their places in relation to the Indian models. As Professor Bhatkhande remarks that the use of the locative case termination of the Indian rāgas named "is intended to show that the Persian melody is not exactly the same as the Indian but that the two are founded on the same scale." He accepts them as part of the Hindusthāni system though he

vidvān| Teneyam rāga-mālā rasika-jana-gale bhūṣaṇārthaṃ kṛtā hi"||

This chronogram yields the date śaka 498 i.e. 1576 A.D. See discussion in 'Notes on Indian Chronology XI. Date of Rāga-mālā of Puṇḍarik Viṭṭhal, *Annals of the Bhandarkar Research Institute*, Vol. XIII, 1931-32, pp. 337-346.

PUHUPA R ĠINI

characterized them as "Persian" and recognized that they are "the gift from others" (*parada*). They are sixteen in number and are known as: Rahāyī, Nisāvar, Māhura, Jaṅgula, Māhaṅ(?), Vārā, Sunhath, Irāya, Husenī, Yaman, Sarpaharādā, Vākhreja, Hijejaka, and Muśak.

It is significant that Turuṣka Ṭoḍi, which must have received an earlier affiliation is not mentioned in this list. On the other hand, Sarpardā, which is ascribed by tradition to Āmīr Khusrau, is here enumerated as a new-comer.¹

By this time, the melodies had too far exceeded in number to be confined within the limits of the six rāgas and their wives. In this connection, two texts of uncertain date (and perhaps dateable about the second quarter of the 16th century), deserve to be noticed here.

The first text bears the name *Cattvāriṃśacchata-rāga-nirūpaṇam*, attributed to Nārada.² Whoever may be this author, who wrote under the cover of a name revered in musical history, he must have belonged to the sixteenth century when the melodies could not be conveniently grouped under the two categories of male and female rāgas, and a third category was a severe necessity. And the device of classifying the new-comers as 'sons' (kumāra) of the known rāgas and rāgiṇīs was resorted to. More than one author adopted this device.³ But this author appears to be the ear-

Cattvāriṃ

(2) It survives in various Mss., one of which is in the Tanjore Palace Library (No. 6651). It has been published by M. S. Sukthankar (Arya Bhusan Press, Bombay, 1914).

(3) It is generally asserted that this fanciful system of classification of dividing the melodies into groups of 'families', consisting

Somanatha:
Rāga-vivo
dha:

liest to adopt this mode of classification. For, he builds his rāga-system on the earlier phase of ten major melodies, described as ten masculine rāgas: Śrī-rāga, Vasanta,, Pañcama, Bhairava, Kauśika, Megha-rāga, Naṭa-Nārāyaṇa, Hindola, Dipaka, and Haṃsaka. This classification he attributes to Nārada.¹ The author proceeds to give the contemplative verses (*dhyāna*) the verbal image of each masculine rāga, and then enumerates five wives for each, and four sons for each couple. (See Appendix 19).

To the early part of the reign of Jahāṅgir (1605-1627 A.D.) belongs an important music text, specially treating of the melodies. It is the *Rāga-vivodha* by Somanāth, son of Mudgala, composed in 1609 A.D. (1531 śaka) as indicated in the colophon.² The author has added to the text a commentary of his own which is of great assistance in interpreting the text. It is difficult to say if the author wrote his

of 'husbands,' 'wives' and 'sons' is an essentially Northern and unscientific method, is not authorized by the ancient texts, and has not been followed in the Southern School. This is generally true. But the germ of the idea is certainly derived from *Saṅgita-ratnākara*. At page 152, (part 1) Śaraṅgadeva describes 15 major rāgas as "janakas" (fathers) of the minor melodies (*bhāṣās*). Then he describes (p. 238) a few rāgas, which he could not group under any class and assign to any family, as melodies of unknown parentage (*anukta-janakā*).

(1) This must mean the author himself, and not the author of *Saṅgita-makaranda*, (p. 18) who enumerates the masculine rāgas as twenty in number. The author of *Cattvāriṃśacchata-rāga-nirūpaṇam*, represents a time, when in Northern India, the major melodies (*puruṣa-rāga*) were growing less and less in number, and approaching towards the stage of being limited to six rāgas. It is quite possible that our author, though living in a later epoch, was adhering to the older and conservative school.

(2) "Kudahana-tithi-gaṇita śake saumyāvdasyeṣa-māsi śuci-
pakṣe."||

The work is available in the edition of Puruṣottama Gharpure printed at Poona, 1895, and also in a recent edition by M. S. Aiyar, with an elaborate Introduction and Translation, Triplicane, Madras, 1933.

work in the North, or in the South.¹ He classifies the melodies by selecting 23 melodies as major melodies (*pravartakārāga*) and Mela-kartās ('unifiers', or genuses), taking the Mukhārī as the Śuddha scale,² and derives the other melodies, by classifying them under one, or other of these 23 types or classes. He does not, however, give any exhaustive enumeration of all the melodies which he remarks are innumerable according to the various ancient schools (*mata*), and incidentally cites Mataṅga, Nisāhka, and Rāgārṇava, in his commentary (Ch. IV, pp. 1-3). He also cites the classification into six major rāgas, with five rāginis each, making up a system of 36 rāgas, and also cites the classification of six rāgas, with five wives, and five sons each, making up a total of 66 melodies.³ He however follows the Carnatic system by devising a scheme of generic rāgas (*melas*), giving a system of 23 Mela-rāgas from which he derives the other melodies. (See Appendix 20).

This scheme differs from that of the 20 melas of Rāmāmātya's *Svarakalānidhi* not only in the additional five melas, Bhairava, Mallāra, Kalyāna, Śuddha-vasanta and Hammira, but we also miss in Somanāth's list—the rāgas Hindola, and Hejūjji. Bhairava is sometimes accepted in place of Mālava-gauḍa.⁴

To the reign of Shāh Jahān belongs, the short but popular treatise known as the "*Saṅgītadarpaṇa*" (the Mirror of Music) written by Dāmodara Mīśra about 1625 A.D.⁵ It is more a compilation than an original work, and the author freely quotes from various authorities. His definition of 'Saṅgīta' (song and music) evidently borrowed from some

earlier text-writer is worth quoting: "The quality of pleasing is the common factor underlying the art of singing songs, accompaniments, and dance. Therefore that which fails to give pleasure cannot deserve the name of music (*Saṅgīta*).¹

In his chapter on *rāgas*, he gives a list of twenty major *rāgas* :—*Śrī-rāga*, *Naṭṭa*, *Vaṅgāla*, *Bhāṣa*, *Madhyama*, *Śāḍava*, *Rakta-haṃsa*, *Kohlāsa*, *Prabhava*, *Bhairava*, *Dhvani*, *Megha-rāga*, *Soma-rāga*, *Kāmoda*, *Āmra-paṅcama*, *Kandarpa*, *Deśā-khya*, *Kakubha*, *Kaiśika*, *Naṭṭa-nārāyaṇa*.

This list is quite distinct from the system of six *rāgas* and thirty-six *rāgiṇīs*. The author cites two different systems of 'six-rāgas', one according to the school of Hanumān, and the other according to the view of *Rāgārṇava*. He also cites the view of Someśvara on the time-theory of the melodies. The chapter ends with a series of descriptions of the six *rāgas*, and thirty *rāgiṇīs*, according to the school of Hanumān, together with prayer-formulas (*dhyānas*) for each of the melodies described. The prayer-formulas of some of the *uparāgiṇīs*, not given elsewhere, are cited by the author.

The next available text belongs to the South and the Karnatic system. *Saṅgīta-sūdhā*, composed by Govinda Dikṣit, the minister at the Court of Prince Raghunath Naik (1614-1640 A.D.) of Tanjore, was ascribed by the author to his royal patron.² It is an elaborate treatise, and treats of the melodies very fully. The descriptions of the *jāti-rāgas*, including the composite *jāti*-melodies, are illustrated with actual songs, with notations. The author gives to the *Śuddha-jātis* a picturesque name, viz., *Kapālānī* (skulls), associating their origin with Śiva, as he went about in his begging role (*vikṣāṭaṇa veśa*) with the skull as his begging bowl.³ Improving on Mātāṅga (Appendix 3) the author classifies melodies under ten divisions: (1) *Grāma-rāga*, (2)

Uparāga, (3) Śuddha-rāga, (4) Bhāṣā, (5) Vibhāṣā, (6) Antara-bhāṣā, (7) Rāgāṅga, (8) Bhāṣāṅga, (9) Kriyāṅga, (10) Upāṅga. He cites and describes 30 Grāma-rāgas, 8 Upa-rāgas, 20 Śuddha-rāgas (nearly the same as given in *Saṅgīta-darpaṇa*, ante p. 32) and the 'derivative melodies' (*janya-bhāṣā-rāga*).

While *Svara-kalā-nidhi* cites 20 melas, (generic melodies which unify the derivatives under a genus-species system), *Rāga-vivodha* cites 23 mela-kartā rāgas; by the time of Govinda Dikṣit, 72 melas had been evolved. Though the system of Melakartās had been in existence before, Dikṣit gives it an emphatic status, and appears to have codified it, and given it a proper name, calling it, after the name of his patron, as 'Raghunātha-mela'. The author is said to have introduced some new rāgas, e.g., Jayanta-sena and others.¹

The two following texts, *Hṛdaya-kautuka* and *Hṛdaya-prakāśa*, come from the North.² The author of both is Hṛdaya Nārāyaṇa Deva who ruled in Gadā deśa about 1724 Samvat (=1646 or 1660 A.D.) In the first work, the author borrows his 12 parent scales (*saṁsthānas* or *ṭhāṭs*) from *Rāga-taraṅginī*. He, however, invents a new melody called Hṛdaya-rāma, in which two peculiar notes are used, e.g., tri-śruti 'ma' and tri-śruti 'ni', and on the basis thereof lays down an additional thirteenth *ṭhāṭ*. His derivative rāgas are very fully described with their complete note-compositions. In his *Hṛdaya-prakāśa*, the author confines himself to 12 types of *melas* or *ṭhāṭs*, commenting that 'there are innumerable *melas* in the ocean of music, but only 12 of these are useful here.' He defines *mela* as 'a collection of notes capable of producing rāgas.' He emphasises on an important point. 'The use of two, three, or four notes may produce pleasing improvisations (*tānas*) but not rāgas.' The Śuddha scale of *Hṛdaya-prakāśa* seems to correspond to the *Kāfi*

ṭhāt of the modern Hindustani musicians.

Passing over Harivallabha's Hindī treatise (1653 A.D.) interesting only for its iconographic data, we come to the most important text of the South, the *Caturdandi prakāsikā* by Venkaṭamakhi¹ the son of Govinda Dikṣit. The work was composed about 1660 A.D., and offers a very pungent criticism of the *Svaramelakalānidhi*. The author develops the *melas* into as many as 72 different types.² These 72 *melas*, the author considered as final, and exhaustive. He had asserted that 'even Śiva could not add to the 72 *melas*'.³ This challenge has however been taken up by a later theorist the nameless author of *Melādhikāra-lakṣaṇa*. Many musicians hold that 72 *melas* are not possible. Venkaṭamakhi's system is based on the following 12 *svara sthānas*: (1) Ṣaḍja, (2) Śuddha-ṛṣabha, (3) Catu-śruti ṛṣabha=Śuddha-gāndhāra, (4) Ṣaṭ-śruti-ṛṣabha=Sādhāraṇa gāndhāra, (5) Antara-gāndhāra, (6) Śuddha-madhyama, (7) Pratimadhyama, (8) Pañcama, (9) Śuddha-dhaivata, (10) Catuśruti-dhaivata=Śuddha-niṣāda, (11) Ṣaṭ-śruti-dhaivata=Kaiśika-niṣāda, (12) Kākalī-niṣāda. "The point to be noticed about this scheme is that with these twelve *sthānas* allotting two for Ri, Ga, Ma, Dha, and Ni, we can have only 32 *melas* in all, and in fact that position has been taken by some of the musicians of the present day. But Venkaṭamakhi intended to provide for both the Ris, or Gas, or Dhas, or Nis, occurring in the same *mela*, and so he classified the same *sthāna* both as Ri, Ga, Ga; and as Dha, or Ni. Thus we get Śuddha-gāndhāra, Ṣaṭ-śruti-ṛṣabha, Śuddha-niṣāda, Catuḥ-śruti-dhaivata. Thus the seventy-two *melas* are made up". (T. L. Venkatarama Iyer, in *Journal Music Academy*, Madras, Vol. I, No. 1, p. 42). He sets out a table of 19 *melas* (Appendix 24) which were current when he came into the field.⁴

Catur-dandi-prakāsikā.

Veṅkaṭamakhi classifies the rāgas into six kinds of Mārga-rāgas and four kinds of Deśi-rāgas.

A text datable about 1665 A.D., and which became very popular in the North is the *Saṅgīta-Pārijāta* by Ahovala Pandita¹ having been translated into Persian by Pandit Dīnānāth in 1724 A.D. The translation bearing the seal of the librarian of Emperor Mohamed Shah (1719-1724) is still in the collection of the Rampur State Library. The most important feature of this work is the fixing of the exact places of the *suddha* and *vikṛta* notes in terms of the lengths of the sounding string of the *vinā*, in the same manner as that of *Hṛdaya-kautuka*. Ahovala does not appeal to give any classification of the rāgas under any types of parent-scale (*ṭhāt*) or otherwise, although he claims to describe the rāgas according to the characteristics laid down by Hanumān.² But occasional references to *ṭhātas* seem to indicate, that in his time, classification of rāgas under *ṭhātas* had become current in the North. He gives a list of 122 rāgas, which he describes with accurate notations.³ He groups them according to the time and watches (*prahara*) assigned to their appropriate periods for singing, dividing them into three groups, for the first, second or third watches, while a string of 19 rāgas are grouped together as suitable for all hours ("*sarvadī ca. sukha-pradā*").

Passing over the short Hindī treatise of Deo-kavi (c. 1673 A.D.), mostly of iconographic interest, we come to a very interesting group of texts: *Anūpa-saṅgīta-vilāsa*, *Anūpa-saṅgīta-ratnākara* and *Anūpa-saṅgī-tānkuśa*, all composed by Bhavabhaṭṭa under the patronage of Raja Anūp Singh (1674-1701 A.D.) of Bikanir. This group of texts⁴ is of great interest

for the history of the rāgas. By adopting the data offered by nearly all the earlier texts, the author gives an historical view of the rāgas, and their various classifications as gleaned from the preceding theorists, beginning from Yāṣṭika. In the first text, the author gives various prayer-formulas from earlier authors whose original texts are not otherwise available. In the second text, the author cites variegated forms of 18 different melodies, e.g., 16 forms of Naṭa; 14 forms of Kaṇṇāṭa; 16 forms of Velāvali; nine forms of Ṭoḍi; and so on; He catalogues 37 varieties of grāma-rāgas with their respective derivatives (*vibhāṣās* &c.). He gives a very interesting history how the first group of six major-rāgas came to be recognized at first. 'The ancient authorities had given the status of major rāgas to the following (four): (i) Naṭa-nārāyaṇa, (ii) Megha, (iii) Bhairava, (iv) Śrī-rāga. To this, the grāma-rāga called 'Pañcama' was added, and also the rāgāṅga 'Vasanta' (thus making a group of six).'¹ Then the author cites four other different groups of six-rāgas, including that of the *Rāgārṇava*, with their respective rāgiṇīs for each of the five systems. Next, he gives the name of 20 *melas*: Ṭoḍi, Gauḍi, Varāṭi, Kedāra, Śuddha-nāṭa, Mālava-kaiśika, Śrī-rāga, Hammira, Ahirī, Kalyāṇa, Deśākṣī, Deśikār, Sāraṅga, Kaṇṇāṭa, Hijeja, Nādarāmkriyā, Hindola, Mukhārī, and Soma. This is followed by full descriptions of numerous important melodies, mostly accompanied by prayer-formulas. In the third text *Anūpa-saṅgītāṅkuśa*, the author confines himself to the system of Hanumāna, with slight variations, viz., Sāveri, substituted for Āśāvarī (See Appendix 33). Descriptions of the note-structures of the melodies are borrowed from various earlier authorities. It is obvious that Bhava-bhaṭṭa does not record any new developments, but follows current and prevailing practices. Similarly, the *Saṅgīta-dāmodara* by Śubhaṅkara (c. 1690) is mostly based on *Saṅgīta-darpaṇa* and does not offer any new materials or data for the history of rāgas.

During the eighteenth century the available texts have

- (1) *Naṭa-nārāyaṇasyāpi Meghasya Bhairavasya ca*

Pañcamo grāma-rāgaḥ syādrāgaṅgam ca Vasantakah"

Anūpa-saṅgīta-ratnākara, p. 28.

very little to record by way of new developments. Thus the treatise called *Saṅgīta-nārāyaṇa*¹ composed by Puruṣottama Miśra under the patronage of Nārāyaṇa Deva of Parlakimedi of the Southern Gajapati dynasty about the years 1730-1750 freely uses the earlier texts.² The most interesting of the citations in this work are the verses from Nārada's *Pañcamasāra-saṃhitā*, and Mammaṭa-carya's *Saṅgīta-ratnamālā*, the original text of the latter being not yet traceable. The principal feature of the work is contributed by the descriptive prayer-formulas from various earlier authors. The author follows the six-rāga system with the following major rāgas: Bhairava, Vasanta, Mālava-kaśika, Śrī-rāga, Megha-rāga, and Naṭṭa-nārāyaṇa.

To the closing years of the eighteenth century belongs a short but interesting text, *Saṅgīta-sārāmṛtoddhāra*³ attributed to a royal author, King Tulāji of Tanjore (1763-1787) A.D.). Though a late work, it has some interesting features. He refers to a musician (gāyaka) named Sautika⁴ and cites pithy definitions of the classification of rāgas into rāgāṅga, bhāṣāṅga etc. He cites Mataṅga, Viṇṇhala, and the *Caturdaṇḍi-prakāśikā*. He cites the melodies as current in his time ("samprati pracaranti ye," verse 14). He attributes to Someśvaradeva,

Tulāji:

(1) The text is available in an unpublished Ms. in Bengali, in the collection of the Asiatic Society of Bengal No. 2513-69-E4. The colophon runs as follows: "Iti śrī-man-nikhilānvayottuṣṭya-garva-śāva-stasyākhila-guṇa-sadma-padma-nābha-bhūmi-pati-tanū-janmano-mahārājasya-sāhitya-saṅgītārṇava-karṇadhāra (kara) kamalergajapati-vīra-śrī-Nārāyaṇa-devasya-kṛtau Saṅgīta-Nārāyaṇe śuddha-prabandho-dhāraṇam nāma caturthaḥ paricchedaḥ * * * Śrī-Kaviratna Puruṣottama-Miśra-Kṛta Saṅgīta-Nārāyaṇonāma granthaḥ."

(2) A chief called Nārāyaṇa Deva of Parlakimedi, is referred to in R. D. Banerjee's *History of Orissa*, Vol. II, p. 120ff. See also Ramachandra Kavi : "Literary Gleanings," *Journal Andhra Historical Research Society*, Vol. III, 2, 3, 4, p. 206.

(3) The work is represented by two imperfect Mss. in the Collection of the Tanjore Palace State Library, Nos. 6629, and 6632 (Burnell's *Catalogue*, p. 60). It has been published in an edition now out of print, printed in Bombay by Bhāla Chandra Sarmā.

(4) "Bhāṣāṅgastena Kathyante gāyakaiḥ Soutikādibhiḥ," Verse 12.

the well-known verses describing the origin of the six major rāgas from the mouth of Śiva and Pārvatī, already cited here (*ante* p. 13, foot-note 1). As a characteristic Southern text, it classifies the melodies under the system of *melas*. As compared with the *Caturdaṇḍī-prakāśikā*, the text offers several peculiarities. If we compare the *mela* and *janya-rāgas*—as given in the Appendices 24 and 2 and we find that the Mukhārī mela, popular in the earlier period, has given up its position of honour to Śrī-rāga.¹ Śuddha-rāma-kriyā, and Sindhu-rāma-kriyā are cited as two independent major rāgas, and a new major rāga (*melaka*) is cited under the name of Vega-vāhinī. The Saindhavī rāga, an evening melody, is described as giving victory in times of war.² The melody Madhyamādi is said to be very moving and stimulating when played on a flute.³ The melody Kannaḍa-gauḍa, an *Upāṅga-rāga*, is said to be very popular in Orissa (“*Utkalā-nāmatipriyā*”). Among the list of derivative melodies the following new names are cited: Mādhava-manoharī, Śrī-rañjanī, Jayanta-sena, Mani-raṅga, Udaya-ravi-candrikā, Ārdradeśī, Meca-vauli, Pūrṇa-pañcama, Nārāyaṇī, Pūrṇa-candrikā, Sura-sindhu, Chhāyā-taraṅginī, Julāvu (Sanskrit form of Jilaf?), and Manoha. Some interesting varieties of older and familiar melodies are cited, *e.g.*, Yadu-kula-kāmbojī, Nārāyaṇī-deśāksī, Naṭa-kurañjī, Mohana-kalyāṇī, Indughanṭā-rava. The new names appear to prove that music was still a living science, growing by the development of new melodies.

Sangita-
sāra by Ma-
hārāja Pra-
tāpa Simha:

The Hindi text *Saṅgita-sāra*⁴ compiled by Mahārāja Sawai Pratāpa Siṃha Deo of Jaipur (1779-1804 A.D.) offers

- (1) “*Atra sarvveṣu rāgeṣu Śrī-rāgaścottamottamaḥ*”|| 74||

no data bearing of the history of the rāgas. He however describes several new rāgas e.g. Laikā-dahana, Līlāvati. The work is of more interest for the materials offered for musical iconography. The work is the result of a conference of experts and musical practitioners called at Jaipur for the purpose of compiling a standard work on Hindusthani music. In the work the standard of Śuddha scale accepted is that of Vilāval.

The eighteenth century has very little to record in the history of the development of Indian music, in theory, or science—though eminent practical exponents continued to carry on the brilliant traditions of the Moghul periods as late as the reign of Muhammad Shah (1719-1748 A.D.).

During the early part of the nineteenth century an important Persian text offers a new development in the classification of rāgas. This is a Persian text compiled in 1813 A.D. by Muhammad Rezza, a Prince of Patna. It is known as *Nagmat-e-Asaphi* and appears to survive in manuscripts. This eminent connoisseur of music had the courage to call into question the classification of the northern system, based on a picturesque divisions of the melodies into 'wives' and 'sons' of rāgas. He devised a new system based on a study of the structural similarities of the rāgas. He based his classification by accepting the Vilāval scale as the standard of Śuddha scale. He built up his system after consulting the best practising artists of his time.

Nagamat-e-
Asaphi by
Muhammad
Rezza
Khan:

A pretentious treatise compiled during the early part of the 19th century, and printed in 1842 we owe to a musical expert Kṛishṇānanda Vyāsa, a Gauḍa Brahmin from a village in Udaipur. It is an encyclopædia in Sanskrit of songs collected from different parts of India and published under the title *Saṅgīta-rāga-kalpadruma*.¹ It also deals with dancing and drumming and rhythm. It is hardly an original contribution to music and merely summarises the works of previous text-writers. In the section on rāgas the author follows

Saṅgīta-
rāga- kal-
padruma
by Kṛish-
nānanda
Vyāsa:

(1) The work has been printed twice, the first edition during 1842-49, and the second edition in two volumes in 1916 by the Baṅgīya Sāhitya Pariṣad, Calcutta, vide O. C. Gangoly's note on 'Date of the *Saṅgīta-rāga-kalpa-druma*' in the *Annals of the Bhandarkar Oriental Research Institute*, Vol. XV, Parts 1-11, 1934, p. 117.

the *Saṅgīta-darpaṇa* basing his classification on the School of Hanumān. He describes the 36 melodies and quotes the prayer-formulas as cited in the *Saṅgīta-darpaṇa*. As an anthology of old songs, both in Hindi and Persian, which are collected under different melodies, the work is of great value, the materials having been collected during a period of 32 years, from a wide field of researches.

angitasā
a-Samgra-
a by Sir
M. Ta-
ore:

The compilation of Raja Sir Sourindra Mohun Tagore, (one of the greatest connoisseurs and patrons of Indian Music) under the title of *Saṅgīta-sāra-saṃgraha'* and published in Samvat 1932 (1875 A.D.) offers the latest study on the old Sanskrit musical texts. His chief sources are the text of *Saṅgīta-ratnākara*, *Saṅgīta-dāmodara*, and *Saṅgīta-darpaṇa*. His work is of great interest for the collection of prayer formulas (*dhyānas*) of rāgas according to the three schools.

Bhat-
Khande:

A more original contribution to the science of the rāgas is furnished by *Śrī-mal-lakṣa-saṅgītaṃ* and *Abhinava-rāga-mañjari*² two short Sanskrit treatises composed in 1921 by Pandit Bhat-Khande (under the pseudonym of Viṣṇu Śarmā) an eminent scholar and one of the foremost living connoisseurs of Indian music to whom this volume is dedicated. The author adopts the system of unifiers (*melakas*) and derivatives (*janya*). Accepting the Velāvala as the fundamental scale,³ he divides the rāgas into 10 groups (*melakas*=group-makers): Kalyāṇa, Kammāj, Bhairava, Pauravī, Māravā, Kāphī, Āśāvarī, Bhairavī and Toḍikā. The derivative rāgiṇis coming under each group are set out in the table given in Appendix 35).

Dr. Rabin-
dranath
Tagore:

This hasty, summary, and bird's eye-view of the development of the rāgas will be imperfect, without reference to the recent innovations introduced by Dr. Rabindra Nath Tagore. His experiments are chiefly interesting for their harmonious combinations of apparently inconsistent, or

temperamentally divergent, or structurally incompatible rāgas—into happy and melodious compositions. As we have seen (*ante* p. 27-28), numerous old masters of Indian music had changed the current forms of rāgas in new and attractive versions, and novel forms of interpretations. “Knowing the old rāgas perfectly well, he (Tagore) too had the right to use and change them as his own inspiration told him to do.”¹

RAGAS AND RAGINIS

The differentiation of *rāgiṇīs* from *rāgas* is a topic of some complication. The evolution of the *rāgiṇīs* as a class of melodies to be distinguished from *rāgas* properly so-called is a matter of later history. The word *rāgiṇī* does not occur in the works of Dattila, Bharata, or in the *Bṛhaddeśī*. *Rāgiṇīs* are believed to be graceful, minor, diminutive, or abbreviated forms of *rāgas*. At an earlier stage, such as we find in the *Bṛhaddeśī*, they were looked upon as the derivatives of the root-*rāgas*, and as reflecting the character of the *rāgas*’ (*Chāyā-mātrānuga*). They are then designated as *bhāṣās*, and *vibhāṣās*, and *antara-bhāṣās*. And each of the several earliest grāma-*rāgas*, or *rāga-gītis* (see Appendix 3) had particular *bhāṣā-gītis* assigned to them. According to the definition of Maṭaṅga, ‘the *bhāṣās* were derived from the grāma-*rāgas*, the *vibhāṣās* spring from the *bhāṣās*, and the *antara-bhāṣās* were born of the *vibhāṣās*’.¹ In the nomenclature of this definition, and in the feminine endings given to these early derivatives of the root-*rāgas*, we have the seeds for the later classifications of *rāgas* and *rāgiṇīs*, picturesquely called as the wives of the *rāgas*, and the classification of *rāgas* and their derivatives picturesquely called as the sons (*putras*) of the *rāgas*. The three types of derivative *rāgas*, mentioned by Maṭaṅga, have names with feminine endings (*strī-pratyaya*).

According to an ingenious suggestion by a modern scholar of music,² it is the placing of the emphasis on the cadential notes (*nyāsa*, *vinyāsa*, *apanyāsa*, *sannyāsa*) on the stronger or the weaker pulses of the rhythm of a melody that determines its sex. And that when the musical phrases or

- (1) “Grāma-rāgodbhavā bhāṣā bhāṣabhāṣāca vibhāṣikāḥ|
Vibhāṣābhāṣāca saṅjātā tathā cāntara-bhāṣikāḥ||”

Maṭaṅga, *Bṛhad-deśī*, p. 105.

- (2) Paṇḍit Kṛṣṇa Chandra Ghose Vedānta-Cintāmaṇi.

structure of a melody have an upward or ascending tendency (*ārohaṇa*) with the cadential notes resting on the stronger pulses—then it is called a *rāga* (a masculine melody). And when the phrases and structure have a downward or descending tendency (*avarohaṇa*) with the cadential notes resting on the weaker impulses,—it is characterized as a *rāgiṇī* (a feminine melody).

The conception of *rāgiṇī*, as a graceful, or a diminutive phase of a *rāga*, and designated with a feminine ending appears to be a peculiarity of the Northern system. Śāraṅga-deva does not recognize *rāgiṇīs*, but only *bhāṣās*, *vibhāṣā* and *antarabhāṣās*. The differentiation of female melodies is first come across in the *Saṅgīta-makaranda* of Nārada, who gives three classes of melodies under the headings of (i) male *rāgas* (*pumliṅga-rāga*), (ii) female *rāgas* (*strī-rāgas*), and (iii) neuter *rāgas* (*napuṃsaka-rāgas*). This classification is ascribed to Brahmā, and the three groups are allocated to three different types of emotive values. The male melodies are assigned to the sentiments of Wonder, Courage, or Anger, the female melodies are assigned to the sentiments of Love, Laughter, and Sorrow, while the neuter melodies are assigned to the sentiments of Terror, Fear, Disgust, and Peace.¹

It should be noted that Nārada does not actually use the word *rāgiṇī*, but uses the term *strī*, or 'yoṣit' (wife) of a *rāga*. If Mammaṭa (8th century) is the author of *Saṅgīta-ratna-mālā*, then the earliest reference to *rāgiṇīs* is to be found in this text; it has been freely utilized by the author of *Saṅgīta-nārāyaṇa* and various later authors. But this is somewhat problematic, as Nānyadeva, (12th century) an authority of the Northern School does not mention *rāgiṇīs*, so the term does not appear to have been used very much before the date of the *Rāgārṇava* (c. 14th century), though the recognition of a female *rāga* must be fairly old in the Northern system.

Gurjarī, Saindhavī, Gāndhārī, Ābhirī, are some of the earliest feminine melodies designated by Maṭaṅga under the

 Śṛṅgāra-hāsyā-karuṇām (?) strī-rāgaiśca pragīyate|| 65 ||
 Bhayānake ca vibhatse śānte gāyannapuṃsake||
Saṅgīta-makaranda, (G. O. S. Vol. XVI, p. 19).

name of *bhāṣā*. According to the terminology of the mythology of the *tantras*, the minor melodies have been born of the union of the male and the female phases of the melodies.

As Nārada has remarked, 'curious, indeed, are the names of Rāgas'.¹ If we study their names we find three distinct phases. At the first stage, about the time of the *Nāṭya-Śāstra* the melodies took their names from the dominant or significant note prevailing in their compositions. Thus, one of the *grāma-rāgas* is called *Ṣaḍjī*, from the note *Ṣaḍja*; *Ārṣabhī*, from the note *Ṛṣabha*, *Gāndhārī*, from the note *Gāndhāra*, and so on. The last-named melody still survives in current practice. The name 'Madyamādi' (now regarded as a *rāgiṇī* of Bhairava) is so-called as it begins with the note 'Madhyama' (F). *Vibhāṣā*, originally a generic name for a class of derivative melodies (a sub-division of *bhāṣās*) now survives as a proper name for a *rāgiṇī*. In the second stage, the melodies derived their names from the ancient tribes inhabiting various parts of India. Thus the Śakas, the Pulindas, the Ābhīras, the Savars, and the Bhairavas² appear to have lent their names to the following *rāgas*: Śaka-rāga (with variants called Śaka-tilaka, Śaka-miśrita), Pulindi-rāga, Ābhīrī, Sāverikā (Sāvīrī) and Bhairava-rāga. Three of the earliest *rāgas*, (a) Mālava (with its derivatives Mālavikā, Mālavaśrī, Mālava-pañcama, Mālava-vesara, Mālava-kaiśika,³ vulgarized into Mālkausa), (b) Āndhrī, and (c) Gūrjarī, may have come from the ancient tribes known as the Mālavas, the Andhras, and the Gurjaras respectively. As is well-known, the Mālavas

(1) "Nāradena vicitreṇa santi nāmāni vakṣyate" | *Saṅgita-makaranda*, p. 18, 56.

(2) The Bhairavas were an aboriginal sect mentioned along with the Śakaras, Ābhīras, Chandālas, Pulindas and Savaras in Sāradātanaya's *Bhāva-prakāśana* (Gaekwad's O. S. Vol. XLV, 1930. Introduction, p. 61).

(3) According to Mataṅga (*Bṛhaddeśi*, T. S. S. p. 98) Mālava-Kaiśika is so called because it is derived from the Kaiśikī-jāti melody' ("*Kaiśikī-jāti-sambhūtiḥ rāgo Mālava-kaiśikah*" || (346). The term 'Kaiśiki' (literally—'hair breadth') is derived from the theory of Śrutis (microtones). Thus, 'Kaiśikī nī' is nikhāda (B) less by one Śruti.

TODI RĀGINI

were ancient martial tribes (*āyudhaj-jivī-saṃghas*), mentioned by Patañjalī, and who were formerly settled in the Punjab where they offered resistance to Alexander, and latterly settled in the North-west part of Central India, to which they gave the name the Mālwā.¹ The Andhras, a Dravidian sect, played a more important part in the political and cultural history of India, and founded ruling dynasties occupying various parts of Central, Eastern, and Southern India at different periods.² Similarly the Gurjara clans, probably foreign immigrants associated with the White Huns, formerly settled near Mount Abu, and, later, occupying the peninsula known as Guzerat,—played important parts in developing Indian culture and religious history. They are also associated with an important ruling dynasty known as the Gurjjara-pratihāra dynasty.³ The aboriginal races of India appear to have contributed many shining and colourful threads to the rich and variegated texture of Indian musical tapestry.

Other names of rāgas are derived from geographical place names and regions. The most typical example is Vaṅgāla, 'the celestial form of which', Mataṅga points out, 'is derived from the Vaṅgāla country'.⁴ Cognate examples are (a) Saindhavī, from Sindhūdeśa, modern Sind, (b) Sauvīra (with its derivative, Sauvīraka, Sauvīrī) from the ancient region in the South-west,⁵ (c) Takka (sometimes called

(5) 'The Mārkaṇḍeya Purāṇa assigns Sindhu-Sauvīra to the South-west' (Cunningham's '*Ancient Geography of India*, S. Majumdar's Edition, 1924, p. 7).

'Taku', later vulgarized as 'Taṅka'), from Takka-deśa¹ (d) Saurāṣṭrī (vulgarized in forms, such as, Saurāṭhī, Surāṭ, Surāṭ-mallār) from the Saurāṣṭra-deśa and (e) Karṇāṭa (Karṇāṭī), from regions of same names. Similarly, the rāgiṇī Kāmbhojī (still surviving in the South in the popular variety known as Hari-Kāmbhojī) is derived from Kāmbhoja-deśa, and the rāgiṇī Vairāṭī may have come from Berar, or Virāṭa kingdom, figuring in the epic anecdotes of *Mahābhārata*. Bhoṭṭa, a very early melody, may have come from the region of Thibet (Bhoṭṭa), just as Gauḍa (Eastern Bengal), to be distinguished from Vaṅgāla, and Gauḍī must have been melodies imported from the Eastern part of Bengal. Likewise, the melody Pauravikā (Pūravī, Pūrvī), literally meaning 'eastern', may have come from that region. It is quite possible that the melody known as Kakubhā derives its name from an ancient village, famous in Gupta history, as a culture-centre, 'a very jewel amongst villages, sanctified by the habitations of sages'.² The village *Kakubhā* still survives under the name of *Kahāyuṇ*, five miles to the west of the chief town of Salampur-Majhauḷi in the district of Gorakhpur. The rāgiṇī Khamvāvati, an ancient melody, probably derives its name from the city of the name of Cambay; the site of the ancient city is three miles away from the modern city. The Venetian traveller, Marco Polo, in the thirteenth century, calls it "Cambat."³ According to Col. Todd, the proper Hindu name of the city, was Khambavatī, 'the city of the pillars.' "The inhabitants write it Kambayat. It is spoken of as a flourishing city by Mas'udi who visited it in 915 A.D.' Ibn Batuta (14th century) speaks of it as a very fine city, remarkable for the elegance and solidarity of the mosques and houses built by wealthy foreign merchants.

(1) The melody may have come from an ancient aboriginal tribe known as the Takkas (Tāks, or Tauks of later times) who occupied portions of the Panjab in early times and who are believed to have given the name to the ancient city of Takṣa-śilā (Taxila) and of Attak (Attoc). See "*Early Turanians: 'Takkas'*" (Cunningham, A. S. Reports, Vol. II, 1862-65, Simla, 1871, pp. 6-11).

(2) "*Khyāte'smin grāma-ratne kakubha iti janaiḥ sādhu-saṃsarga-pūte*" (Fleet's *Gupta Inscriptions*, No. 15, p. 67).

(3) Marco Polo, Yule's edition, 1875, Vol. II, p. 389.

The melody does not appear to find its place in the *Saṅgīta-makaranda*, nor in the *Saṅgīta-ratnakara*, nor even in the *Saṅgīta-samaya-sāra*, and is mentioned for the first time in Locana Kavi's *Rāga-taraṅgiṇī* (c. 14th century).

The *rāgiṇī* Hijeja [Hejuiji], an imported melody, now affiliated with Indian *rāgas*, is also believed to have been so called after the name of a city in Persia.¹

Of other examples of the Sanskritization of names of non-Indian or non-Aryan melodies, the most important is *Velāvalī*. In its original form, which we find twice mentioned in the *Abhilāṣārtha-cintāmaṇi* (Ch. 66, 67), it is *vela-ūllī*, apparently a Dravidian word. *Toḍi*, sanskritized as *Tuḍikā* (*Toḍikā*), is originally derived from *Tuḍḍī*. *Āśāvarī*, and *Dhannāsikā* (*Dhanāśrī*), meaningless as Sanskrit terms, probably conceal within their modern forms, their original non-Aryan names. Similarly, 'Bhāvanā-pañcama' mentioned as an *upa-rāga* in *Saṅgīta-ratnākara*, is a respectable form of *Khammāj rāgiṇī*, to be distinguished from 'Khamvāvati', (see notes on Plate CXIV) is first described by Śāraṅga-deva as 'Khambhā-iti' (Vol. I, p. 212) and, then under the respectable name of 'Staṁbha-tīrthikā' 'the sanctified water from the pillar.'² Names which had no chance to put on respectable garbs of Sanskrit names, are exemplified in *Chevāṭī*,

(1) In Persia, * * * "the modes are chiefly denominated like those of the *Greeks* and *Hindoos*, from different regions or towns; as among the *pardahs* (*maquams*=*rāgas*), we see *Hijāz*, *Irāk*, *Isfahān* and among the *shōbahs*, or secondary modes, *Zabul*, *Nishapur*, and the like. In a Sanskrit book, which shall soon be particularly mentioned, I find the scale of a mode, named *Hijeja*, specified in the following verse:—*Māmsagraha sa nyāso' c'hilo hijejastu sāyāhne*. The name of this mode is not *Indian*; and if I am right in believing it a corruption of *Hijāz*, which could hardly be written otherwise in the *Nagari* letters, we must conclude that it was imported from *Persia*." 'On the Musical Modes of the *Hindoos*' by Sir William Jones, (S. M. Tagore's Reprint, 1882, pp. 134-135).

(2) The familiar *rāgiṇī* known under the popular name of *Jhīnjhoṭī* (*jhijhiṭ*) has for its Sanskrit equivalents: 'Jijāvanta' 'Jhinja-vati. Likewise, *Māru*, a *prākṛta* word has *Māravikā* as its Sanskrit form.

Golli¹ Kaccoli, Geranjī and various other non-Aryan names, which should provide, for our philologists, new and rich fields of research.

Some of the names are derived from their associations with the season, and seasonal rites, or saturnālias. To this class belong the Megha-rāga, the melody of the rains, Vasanta, the melody of the spring, the Hiṇḍola, associated with the Swing Festival, and the Śrī-rāga, associated with the harvesting season. The text of *Śaṅgita-Sudhā* (early 17th century) alludes to the traditional association of this melody with Lakṣmī, the goddess of Fortune. 'As it is known to all, it brings fortunes.'² Prathama-mañjarī (lit. 'the first shoots') probably borrows its name from its association with early spring. Other melodies associated with the spring and the summer are, Cūta-mañjarī, (lit. 'the Mango-blossom'), Āmra-pañcama ('the mango with the fifth note').

The ancient sub-divisions of the rāgas into a sub-group of Kriyāṅga rāgas, have left their traces on some of the melodies—e.g. Guṇakriyā=Guṇakirī (Guṇa-kelī); Rāma-kriyā=Rāma-kirī, Rāma-kri (Rāma-kelī); Nāda-rāma-kriyā=Nāda-rāma-kri; Devakriyā=Devakri; Śiva-kriyā=Śiva-kri.³ When music, and rāga-gītis, originally associated with the stage and the drama, derived assistance and prestige from the cults and cult-worships, the melodies borrowed some more new names. Thus, Bhairava, and Bhairavī (probably associated generally with the Bhīrava clans) became the medium of singing solemn hymns to Śiva. Kedāra (a name of Śiva), Śaṅkarābharaṇa ('the ornament of Śaṅkara') and Hara-Śṛṅgāra ('the passion of Śiva'), are apparently names given by devout Śaiva worshippers. Ghaṇṭā-rava, (lit. 'the voice of the bell') is apparently associated with the worship

(1) Golli is sometimes met with in the form Gaulī from which the transition to the Sanskrit name Gaurī (to be distinguished from Gauḍī) is easy.

(2) "Atha *Suddha-rāgāḥ Śrī-rāgāḥ*: 1: *** *Vire rase'sau viniyojanīyo Lakṣmī-pradaḥ sarva-jana-prasiddhaḥ*": 130. *Śaṅgita-Sudhā, Journal, The Music Academy*, Vol. III, Nos. 1, 2, 1932, p. 37. Śrī-kanthī, now obsolete, is another melody associated with Lakṣmī.

(3) In an intermediate stage, the names of *Kriyāṅga* melodies take the forms of Guṇa-kṛti, Rāma-kṛti, Deva-kṛti, and so on.

in the temple. Kānaḍā came to be associated with the cult of Kṛṣṇa (Kānar, the Hindī-prākṛta form of Kṛṣṇa). The more significant example of a melody associated with Vaiṣṇava worship is the Naṭṭa-Nārayaṇa (the 'Dancing Viṣṇu').

Many a flower appear to have lent their names to old melodies:—Kusuma (flower), Kamala (lotus), Nilotpālī (blue lotus), Utpālī (lotus), Kumuda (lily), Kaumadākī (appertaining to the lily), Kuraṅga-mālikā (the deer-flower), Mālatī (jesamine).

Various rāgiṇīs have borrowed names from birds and animals: Kokila (cuckoo), Māyurī (pea-cock), Nāga-dhvani (the voice of the snake), Hamsa-dhvani (the voice of the swan), Vaḍa-hamsī (the big swan), Kurañjī-Kuraṅgī, (antelope), Vihagaḍā=Vihāṅgaḍā (the bird).

Sometimes, individual musicians, princes, chiefs, kings and patrons of music, have recorded their names in melodies created by them, or varieties and innovations introduced by them. The earliest example is the name of the melody Bhāṭiyārī, ('Bharṭharikā', according to the text of *Saṅgīta-Sudhā* [early 17th century]. It is traditionally derived from Bharṭhari, the famous prince-poet, the author of the *Śatakas*, who is believed to have lived in the middle of the seventh century.

Of master musicians naming melodies after their own names, the typical example is that of the three masters patronised by Raja Mān Thomar of Gwalior, each of whom contributed one variety of mallār, called after them, Bukshoo-ki-mallār," "Charjoo-ki-mallār," and "Dhondee-ki-mallār." The "Bāhādurī-Toḍī" is named after Sultan Bāz Bahadur of Mālwa, (1556-1570) who became their later patron.

The Sharqī kings of Jaunpur (1394-1479 A.D.) were patrons of art and architecture. The popular melody still current under the name of 'Jaunpurī Toḍī', originated from that area.

With the name of Miyān, Tānsen, the famous Court-musician of Akbar, are associated two melodies: 'Miyān-ki-mallār' and 'Darbārī'. Likewise 'Vilāskhānī-Toḍī' has been ascribed to Vilās Khan who has been identified as one of the sons of Tānsen.

The Sanskrit names and their prākṛta and Hindi vari-

ations as well as their vulgarized forms have led to some confusion as to the identity of the names of the melodies and their proper designations. These variations have been given, as far as possible, in the descriptive notes on the Plates. But some of the parallel names may be cited here by way of illustrations: Bhairava=Bhairon; Varāṭi=Varāḍi; Deśākhyā=Deśākh; Deśi=Deś; Āśavarī=Āswārī; Mallārikā=Malhār, Malār; Gūrjjarī=Gujrī; Deva-Gāndhāra=Deo-gāndhār; Travaṇā=Trapaṇā, Trivanī; Trivenī Hām-virī=Hāmmir; Aḍḍānā=Ādāna.

Bungling copyists have contributed their share to the confusion of names. Thus Paṭa-mañjarī, before it emerged in its present form, passed through the following stages, Prathama-mañjarī (*Saṅgita-makaranda*, p. 19), Phala-mañjarī, Prati-mañjarī (*Rāgārṇava*).

An example of deliberate transformation is offered in the name Madhuma-vatī (*Rāga-sāgara*) which subsequently figures as Madhu-mādhavī, associated with Kṛṣṇa (Mādhava).

The study of the names, as we have seen, yields important data for the origin and the history of the rāgas. But, they have also their practical uses in correctly apprehending the identity and *rasa*-values of fundamentally different rāgiṇīs, current under similar or analogous names, and liable to be confused by novices and untrained musicians. We have in current practices a group of identical or analogous names which under misleading designations stand different and generically distinct melodies, different in structure, and in emotional significance, which must be carefully distinguished from each other. Under misleading similarity of names, pairs, or groups of melodies embody different personalities, with widely different *rasa*-values.

In the illustrations, and in the descriptive plates, these pairs of "opposites", masquerading under similar names have been juxtaposed, and their different pictorial portraits have been exemplified. It will be sufficient to cite here the groups of the analogous names: thus Toḍī (Plate XV) and Tūḍī (Plate XXI) represent differing conceptions. Kānoḍā, wife of Dīpaka (Plate L) is different from Kānoḍā, wife of Mallāra (Plate LI): Rāmakirī, wife of Bhairo (Plate XXXII) differs in conception from Rāmakirī, wife of Mālava (Plate XXXIII,

Fig. A), and also from Rāmakeli, wife of Karṇāṭa (Plate XXXIII, Fig. B): Deśākh (Plate XXXIV), Deśī (Plate XLIII) and Deśakāri (Plate LXXV) represent different melodies; two different melodies are indicated under the analogous names of Lalita (Plate XXXVI) and Lalitā (Plate XXXVII, Fig. D); the verses and pictures illustrating Kedārikā (Plate XLVI) and Kedārī (Plate XLVII) offer divergent portraits; Naṭa (Plate XLIV), Naṭikā, Nāṭa (Plate XLV) and Naṭṭa-nārāyaṇa (Plate LXXIX) embody divergent personifications, and differing emotive values; Sāviri (Plate LXLVI) and Sāverikā (Plate LXLVII) under analogous names conceal different identities.¹

(1) In a series of articles published by the author in the Bengali journal *Saṅgita Vijñāna-Praveśikā*, (Vaiśākh Āṣāḍh, Śrāvaṇa 1341) Čalcutta, the topic has been elaborately discussed.

TIME THEORY

One of the characteristic peculiarities of Indian melodies is their traditional association with particular seasons of the year, and with particular hours (watches) of the day and night. According to the Indian theory, there is some inherent quality in some rāgas which allocate them to particular season, and attune them to the peculiar atmosphere of nature prevailing during a given season, the melody interpreting the spirit of the season, and the seasonal atmosphere echoing sympathetically to the character and essence of that melody. Very antagonistic views have been held by Indian musicians and theorists as to the validity or scientific basis of the so-called relationship between the spirit of a season and its appropriate melodic interpretation, but the theory has been handed down from a period of respectable antiquity. Curiously the earliest texts throw no light on the subject. The works of Dattila, Bharata, and Maṭaṅga offer no clue for this tradition. And it is not until we come to Nārada's *Saṅgīta-makaranda* (a Northern text, probably datable about the 8th-9th centuries) that we come across written authority for this traditional association of melodies with particular seasons and hours of the day. It is quite possible that the assignation of rāgas to particular seasons may be older than the *Saṅgīta-makaranda*. The seasonal festivities are of great antiquity. The Spring Festival (with its variations for festivals assigned to special flowers e.g. *Kaumudīmahotsava*—the great festival of the *Kumuda* flower) is, as we know from ancient dramatic literature, very ancient and was accompanied by gambols at the swing (*hindola*), very picturesquely described by Rājaśekhara (circa 9th century) in his *Karpūra-mañjarī* (ii. 30). It is quite possible that the Vasanta and the Hindola rāgas were melodies specially associated with the spring festivals. The Hindola is the earlier melody, from

which the Vasanta has been derived.¹ Some of the texts identify the two melodies as one.² The Solstice-feasts had their appropriate rituals and festivals, with appropriate music, lute-playing, the dramatic appearance of loose women, and the turn of the sun dramatized by discus-play and by mounting of the swing. "Each of the two solstice-festivities had its *proper* divinity and *melody*, and the melody of the summer solstice was accompanied by drums, to imitate thunder, while that of the shortest day was accompanied by the rattle of war-cars, representing an attack on the evil spirits of winter. The dancing girls round fire, with full water-jugs, and their singing ('a joyous song') were additional popular elements."³ In this way, the Megha-rāga may have become the 'proper melody' of the rainy season, the Vasanta probably became the 'proper melody' of spring. Hindola, which, literally, means 'the swing', was, probably, associated with, the primæval non-Aryan 'Festival of Swing', and, was, later, appropriated by, and affiliated with, the 'Dolotsava', or 'Dola-yātrā', or the Jhūlana festival of the Kṛṣṇa-Rādhā cult, one of the most popular religious festivals in the North-west. Bhairava (Bhairon) was, probably, related to some festival connected with the worship of Śiva, formerly held in the month of Āsvina (September-October) but now amalgamated with the worship of Durgā (*Śūradīyā Pūjā*, literally the Autumnal Festival). Śrī-rāga (lit. meaning Lakṣmī, beauty, riches, the presiding deity of the harvest) may easily be connected with the harvesting season in the winter when the crop is cut, raised, and garnared. In most places in Northern India, the worship of Lakṣmī (Śrī) is timed to synchronise with the collection of the harvest in early winter. Śrī-rāga may, therefore, have been the 'proper melody' associated with the harvest festivals in winter. The melodies Bhairava, Hindola, Vasanta and Śrī-rāga must have

- (1) "Iti Hindolaḥ|| Vasantastat-samudhābhavaḥ||
Pūrṇastallakṣaṇo deśi-hindolo'pyeṣa kathiyate|| 96 || *Saṅgīta-Ratnākara*, Vol. 1, p. 197.
- (2) Hindolaḥ: "Ayameva Vasantākhyaḥ prokto rāga-vicakṣa-
naih" | *Saṅgīta-Samaya-sāra*, p. 17.
- (3) 'Hindu Festivals and Fasts,' Hastings' *Encyclopedia of Religion and Ethics*, Vol. p. 868b.

been the oldest primary rāgas, originally borrowed from the season festivals. The relation of Mālava-Kaiśika (Mālkous) to a particular season is difficult to explain. Pañcama was originally associated with Autumn and was later replaced by Mālava-Kaiśika. Someśvara is the earliest authority to codify the tradition of allocating the six rāgas to the six seasons. According to this authority, quoted in *Saṅgīta-darpaṇa* (1) Śrī-rāga is the melody of the Winter (2) Vasanta of the Spring season (3) Bhairava of the Summer season (4) Pañcama of the Autumn (5) Megha of the Rainy season and (6) Naṭa-nārāyaṇa of the early Winter.¹

The allocation of the six rāgas to the six seasons was never perhaps an invariable injunction and the practice must have varied time to time throughout the ages. Thus, according to the *Saṅgīta-kaumudī*, Vasanta is to be sung during the period between the festival of Śrī-Pañcamī (now identified with the festival of the worship of the goddess Saraswatī) and the great festival of Durgā, and Mālava belongs to the months between the festival of Indra up to the time of the worship of the Regents of the Four Quarters. Various authorities have given varying suggestions for the seasons for the melodies, certain practices are proper to certain regions, and the singers should honour local or regional practices.²

- (1) “Śrī-rāgo rāgiṇī-yuktaḥ śiśire gīyate vudhaiḥ|
 Vasanta sa-sahāyastu vasantarttou pragīyate|| 27 ||
 Bhairavaḥ sa-sahāyastu rtou grīṣme pragīyate|
 Pañcamastu tathā geyo rāgiṇya saha śārade|| 28||
 Megha-rāgo rāgiṇibhir-yukto variāsu gīyate|
 Naṭa-nārāyaṇo rāgo rāgiṇya saha hemake|| 29 ||
 Yatheccchayā vā gātavyā sarvvarttusu sukha-pradāḥ|| 30
 Yatheccchayā vā gātavyā sarvvarttusu sukha-pradāḥ|| 30
 Iti rāgānām rtu-nirṇayaḥ| Iti Someśvara-matam” |
 Quoted in *Saṅgīta-darpaṇam*, Calcutta Edition, p. 75.

Although the six rāgas are assigned to six different seasons, there is no immutable rule, or prohibition to sing any of them in seasons not assigned to it. As the last line suggests, ‘singers have the option to sing any of the rāgas in all seasons, for the sake of pleasure.’

- (2) “Śrī-Pañcamīm samārabhya yāvat-Durgā-mahotsavam|
 Tāvad Vasanto gīyata prabhāte Bhairavādikah||

Whilst associated, on the one hand, with the seasons, the rāgas are also related to specific hours of the day, or night. Each rāga is connected with a special mood, or passion, and it is therefore fitting that each melody should also have a special time appropriate to it. Considerable mystic significance is ascribed to the singing of a particular rāga in its appropriate hour and some music scholars have recently discovered some physiological basis in the structure of the rāgas which seem to offer some rational explanation for assigning particular melodies to particular hours.

It is in the *Saṅgita-makaranda* that we find, for the first time, a classification of melodies according to their proper hours for singing. In this text, melodies are divided into solar or daytime rāgas, and lunar (*candramāmsja*) or nocturnal rāgas. According to this text (Ch. III, 10-23), the time-table of the melodies is indicated below:

Morning melodies: Gāndhāra, Deva-gāndhāra, Dhan-nāsī, Saindhavī, Nārāyaṇī, Gurjarī, Vangāla, Paṭamañjarī, Lalita, Āndola-śrī, Saurāṣṭreya, Jaya-sāksikā, Malhāra, Sāma-vedī, Vasanta, Śuddha-Bhairava, Velāvalī, Bhūpāla, Soma-rāga.

Noon-day melodies: Śankarābharaṇa, Pūrva (?), Vala-hamsa, Deśī, Manoharī, Sāverī, Dombulī Kāmbhojī; Gopī-kāmbhojī, Kaisikī, Madhu-mādhavī, Vāhulī (two varieties), Mukhārī, Maṅgala-kauśika.

Madhyāhṇe tu Varāṭyādeḥ sāyam Karṇāṭa-nāṭayoh|
Śrī-rāga-mālavādestu gāne doṣo na vidyate iti||
Indra-pūjām samāsādyā yāvad-dik-devatārccanam|
Tāvadeva samuddiṣṭam gānam vai Mālavāśaryam||
Evamtu vahudhā-cāryyair-gāna-kālaḥ samiritaḥ|
Yasmin deśe yathā śiṣṭar-gītaṁ-vijñāsa-tathācaret||
Saṅgita-Kaumudī (quoted in S. M. Tagore's
Saṅgita-sāra-saṁgraha p. 112).

The following version is offered in Locana Kavi's *Rāga-taraṅ-gini*, on the authority of Tumburu:

Śrī-Pañcamīm samārabhya yāvatsyāt śayanam Hareḥ|
Tāvad-Vasanta-rāgasya gānamuktaṁ maṇiṣibhiḥ||
Indūtthānam samārabhya yāvad-Durgā-mahotsavam|
Prātar-geyastu Deśākho Lalitaḥ Paṭa-mañjarī|| Poona Edi-
tion, p. 12.

After-noon melodies: Gauḍa and the derivatives therefrom.

Nocturnal melodies: Śuddha-nāṭa, Salaṅga, Naṭī, Śuddha-varāṭikā, Goula, Mālava-gauḍa, Śrī-rāga, Ahari, Rāma-kṛti, Rañjī, Chāyā, Sarva-varāṭikā, Dravatikā, Deśī, Nāga-varāṭikā, Karṇāṭa, Haya-gauḍī.

Singing melodies in hours not appropriate to them are discouraged and this text asserts that, 'melodies are liable to be killed if sung during in-appropriate hours, and whoever listens to them (at wrong hours) courts poverty and shortens his span of life.' Exceptions are made on the following occasions viz., marriages, gifts, and hymns to deities when, singing unassigned melodies, excepting Bhairavī, does not amount to an offence.¹

In the *Saṅgīta-ratnākara*, the theory of assigning times, or hours to the melodies is not alluded to, or discussed. Nevertheless, the hour and the season for singing most of the grāma-rāgas, and some of the Deśī rāgas are casually indicated. Curiously, although the Megha-rāga is described, its appropriate season, or hour is not indicated. The following time-table is derived from the text of Śāraṅga-deva:

First watch of the	Śuddha-Kaiśika, Bhinna-
day (Winter)	.. Kaiśika.
First watch of the	Bhinna-Pañcama, Madhyama-
day (Summer)	.. grāma-rāga, and Śuddha-
	pañcama.
First watch of the	
Noon-time melody	
(Rains)	.. Śaḍja-grāma-rāga.

- (1) "Rāga-velā-pragānena rāgāṇām himsako bhavet|
YaḥS śṛṇoti sa dāridri āyur-naśyati sarvadā|| 24 ||
Vivāha-samaye dāna-devatā-stuti-saṃyute|
Avelā-rāga-mākarṇya na doṣo Bhairaviṃ vinā|| 26
Saṅgīta-makaranda. (G.O.S. XVI, p. 15).

According to *Saṅgīta-mālā*, attributed to Mammāṭa, Vasanta, Rāmakirī, Gujjarī and Surasā can be sung at all times without any offence :

"Vasanto Rāma kirica Gujjarī, Surasāpica|
Sarvasmin gīyate kāle naiva doṣo' bhijyate"|| cited in
Tagore's *Saṅgīta-Sāra Samgraha*, p. 113.

First watch of the day (Autumn	Bhinna-ṣaḍja.
Early part of the day	..	Śuddha-ṣaḍava, Bhinna-kaiśika-madhyama.
Second watch of the day	Gauḍa-kaiśika-madhyama.
During the noon	Gauḍa-pañcama (summer), Gauḍa-kaiśika (winter), Hindola (spring) and Takka-Kaiśika.
During the afternoon	..	Vesara-ṣaḍava, Mālava-pañcama, Souvīra and Takka (Rains).
Last watch of the day	..	Bhoṭṭa, Mālava-kaiśika (winter), Travaṇā.
First watch of the evening	Bhinna-tāna, Śuddha-kaiśika-madhyama.

The day and night are divided into 8 parts or watches (*praharas*, or *yāma*), each of the duration of three hours each.

Locana Kavī (1375-1400 A.D.) in his *Rāga-taraṅginī* cites two different traditions, one ancient, based on the authority of Tumburu, another of later times (*arvācīna*) probably based on the practices current in his time.

Morning melodies Deśākha, Lalita, Paṭamanjarī Vibhāṣā, Bhairavī, Kāmoda, Guṇḍakarī.

Morning-time melody Varāḍī.

Evening melodies Karnāṭa, Mālava, and Naṭa.

The remaining melodies can be sung at any time, except that the melodies Naṭa, Gauḍī, Varāḍī, Gurjarī, Deśī are forbidden during the early part of the day, and that Bhairavī and Lalita should not be sung in the afternoon. Further exceptions are offered during the night after the tenth watch. Lastly, it is asserted that on the stage, and under royal command, singing a melody at inappropriate hours does not amount to an offence.¹ The author sums up the authority

(1) "Daśa-dandāt-param rātrou sarveśām gānamirītam|
Rāga-bhūmau nṛpājñāyām kāla-doṣo na vidyate"||

of Tumburu by suggesting that the melodies appear pleasant and attractive when sung in appropriate hours, and that the rules have been framed on the basis of the structure of the notes.¹

II. Bhairava belongs to the hour before dawn (*brāmhe muhūrte*); Rāmakirī to the time of the first flush of the dawn; Velāvalī, to the early morning. Then comes Subhagā (?). After the early morning come Ṭoḍī, Saṃkarā, and Varādī. To the third watch of the day belongs Āśāvarī. To the noon belong Kāphī and Sāraṅga. Naṭa and Mālava are to be sung during the afternoon. The evening is the time for Gaurī. At the beginning of the night, Kalyāṇa should be sung, and Kedāra should be sung late at night. Karṇāṭa belongs to the second watch of the night, while, Ādanā belongs to the third watch. Sourāṣṭra is assigned to the afternoon, Pañcama to the morning, while Mallāra belongs to the hours of the cloudy sky.

Pundarikā Viṭṭhala, does not treat the topic separately. But in his *Rāgamālā*, and *Sad-rāga-candrodaya*, he indicates, —the appropriate time for each of the rāgas described by him, and from these indications the following time-table has been derived:

Early Morning Melodies	.. Śuddha-vaṅgāla, Karṇāṭa-van-gāla, Mallāra, Vasanta, Madhu-mādhavī, Kāmbhojī, Suhavī.
Sunrise Melodies	.. Śankarābharaṇa, Turuṣka-Toḍī.
Morning Melodies	.. Toḍī, Lalita, Bhairava, Bhairavī, Tuḍikā, Vibhāṣā, Gurjarī, Pañcama, Gouṇḍakriti, Dhan-nāsī, Deśākṣī, Nārāyaṇa-Gouḍa, Velāvalī, Madhya-mādi, Bhupālī (?), Sāverī, Hindola, Sāmanta, Vahulī.
Noon-tide Melodies	.. Śuddha-nāṭa, Sālāṅga-nāṭa, Deva-kriti,

(1) “Yathā kāle samārabdham gītaṃ bhavati rañjakam|
Ataḥ svarasya niyamād rāge’pi niyamaḥkṛtaḥ||

Rāga-taraṅginī,

		Deśikāra.
Afternoon Melodies	..	Vāhulī, Sāranga, Jayata-śrī.
Sunset Melodies	..	Gauḍī, Revaguptī, Śrī-rāga, Kāmod, Ābhirī, Travaṇī, Kalyāṇa, Śuddha-Gauḍa, Devakri, Sālanga-nāṭa (?), Karnāṭa.
Evening Melodies	..	Kalyāṇa, Śrī-rāga, Guṇa-karī, Kāmbhojī, Gauḍa, Drāvīda- Gauḍa, Sourāṣṭrī, Chāya-nāṭa, Sāmanta, Pāḍī, Nāda-rāma- kriyā, Varālī, Ravaṇa, Jijā- vanta (Jhijhint), Hamira- nāṭa, Sāverī, Vihāgaḍa
Nocturnal Melodies	..	Kedāra.
Melodies suitable for all hours ¹	..	Mukhārī, Kuraṇjī, Rāma-kri, Vaṅgāla, Āśāvārī (?), Prathama-manjarī, Deva-gān- dharā, Mālava-śrī, Bhairavī, Saindhavī, Naṭṭa-nārāyaṇa, Hijeja, Śuddha-varāṭī, Deśī, Paraja-Vaṅgāla, Śyāma, Tak- ka, Mālaśrī.

The Śuddha-nāṭa offers some difficulties. In the *Sadrāga-candrodaya* (p. 18) it is assigned to the middle of the day² while in the *Rāgamālā* (p. 22), it is assigned to the evening.³ Likewise, Bhūpālī, considered as an evening melody in current practice is assigned in the *Sadrāga-candrodaya* to the morning.⁴ Similarly, Bhairavī regarded as a morning melody (*prabhāte*) in the *Rāgamālā* is assigned to all hours in the *Sadrāga-candrodaya*.⁵

(1) 'Sadā,' 'sataṭam,' 'nityam,' 'śāśvad,' 'sadāhar-niśim,' 'divā-niśam,' 'anavarata-nāḍa'.

(2) "Syāt śuddha-nāṭo'hani tūrya-yāme"|| *Sadrāga-candrodaya*, p. 18.

(3) "Sandhyāyām rāja-mārge sāradi hayagati rājate śuddha-nāṭaḥ", | *Rāga-mālā*.

(4) "Bhūpālīkā prātarasou vigeyā"|| *Sadrāga-candrodaya*, p. 19.

(5) "Sadā Bhairavikā geyā"|| *Ibid*.

Rāmāmatya, without commenting on the topic, indicates the appropriate hours for some of the melodies in his *Svara-kalā-nidhi* (Ch. V) from which the following time-table has been derived:

Early morning:	Mallārī, Velāvalī, Sāverī.
Morning:	Lalita, Dhannyāsī, Nārāyanī, Karnāṭa-Vaṅgāla, Vasanta- Bhairavī, Bhūpalī.
Former part of the day (<i>pūrva-yāme</i>):	Deśākṣī, Baulī Gaunḍakriyā.
Afternoon:	Śudda-rāma-kriyā.
Latter part of the day (<i>paścime-yāme</i>):	Naṭī, Sāraṅga-naṭa, Bhairavī, Karnāṭa-gauḍa, Hejujji Madhyamādi, Revaguptī.
Fourth or last part of the day (<i>carama-yāme</i>):	Sāmanta, Śuddha-Vasanta, Kedāra-Gauḍa, Nāda-rāma- kriyā, Pāḍī.
Evening:	Mālava-Gauḍa, Śrī-rāga, Kaṃ- bhōjī, Rīti-Gauḍa, Saurāṣṭra,
Sung at all hours (<i>sarva- yāme</i>):	Varālī, Mukhārī Mālava-Śrī, Hindola, Sāmavarālī, Nāga- dvani, Soma-rāga, Ghaṇṭā- rava, Bhinna-ṣaḍja.

A peculiar suggestion is that Bhairavī should be sung during the latter part of the day, which seems to mean, the afternoon.¹

Somanātha (1609 A.D.) in his *Rāga-vivodha* (Ch. V) devotes ten verses to the time-theory which we cite here from the translation given in Mr. M. S. R. Aiyar's Edition (Madras, 1933 p. 27):—"The Timings of the Rāgas."

"7-10. The Rāgas beginning with Śaṅkarābharana should be sung at daybreak; the Rāgas beginning with Jaithaśrī, in the morning; the Rāgas beginning with Ṭoḍi, in the dawn; the Rāgas beginning with Goṇḍa, in the noon;

(1) "Sampūrṇo Bhairavi-rāgaḥ sanyāsaḥ śaṁśako mataḥ||
Ṣaḍja-grahas tathā geyo yāme'hnah paścime ca saḥ" || 25 ||
Svara-kalā-nidhi, Aiyar's edition, p. 35.

MAI LA VILA MAI LA VILA DE RĂDINE

the Rāgas beginning with Bahulī, in the afternoon; the Rāgas beginning with Saurāṣṭra, in the evening; the Rāgas beginning with Suddha-nāṭa, in the dusk, and the Rāgas beginning with Karnāṭa, in the night. And finally the following Rāgas may be sung always:—Mālā-śrī, Dhavala, Mukhārī, Rāmākriyā, Pāvakā, Saindhavī, Āsāvārī, Gāndhāra, Māravī and Paraja. The above-mentioned Rāgas deserve to be sung successively in their respectively appointed times.”

In verses (37-166) further indications are given as to rāgas to be sung at different parts of the day, or night.

In the *Saṅgita-darpaṇa* (c. 1625 A.D.), the following time-table of the melodies is indicated:

Morning (3 hours from day-break)¹:

Madhumādhavī, Deśakhya, Bhūpālī, Bhairavī, Velāvalī, Mallārī, Vallārī (? Vaṅgālī), Soma Gurjjarī, Dhanāśrī, Mālavaśrī, Megha-rāga, Pañcama, Deśakārī, Bhairava, Lalita, Vasanta.

Morning (after the first watch):

Gurjjarī, Kauśika, Sāverī, Paṭa-mañjarī, Revā Guṇakirī, Bhairavī, Rāmakirī, Saurāṭī.

Day-time (after the third watch):

(Gauḍī), Trivanā, Naṭṭa-kalyāṇa, Sāranga, Natta, Naṭas (all varieties), Karnāṭī Ābhīrikā, Vada-hamsī, Pāhāḍī.

None of the melodies is specially assigned to the evening hours, but it is generally asserted that ‘these melodies (that is to say, the last group assigned to the hours after the third watch) are pleasant to hear up till mid-night.’² ‘The melodies are to be sung at appropriate hours, following ancient traditions, except that in performances under royal com-

(1) “*Prātarārabhya praharam yāvadityarthaḥ*” (S. M. Tagore’s note, in his edition of *Saṅgita-darpaṇa*, p. 73).

(2) “*Ardha-rātrāvadhi-jñeyā ete rāgaḥ sukha-pradāḥ*”

(*Ibid*, p. 74).

mand, time is of no consideration.¹

In an excellent paper² read before the Fourth All-India Music Conference at Lucknow (1925), Pandit V. N. Bhatkhande, expounding the time theory of rāgas, has pointed out the two-fold division of the rāgas into (i) Pūrva rāgas i.e. rāgas fit to be sung between mid-day and mid-night and (ii) Uttara rāgas i.e., rāgas fit to be sung between mid-night and mid-day. The significance of this classification with reference to the time theory is thus explained by him: "Now it will be observed that in the case of rāgas falling under the first division (Pūrva rāgas) the *vādī* note will be one of the following notes: sa, ri, ga, ma, invariably, and that in the case of the rāgas falling under the second division (Uttara rāgas), the *vādī* note will be one of the following notes: ma, pa, dha, ni, sa. The whole scale for this purpose is supposed to be made up of two "Aṅgas," (parts), namely, the Pūrvāṅga, and the Uttarāṅga. The Pūrvāṅga extends from 'Sa' to 'Pa', and the Uttarāṅga from 'Ma' to 'Sa'. In other words, then, in the case of the Pūrva rāgas, the *vādī* note always falls within the Pūrvāṅga and in the case of the Uttara rāgas, the *vādī* note always falls within the Uttarāṅga. From this you will see, that the proper location of the *vādī* note will enable you to determine whether a particular rāga is to be sung between mid-day and mid-night, or between mid-night and mid-day."³ The relation of the time to be assigned to the Pūrvāṅga rāgas *inter se* is determined on another principle deduced from the structure of the rāgas. For this purpose rāgas can be divided into three groups: (i) Group taking sharp-ri, -ga, and -dha. (ii) Group taking flat-ri, and sharp-ga and -ni. (iii) Group taking flat -ga and -ni.⁴

(4) "Ri-ga-dha-tivṛakā rāgā varge' grime vyavasthitāḥ||
Sandhi-prakāśanāmānaḥ kṣiptā varge dvitīyake||
Tr̥tīye nihitāḥ sarve ga-ni-komala-manditāḥ||"

It will be seen that the rāgas belonging to the first group, are sung between 7 P.M. up to mid-night, and between 7 A.M. and mid-day. While the rāgas of the second group are sung between the 4 P.M. and 7 P.M. and 4 A.M. and 7 A.M. These correspond to Pūrva-rāgas to be sung in the evening, the Uttara-rāgas to be sung in the morning. They are designated 'Sandhi-prakāśa' rāgas (i.e. melodies which unify the two other groups). For the rāgas, belonging to the third group, come between the first and the second group.¹

Thus, the *vādī* note will determine whether a rāga belongs to the Pūrva, or Uttara group, and an analysis of the note-structure will determine during what quarter of the day or night, a particular rāga is fit to be sung. Another determinant element is offered by the use of the note sharpened 'ma' (*tīvra madhyama*). "Most of the rāgas taking a *tīvra ma* in their construction are rāgas assigned to the period between sunset and sunrise. The note Madhyama (f), therefore is looked upon as an 'Adva-darsika' or guiding note.² This function of the note 'ma' (f) is very picturesquely illustrated by Vyankatamakhi in his *Catur-daṇḍi-prakāśikā*: 'Just as by a drop of curd, a jar of sweet milk is converted to the quality of curd, so by the introduction of the note 'ma', a Pūrva rāga melody is turned into an Uttara-rāga melody.'³ Pandit Bhatkhande cites Pūrvī and Bhairava; Kalyāṇa and Bilāwala as practical illustrations of this principle. Thus, the

Catur-daṇḍi-prakāśikā, Poona Edition, p. 24.

Bhairava *ṭhāt* can be changed into the Pūrvi. *ṭhāt* by the substitution of *tīvra madhyama* for *Śuddha-madhyama*. So, we find that the melodies of the Bhairava group e.g. Bhairva, Yogiya, Vibāsa, Gunakarī etc., take the *Śuddha-madhyama* and are sung in the morning; while those belonging to the Pūrvi group, viz., Śrī, Gaurī, Jeta-Śrī, Puriyā-Dhānesvarī, Mālavī, Travānī, use the *tīvra madhyama* and are sung in the evening. The *Sandhi-prakāśa rāgas*, assigned to the period of time which represents the junction (*Sandhi*) of the day and night, use both the madhyamas; one group is sung just before sunrise (e.g. Lalita, Pañcama, Bhāṭiyāri, Rāmā-keli etc.) while the other group, (Pūrvi and its cognates) are sung just after sunset.

It follows, therefore, as a result of the analysis of the note-structure of the rāgas, that "Rāgs taking both Ri and Dha komala, Rāgs with both Ri and Dha Tīvra, or Ga and Ni Tīvra, and Rāgs containing both Ga and Ni Komal, will succeed, one after the other, in order of time."¹

Since, rāgas connote different and differentiated states of feelings, or emotive flavours (*rasas*), Indian theorists lay great stress on their relative difference in note-structures, corresponding to their relative emotive significances. A correct apprehension of the form of an individual rāga, therefore, involves an accurate understanding of its differences from cognate and other forms of related rāgas. The grouping and classification of rāgas, according to some principles or other, have, therefore, provided important chapters in all ancient text-books. These principles have varied from time to time, and have led to a bewildering variety of catalogues, groups, and classifications. For the purpose of convenient comparisons, we have set out a large variety of groups, or classifications in tabulated forms, arranged as far as practicable in a chronological sequence in the Appendices, (a list of which is summarised on the page opposite). It is not always possible, without accurate informations as to the note-structures of rāgas current at different periods of evolution, to discover the principles on which rāgas have been grouped, or classified. Various principles of

(1) S. N. Karnad: "Time Theory," Report of the *Fourth All-India Music Conference, Lucknow, 1925*, Vol. II, pp. 202-08, at p. 205.

grouping have been evolved and followed during a long course of evolution which can be usefully studied in the Appendices.

The earliest classification of the *rāgas* has been based on the number of notes used in their structures, according to which they fall under (1) *Oḍava* (five-notes), (2) *Khāḍava* (six-notes), and (3) *Sampūrṇa* (seven-notes) classes, or types. Dattila, the earliest musical authority of some reasonable authenticity, gives another principle of classification (later followed by several text-writers). He catalogues the melodies under 18 *jātis* (species) of which seven are named after the seven notes and the remaining eleven according to their component notes. This is followed by Bharata, who basing the classification under *jātis*, evolve from the *jātis*, a group called *grāma-rāgas*, which are generic *rāgas* themselves, derived from the *jāti-rāgas*. As the two groups of *rāgas* are classed under two *grāmas* (scales), seven under *ṣaḍja-grāma*, and eleven under *Madhyama-grāma*, they came to be designated as *grāma-rāgas*.

As has been pointed out, "Songs (*gītis*) have been sung long before the *rāgas* as such were formulated" (Fox-Strangeways). By the time of Maṭaṅga, the songs, or melodies (*gītis*) were grouped under seven classes of which the fifth, viz. the *rāga-gīti* was the most significant, the group of melodies being recognised by the name of 'rāgas'. They were seven in number, some having proper names derived from the names of early tribes, or from ancient culture areas. As new melodies were discovered or accepted they were affiliated to one or other of these seven *rāga-gītis*, which were regarded as root-rāgas, and the new melodies were accepted as *bhāṣās* or derivatives of the root-rāgas, or major melodies. As other new melodies were discovered, or evolved,—they were accepted as *bibhāṣās* (derivatives of *bhāṣās*) and as *bhāṣāṅgas*, *kriyāṅgas*, and *rāgāṅgas*. The relation of *rāgas* and *bhāṣās* and *bibhāṣās* are akin to the later classification of *rāgas* and *rāgiṇīs*.

We have another system of classification, into *śuddha* and *vikṛta* *jātis* (species) according to the use made of *śuddha* (pure, natural, normal) notes, or *vikṛta* (chromatic) notes. This is referred to both in Bharata (*Kāvya-mālā* edition, p. 308) and in the *Saṅgīta-ratnākara* (Poona edition

p. 74-76).

Somewhat akin to this classification,—is another classification of rāgas into 'Śuddha', 'Sālaṅka' and 'Saṅkīrṇa'. A Śuddha rāga was understood to represent a melody which follows its own individual structural form, without carrying the suggestion of any other melodies. Sālaṅka sometimes called *Chāyā-laga*, carrying the 'shadows', or reflections of other melodies) rāgas are those compounded of two distinct rāgas. It is a 'mixed' melody, a compound, or an amalgam of two rāgas, a 'hybrid'. In *Rāga-taraṅginī*, a chapter is devoted to describing the component modes of hybrid melodies. Some masters e.g. those in the course of Mān Thomar, specialised in evolving new types of hybrid melodies by combining well-known modes. This combination of melodies is technically called 'crossing of modes' (*rāga-saṅkara*). Hence, a mode derived by crossing more than two melodies can to be known as *sankīrṇas* (cross-breeds). This principle of classification survives in the *Nāṭya-locana*, which cites 44 melodies of the Śuddha type, 16 of the Sālaṅka type, and 22 of the 'Sandhi' (probably an equivalent of *Saṅkīrṇa*) types.

Then followed the principle of classifying the rāgas according to structural affinity, or resemblance of note-structure. This sometimes involves grouping of similar melodies under one group, or genus, a group of rāgas. The Northern and Southern systems followed different methods, if not, different principles of classification.

When we come to Nārada's *Saṅgīta Makaranda*, we have the beginning of the Northern system, in which the major rāgas are treated as 'masculine' melodies and minor melodies are treated as 'feminine' melodies, affianced, or affiliated to the major melodies. Thus Nārada gives two different schemes, in the first of which he enumerates eight major melodies with three minor melodies assigned to each, and in the second, he enumerates six major melodies with six minor melodies (female rāgas) assigned to each, the earliest enumeration of the traditional "thirty-six rāgaṇīs."

The Northern and the Southern systems of classification, originally, involved no fundamental difference of principles. In the Southern system, the derivative melodies were called '*janyas*' or derivatives of the major melodies

which were called *janakas* or 'fathers' (later called *melakas*, or unifiers). In the Northern system, the minor melodies were picturesquely called 'wives' of the major melodies, and the later derivatives, designated as sons (*putras*), just as in the Southern system the '*janyas*' are in the position of the sons of the '*janakas*' (the fathers).

The Northern system is followed in the following texts: (1) *Sanḡita Makaranda* (Appendix 4), (2) *Sanḡita-ratnamālā* (Appendix 5), (3) *Mānasollāsa* (Appendix 8), (4) *Rāḡārṇava* (Appendix 12), (5) *Rāga-sāgara* (Appendix 11).

The Southern, or the Carnatic system is followed in the following texts: (1) *Sanḡita-ratnakara* (Appendix 9), (2) *Sanḡita-taraṅginī* (Appendix 16), (3) *Svaramela-kalānidhi* (Appendix 17). (4) *Rāga-Vivodha* (Appendix 20), (5) *Caturdaṇḍi-prakāśikā* (Appendix 24), (6) *Sanḡita-sudhā*.

In the Southern system, the secondary, or minor melodies (*janyas*) are formed, principally, by using in a new combination five or more of the notes used in the primary, or major *rāgas* (*janaka*), variations being obtained from the primary *rāgas*, by omitting certain notes in the ascent, or descent.

DEIFICATION AND VISUALIZATION OF MELODIES

There is a doctrine inherent in the Indian theory of melodies which helps one to understand the fundamental psychic values of rāgas, and to apply them to requirements of particular emotional situations; or interpretations. It is believed that each rāga, or rāgiṇī has its peculiar psychic form, corresponding to its sonal body over which the former presides as the nymph, deity, or the devatā (presiding genius, or god) of that particular melody. This deity, or image-formed dwells in the super-terrestrial regions,—the world of musical symphonies,—from which it can be invoked and induced to descend to earth through the prayers of the musical performer with the aid of a definite symphonic formula peculiar to each melody. This idea is, evidently, coloured with the doctrine of image-worship as known in the Hindu-Brahmanical religious thought. By the earnest prayers and spiritual exercises (*sādhana*) of the worshipper (*sādhaka*), the divinity comes down and incarnates in the form of the image for the benefit of the worshipper. Each image has its definite means of approach, the *vija-mantra*, a method of prayer through the 'seed-formula', and the deity only answers to prayers couched in the mystic words, or letters prescribed for each, each letter-formula having the mysterious power,—the inherent quality of invoking a particular deity. The application to the theory of Indian music, this doctrine of image-worship, i.e. the idea of invoking the presiding deity, or the spirit of the divinity by means of a dhyāna-formula,—an evocative scheme of prayers for contemplation,—has led to the conception of the forms of rāgas and rāgiṇīs in dual aspects viz., as audible Sound-Forms, and as visible Image-Forms—*nāda-maya rūpa* and *devatā-maya rūpa*. This doctrine, inherent in the theory of rāgas, is casually alluded to in the earlier texts, but is not clearly

enunciated in any text before the *Rāga-vivodha* (Pañcama viveka), where, after indicating the appropriate hours of melodies, the author describes the two-fold forms (*rūpa*) of melodies¹:—"That is called *rūpa* which by being embellished with sweet flourishes of *svaras* (notes) brings a *rāga* vividly before one's mind. It is of two kinds—*Nādātma* (one whose soul or essence is sound), and *Devamaya* (= *devatā-deha-mayaṃ*, one whose soul, or essence is an image incarnating the deity), of which the former has many phases, and the latter has only one" (M. S. R. Aiyar's translation; the words in bracket have been added for elucidation). The author then describes his symbols (*saṅketa*) for his notations, and describes the melodies in terms thereof, and thereafter remarks:² "Having (already) expounded the many sound-forms of those *rāgas*, we will now proceed to relate in proper sequence, the image-forms of each and every one of them."

According to one text³ 'the images (*vigraha*) of the melodies emanate from the Supreme Deity (Brahma) and their function is to worship the Supreme Deity.'

According to the doctrine, it is believed that the presiding deity,—the spirit, or *ethos* of a *rāga* or *rāgiṇī* can be induced to come down and incarnate ('*avatīrṇa*'—lit. 'made to descend') in its physical sound-form (*nāda-maya-rūpa*). If the presiding spirit cannot be induced 'to descend', the rendering, or interpreting of that particular melody cannot be pronounced to have been successfully achieved. A successful interpreter of a particular melody is complimented with the phrase that he has succeeded in persuading the deity of the *rāga* or *rāgiṇī* to descend (*avatīrṇa*) and to reveal its visual image or picture (*tasvīr*), and to live in his vocal song, or his instrument of performance. No amount of

mechanical reproduction of its symphonic structure can put life into the melody and make it alive. And unless it is alive in the song, or instrument, it does not fulfil its purpose. A *rāga* or *rāgiṇī* is something more than its physical form,—its symphonic structure,—its ‘body’. It has a ‘soul’ which comes to dwell and inhabit in the ‘body’. In the language of Indian poetics, this ‘soul’—this principle is known as the *rasa*, flavour, sentiment, impassioned feeling, or simply, passion, or aesthetic emotion. It is this emotive principle, the presiding sentiment, or passion, which is evoked by the peculiar combination of the notes, the *svaras*. For, according to the Indian theory, each *svara*, or note has a peculiar emotive value, symbolised by its presiding deity (*svarānām devatā*), and has its interpretive seer, sage, or expounder (*ṛṣi*).¹ Particular notes (*svaras*) have peculiar quality of interpreting particular emotions. Thus, the notes ‘sā’ and ‘ri’ (c and d) are said to be appropriate for interpreting the emotions of heroism, wonder, and resentment; the note ‘dha’ (a) is suitable for emotions of disgust, and terror; the notes ‘ga’ and ‘ni’ (e and b) are suitable for emotions of sorrow, and the notes ‘ma’ and ‘pa’ (f and g) are suitable for emotions of humour and love.² And it is the *vādī-svara*, the speaking or the dominant note which determines the character of the *rasa*, or the flavour or the emotion of the melody. The *devatā* or the image-form is the *svarūpa*, or the incarnation of the *rasa* of the *rāga*. A successful performer (*sādhaka*) must be familiar with the image-form as well as the sound-form. The one is the means to the achievement of the other. And educated interpreter makes the spirit of the melodies live, while an untrained one is

supposed to kill, or slaughter it. A perfect mastery of the technique is necessary to call up the picture in all its characteristic outlines, features, and limbs, its shades, and colour-schemes. An indifferent technician is apt to distort the features and limbs of the deities of the melodies. This is well illustrated in the legend of Nārada, the great mythic interpreter of Indian music. During his early practices of the science, when Kṛṣṇa wished to convince him that the former's musical practices had not yet given him the necessary technical perfection, Nārada was taken to a celestial region where he found several wounded nymphs and angels, weeping in great misery, for, their limbs had been distorted and mangled. When Nārada enquired of the reason of the pitiable plight of the nymphs,—he was informed that they were the melodies (rāgas and rāgiṇīs) whose limbs have been broken by Nārada's unskillful attempt to render their true and accurate forms, in the course of his clumsy practices. The suggestion was that if one desires to invoke the spirit of the rāgiṇīs to descend from their celestial abode and live in their physical sound-forms, the latter must be delineated with loving tenderness, scrupulous care, reverence, and devotion,—with all the accuracy of technical performance, as well as of spiritual vision. As the Kinnara (fairy) in one of the old tales of the Jātakas says: “To sing ill is a crime.”

It has already been indicated that the sound-form of a rāga is the medium—its kernel, or, body, so to speak, through which the spirit of the rāga manifests itself. The objective of the rāga is the *rasa*—the aesthetic emotion, the theme, the subject-matter,—the *motif* of the melody. As the soul must inhabit a body, so every *rasa* is incarnated in the *rūpa* (form) of particular rāga or rāgiṇī. To invoke the *rasa*, one must mediate upon the *rūpa*. Each particular form of rāga—is suitable for the expression of a particular type of *rasa*, that is to say, each rāga is associated with and is the medium of a particular *sentiment*, or *emotion*—its characteristic and definite *ethos*. A musician should, therefore, have a knowledge of the relation of the rāgas to their associated *rasas*—the form of a rāga being a perfected vocabulary, or phrase to express in a significant and an impressive manner a particular class of emotion. From very early times, a knowledge of this *form* and its *contents*,

was considered a *sine quo non* of musical education. It is necessary to realise what the *Devatā*, or the image of the deity of a rāga stands for. Unlike the conception of the innumerable divinities in the Hindu Brahminic or Buddhist-tantric (Mahāyānist) pantheons, the musical divinities—the presiding genuises of the rāgas are not conceived and symbolised in individual image-forms or icons. The *devatās*, no doubt, stand as the symbols or the personifications of the essential *rasa*—the theme, or objective of each rāga. But their plastic representation invariably takes a *dramatic* rather than an *iconic* form, a dynamic as opposed to a static visualisation. In the iconography of images, it was necessary to distinguish the bewildering conceptions of Brahmanic gods—by devising differentiating features of heads, arms, weapons (*āyudha*), vehicles (*vāhanas*), and poses (*mudrās*). In describing, or symbolising the character of a *rasa*, it was possible to suggest the same by an individual icon, or image. *Rasa* is a state of the mind—its expression can only be effective and adequate in a dramatic form,—it lives in an environment and in relation to other realities,—in moods and in phenomena. The *rasa* of the presiding principle of a rāga is rendered through *actions*—rather than in *images* through symbolised icons. The *Devatās* of the world of music—have also their *dhyānas*—contemplative prayer-formulas,—but they usually take a dramatic pattern,—rather than the static iconic phrase—of the religious images. They are the picturization of emotions in a concrete and plastic form answering to, rather than symbolising, the abstract states of the mind. They are depicted in an appropriate dramatic and emotional setting—the *surrounding* circumstances which give rise to the various emotion. In a general sense, music is the universal language of emotions. Music of all races and countries is made the vehicle of human feeling. The Indian system cannot claim a special feature in this respect. All systems of music have evolved, according to each racial temperament, different melodies connoting joyous, sad, or heroic feelings. All phases of Western music have airs or “tunes” answering to various moods of the mind. The Indian melodies have similar connotations. The Vasanta rāga is the human reaction to the joy of life in Spring, Megha-rāga, to the advent of the rains,—with all the exu-

berance of desire and opportunity for enjoyment. Puravī,—the evening melody, is the lamentation of nature for the parting day. Āsāvārī is the melancholy pleading of a grievance for a just redress. Bhairavī—is the melody of love and devotion. Madhumādhavī bespeaks the peace of love and contentment. Lalita stands for unsatiated love, and the sorrow of separation at day-break. Ṭoḍī—is the surrender of animal life to the magic and enchantment of the beauty of nature. Naṭa—is the symbol of the heroic or martial spirit in man. And so on. We have a complete vocabulary in terms of significant melodies—to express the whole gamut of human feeling in all shades and varieties of moods, skilfully woven with the moods of nature. The special feature of the Indian system of melodies arises from the fact that while in Western music—there is room for more than one moods in the same composition,—each Indian melody has for its theme one definite mood—which must not be departed from, or variegated, or tintured by the shade, or colour of any other feeling. Each melody is, as it were,—dedicated to its own theme,—its *ethos*, its presiding genius,—its *devatā*. And it is by the prayer of the musician,—the singer, or the interpreter,—who has to immerse and identify himself in the theme,—that the *devatā*—the spirit of the melody is made visible (*mūrtimanta*) in the symphonic form,—the *nādamaya rūpa*. Before he can call up the *devatā* of any rāga—by his prayers,—the interpreter (the worshipper of the rāga) has to visualise the image in his mind. For this purpose,—the *dhyānas* for contemplations appear to have been formulated.

These *dhyāna*-formulas in the shape of Sanskrit verses and quatrains represent the *devatā-maya-rūpa*, the image-forms of the rāgas and rāgiṇīs. They are the sources and the bases of all pictorial representations of the Indian melodies—the well-known ‘Rāga-mālā’ pictures. In these verbal descriptions—the essential character,—the spirit,—the *rasa*,—the *emotional objective* of each rāga, or rāgiṇī is indicated. Very often symbolistic details of the colour of the dress,¹ the nature of the complexion of the *dramatis*

Iconography
of Rāgas:

(1) It was at one time believed that the scheme of colours—in the distinct varieties of the colour-notes of the different parts of

personae of each representation are significantly indicated. In many of these personifications,—particularly those which have the many phrases of human love for their theme,—the principles of old Indian love-lore, and erotics, (*rasa-śāstra*) have been applied—and the personages have been conceived in terms of the classic conventions of ‘love-heroes’ and ‘love-heroines’ (*nāyakas* and *nāyikās*)—in all the rich variety of their moods and types. The introduction of these poetical ideas has not only enriched the significance of the musical expressions,—but has, also, helped to achieve a happy and a subtle unification of literary and musical ideas. It is a profoundly expressed truth—that music begins where the language of words fails. It is equally true that in some sense, music is a much more definite language than the language of words. And very properly, music has jealously guarded the frontier of its kingdom from the attack, or intrusion of the language of words. There is an interminable controversy—as to what extent the words of a song embarrass the expression of pure musical values. The intrusion of literary ideas in the world of music cannot but be disastrous to musical expression, and, as is well-known, the literary criticism of music is one of the most tragic things of life. The imageries and ideas borrowed from Indian poetics and love-lore and incorporated in the contemplative verses (*dhyānas*) describing the Indian *rāgas*, stand, however, on a very different footing. They are, by no means, a description of the musical values but an indication of the *rasa*—the nature of the emotions for which the melodies stand. They are not, strictly speaking, literary explanations but a co-relation and a paralellism with imageries which arose out of the experiences of life common to musicians and poets. It is really in the pictorial versions

a *rāgiṇī* picture had a significant correspondence to the distinctive notes which made up the structure of the particular melody, the seven colours answering to the seven notes of the musical scale. The theory is very tempting, particularly with reference to the limited palettes of the early *rāgiṇī* ‘primitives’, but it is impossible to demonstrate that the artists of the *rāgiṇī* pictures were guided in their choice of particular colours used by any consideration of the structural, or sonal composition of the melodies they illustrated.

that an attempt has been made to interpret the presiding *rasa* of every *rāga* in elaborate forms in appropriate environment and atmosphere, with illuminating vision and sympathetic intuition. To those educated in the language of music—and the significance of a musical vocabulary,—these literary, or plastic aids might appear redundant, or useless. At any rate, these *dhyānas* and their pictorial illustrations must be taken to date from a period later than that in which the melodies were discovered, or revealed and were understood by contemporary culture in their fullest significance through the medium of the musical language itself without any adventitious aids from other languages. They may have become necessary for the purpose of keeping in tact—without any risk of confusion—the individual entity of each *rāga*, and for the purpose of systematising them in a graphic form for educational purposes. It is a notorious fact that from the time musical practitioners neglected the *rasa* or emotive aspect of melodies,—indicated in the iconology and the pictorial illustrations, there has been considerable confusion in interpreting the peculiar genius of each *rāga*—in terms of its characteristic symphonic values. The psychology of *rāgas*—being the very basic of Indian music, an understanding of the emotive significance of each *rāga* was an essential part of the education of an Indian musician, from very early times.

It is not possible to indicate, in the present state of our knowledge, when the iconography of the *rāgas* was first evolved and the prayer-verses formulated. All the Sanskrit verses surviving to-day, appear to be very late compositions. The existing body of *dhyāna* texts show that they were composed at the time when all the three schools of Brahmā, Nārada and Hanumāna were known and practised. For we have different verse-formulas for all the *rāgas* according to the three schools. Where the conception of a particular *rāga* in any two schools is identical,—a similar or closely analogous iconographic formula is used. The verses relating to the original six classic *rāgas* and 36 *rāgiṇīs* may be very old,—but as new *rāgas* came into vogue, Sanskrit verses indicating their character were composed at very late times. For instance, the *Turuṣka-Gauḍa*—which is very well known to have been introduced after Āmīr Khusrau (14th century)

has been honoured by a contemplative verse in Sanskrit.¹ The fashion of composing these verse-formulas appears to have survived much later.

There is no doubt that the two phases of a melody, the sound-form, and its corresponding image-form, were recognised from early times, though we have not yet come across any reference to this dual aspect in the texts earlier than the *Rāga-vivodha*. The *devatā*, the presiding genius of each rāga is, indeed, referred to in many of the old legends, and also indicated in earlier texts, though the images, or pictures of the melodies are not described in any of the earlier texts.

(1) “*Vire ca raudre ca Turuṣka-Gauḍo*

Niṣāda-jāṃśo ri-pa-varjitaśca|

mūrtistu nivandhāntare|

Turuṣka-Gauḍa āruhya haya-prṣṭhe’ ruṇa-dyutih|

Śaṅkha-kaṇṭhopanītaśca soṣṇīṣaḥ kavacā-vṛitaḥ||

S. N. Tagore, “*Saṅgīta-sāra-saṃgraha*,” p. 106.

Translation:

Turuṣka-Gauḍa is employed in heroic and martial sentiments. The expressive note is *ni*, and the antiphonic notes are *ri* & *pa*.

The image is thus described:

“Turuṣka-Gauḍa has a complexion rosy as the dawn,

He is mounted on a horse, clad in armour and carries a turban.’

The corresponding Hindī verse furnished by Harivallabha does not agree with the above in iconographic conception: [Turuṣka-Gauḍa is a melody different from Turuṣka-Toḍī]:

“*Aṅga lasai bhukhana vasana Turakhāneki rit|*

Kahe Turaka-Toḍī hai pive surā kari prit”||

Translation:

‘Bedecked with jewelleries and dressed in Turkish modes (he) drinks with great zest. Such, it is said, is Turaka-Toḍī.’

 collection of Mr. Ajit Ghore, Calcutta.

RAGAMALA TEXTS

In connection with the various archaic melodies (*grāma-rāgas*, *rāga-gītis*) described in the *Bṛhad-deśī*, the *rasa*-value, and their applications (*vinīyoga*) with reference to a situation in a drama, are indicated for each melody described. Unfortunately, the presiding deities for the melodies are not indicated by Matanga, though he cites the presiding deity for each musical note (*svara-devatā*). In the present state of our knowledge of the earlier texts, it is impossible to date the time when the presiding principles of melodies were first revealed, discovered, or recognised. In some of the contemplative verses of prayer-formulas (*dhyānas*) for the melodies, Kohala, (an ancient authority earlier than Matanga and Dattila) is cited as an authority for images, or pictures of particular *rāgas*.¹ But unless the actual texts of Kohala are discovered and investigated, it is impossible to attach any evidentiary value to this ascription. The earliest avail-

Kohala:

(1) Thus the verse describing the 'picture of Gaudī ends by saying 'Gaudī is thus spoken of by Kohala ("Gauḍīyamuktakila Kohalena"). This may be an irresponsible or apocryphal ascription for the purpose of lending a spurious halo by invoking the name of an ancient authority.

The verse describing Gaudī is cited in three places, with various readings, in the *Saṅgīta-darpaṇa* (Tagore's Edition, p. 83) in the *Anūp-saṅgīta-vilāsa* (p. 160), and in the *Saṅgīta-sāra Saṁgraha* (p. 1.). In the last version—the last line reads "Gaurīyamuktāti—Kutūhalena" (see Plate XXIII).

"Niveśayanti Śravane' vatamsam| Āmrāṅkurarṁ kokila-
nāda-ramyam|
Śyāmā madhusyandi-su-sūkṣa-nādā| Gaurīyamuktā kila
kohalena"|| *Saṅgīta-darpaṇam*, p. 83.

able indication as to the presiding deity of each melody is in the text of the *Saṅgīta-ratnākara* (13th century). The jāti-rāgas are not assigned to any presiding spirits, but the rāga-gitis described in the rāga-vivekādhyaḥ are invariably assigned to its protective divinity. Thus the Suddha-sādhārīta melody has for its god, the sun (*ravi-daivatā*), the ṣaḍja-grāma rāga has for its god, Bṛhaspati (*guru-daivatā*), Suddha-kaiśika, has for its lord, the Earth (*bhauma-vallabha*): Mālava-kaiśika is to be sung for the pleasure of Keśava (*Keśava-prītyaye*) its protective deity. Bhinna-ṣaḍja, has for its deity the four-faced god Brahmā (*caturānana daivatā*). Takka (Taṅka) rāga is sung for the pleasure of Rudra (*mude rudrasya*). Hindola has for its lord the god Makara-dhvaja, the Indian Cupid, the dolphin-bannered god (*makara-dhvaja-vallabha*). Kakubha is assigned to the god of Death (*Yama-daivatā*); and so on. Though the protective deities are indicated, their pictures, or images are not described in the text of Śārangadeva in any prayer-formulas in the shape of descriptive verses (*dhyānas*) such as we find in the later texts.

Raga-
Kutūhala:

Thus, the Bhinna-ṣaḍja, an archaic melody, is described in a prayer-formula in the text of *Rāga-kutūhala*, which from the point of view of musical iconography, must be regarded as one of earlier texts.¹ As *Rāga-kutūhala* quotes the opinion of *Śaṅgīta-ratnākara*, it must be later than the 13th century. ("*Rāga kutūhala: Caturdhā: Gurjārikā Ratnākara-mate,*" *Anūpa-saṅgīta-vilāsa*. P. 124).

But the earliest available text dealing with the iconography of rāgas is the one known as *Rāga-Sāgara*, the colophon of which describes it as a dialogue between Nārada

- (1) *Kṛpāṇa-saṃbhinna-riputtamāṅgaḥ*
Kṛta-prahāro'pi muhur-muhusca
Pino raṇe bhāti gavasti-sūraḥ
Sa Bhinna-ṣaḍjaḥ kathito munindraiḥ" || 180 ||

(*Rāga-Kutūhala*, cited in Bhavabhadda's *Anūpa-saṅgīta-Vilāsa*, Joshi's edition, p. 112. Similarly another archaic rāga, Pañcamā-ṣaḍava is described in a verse from *Rāga-Kutūhala*, cited in the same text at page 122, and Takka-Kaiśika, at page 139. Another ancient melody Chevāṭi is described in the same text in the following verse:

and Dattila.¹ It is not possible to assign the development of the iconography of rāgas to the time of Dattila, whose name is apparently invoked here for lending an air of antiquity to these dhyāna-formulas given in this text, under the chapter *rāga-dhyāna-vidhānaṃ*. Whether Dattila is the author of this text or not, there is no doubt, from the raga-system given in the text and the classification of the melodies into eight major rāgas with 3 derivative rāginīs for each (See Appendix 11), that the text indicates quite an early stage in the classification of the rāgas. This system is certainly earlier than all the systems with six major rāgas, with five, or six rāginīs each.

The dhyānas given in this text are simple in conception, diction and style, and appears to be earlier than all the known anthologies. This will be apparent if we compare some of the dhyānas in this text, quoted below, with those collected in the *Saṅgīta-sāra-saṃgraha*² and which are cited on the descriptive texts attached to the plates in this work.

“Contemplation of Bhairava: The sea of notes and microtones, with the nectar of all varieties of rhythms and time-measures, the fulfilment of the desire of the worship of Śiva, with the body always besmeared with ashes, decked with matted locks, with the shine of the young moon on the

Padmābh padma-patrākṣī saṅketa-sthāna-māśritā
Kāntena tanvatī hāsam Chevāṭi parikīrtitā || 445 ||

Ibid, p. 158.

‘With the complexion of lotus, eyes like lotus-petals, awaiting at the place of tryst for her beloved, delicate and smiling, such is Chevāṭi known by reputation’.

(1) We owe the discovery of this text to V. Raghavan who gives a short notice of it in his paper ‘Some names in Early Saṅgīta Literature’ (Journal, Music Association, Madras, Vol. III, Nos. 1-2, 1932, p. 18). The text is available in two copies in the Madras Oriental Mss. Library, Catalogue Vol. XXII, No. 13014, 13015.

(2) Though the *Saṅgīta-sāra-saṃgraha* by Sir S. M. Tagore is a very late anthology, its collection is based on numerous authoritative texts, e.g. *Pañcama Samhitā* (Nārada), *Saṅgīta-ratnamālā*, *Saṅgīta-Dāmodara*, *Saṅgīta-Kaumudī*, *Saṅgīta - Nārāyaṇa*, *Saṅgīta Pārijāta*. And most of these texts are not readily available some being in Mss. S. M. Tagore’s anthology has been used in this work and cited on the descriptive plates.

head, with skulls as decorations, I adore Bhairava, the skilful Dancer.”¹ (Compare the texts cited on Plates I-III).

“Contemplation of Bhūpāla: Seated on his throne, fanned with fly-whisks by fawn-eyed (damsels), I always adore, in my heart, Bhūpāla, along with his group of associated (melodies”).² [This melody—though akin to the picture of Varāṇī (Vide Plate XI) seems to be different from the melody known as Bhūpālī described on Plate LXXVI.]

“Contemplation of Phaṭa-manjarī: Shining in the bower of vine-plant, decked with a crown and armlets set with sapphires, I always adore the melody Phaṭa-manjarī, attended with a couple of damsels on either side.”³

“Contemplation of Mālava-rāga: With his hands on the two breasts of a beautiful damsel, with his beautiful cheeks shining with swinging ear-pendants, kissing fervently the faces of the young damsel, I am (thus) contemplating in my heart—the melody of Mālava.”⁴

(Compare the texts and the illustrations cited on Plate XIV).

“Contemplation of Rāma-Kriyā: Seated in heroic posture, holding a bow and arrows, golden in complexion, I

always adore the goddess Rāma-kriyā.”¹

(Compare the text and the illustration cited on Plate XXXII-A).

“Contemplation of Ghurjarī: Covered with a white mantle (armour) playing with her companions with balls in her hands, swaying in a dance (?) I worship, in the region of my heart, Ghurjarī”.²

(Ghurjarī appears to be a different melody from Gurjarī cited on Plates LXXII, LXXII).

“Contemplation of Toḍī: With a glass cup filled with the wine called *kādamvarī*, with her beautiful face supported by her left and with her right-hand carrying a portion of the silken scarf of her lover, I also think of Toḍī, in my heart.”³

(Compare with this the illustration of Turuska-Toḍī cited on Plate XX).

“Contemplation of Madhumāvatī: Holding a cup of honey, accompanied by her confidantes, rosy like the *javā* flower, wearing a pure bright yellow garment (welcoming the gathering clouds), caressing, by the other hand, peacocks (?) I always recall in my heart the proud Madhumāvatī Madhu-mādhavī”.⁴

(Compare with this the texts and illustrations cited on Plates LXXX, to LXXXIII).

Apparently, Madhumāvatī is the earlier form of the name of Madhumādhavī and this may be another indication

of the early date of this text.

As compared with the *Saṅgīta-ratna-mālā* (which according to the citation in the *Saṅgīta-nārāyaṇa* is attributed to Mammaṭācārya, the famous rhetorician of the 9th century), the text of the *Rāga-sāgara* appears to be earlier. This may be seen by comparing the two contemplative verses (*dhyāna*), describing the melody Deśī:—

“Contemplation of Deśī: Living in a hut of *Uśira* grass, holding a wreath of flower in her hand, of a very fair complexion, clad in attractive robes, I contemplate on the youthful Deśī.¹

The visual picture of the melody is thus given in *Ratna-mālā*: “With the slow movement of a king of elephant, with eyes like that of a fawn, with a complexion like the lotus, with heavy hips, with her plaits dangling like a serpent, with a frame quivering like a delicate creeper, this comes into view, the *rāginī* Deśī, sweetly smiling. This is Deśī.²

The practice of composing *rāga-mālā* verses, descriptive of the images of *rāgas*, and suggesting their emotive atmosphere and values must have been current long before the middle of the 15th century. In a Ms., dated 1440 A.D. of the *Pancama-sāra-saṁhitā* by Nārada, a complete series of descriptive verses are given of six *rāgas* and thirty-six *rāgiṇīs*. (See *ante* P. 24).

It is difficult to suggest if pictorial illustrations, answering to these descriptive word pictures, had been painted very much before the sixteenth century, the estimated date of the earliest *rāga-mālā* pictures. Although no pictorial versions as early as the fifteenth century have yet come to light, there is nothing improbable in such pictures having been painted contemporaneously with the written verses.

S. M. Tagore’s *Saṅgīta-saṁgraha*, p. 95).

The earliest landmark during the Moghul period is the work called *Rāga-mālā* by Meṣakarma, composed in 1509 A.D. (1431 śaka). It belongs to the period before the revival of Indian music under Akbar. A typical verse from this text describing Bhairava-rāga is translated below:

Rāga-mālā
by Meṣa-
karna:

‘White in complexion, clad in white, carrying the crescent, and the horn and wearing a garland, Bhairava is born from the mouth of Śiva, and carries the poison on his neck and his eyes are red. He (also) carries the trident, the skull, and the lotus, and wears jewelled pendants on his two-ears and matted locks. This (melody) is sung by the gods in the morning in autumn.¹ A name of a musical iconographer is alluded to in a single verse. In the *Saṅgīta Mahodadhī*, itself a treatise of uncertain date, the verse describing the rāginī Mallārikā (See plate LXVIII) contains a passage: “She is Mallārikā called by Nṛpa” (*Mallārikeyaṃ Kathitā Nṛpeṇa*). This seems to suggest that there was a musical authority named Nṛpa who had provided outlines for the portraits, or images for visualising some of the melodies. No other reference to Nṛpa has been traced, and it is impossible to say anything about this iconographer, on the basis of this single allusion.

Nṛpa:

The next important text on the iconography of rāgas in the *Rāga-mālā* by Pundrika Viṭṭhala composed in 1576 A.D. during the reign of Akbar, if not under royal auspices. An instructive comparison may be made by considering the verses describing the melody Śuddha-Bhairava, with the verse cited above:

Rāga-mālā
by Viṭṭhal:

“Born of the first face of Śiva, with ‘ga’ and ‘ni’ in vikṛta forms, using three phases of the note ‘sa’, carrying matted locks, clad in white, besmeared with ashes, with three red eyes, with a horn to his lips, pendants on the two ears, with the crescent on the locks, Śuddha-Bhairava, the protector of

the bull is playful in the morning, in the winter.”

Verses from this text are quoted in describing Praja (Plate CVII) and Devakri (Plate CIII). Images of some melodies not described elsewhere, are given in this text e.g. Vāhulī, Suhavi, Jijāvanta (jhijhit ?) and Takka. The last melody is visualised as follows:—‘Addicted to dancing, patient (?), with the notes ‘ga’ and ‘ni’ in vikṛta or sharpened forms, with two additional śrutis,¹ a full-toned melody, having the note ‘sa’ as its initial, medial, and terminating notes. Dressed in patterned robes, wearing a be-jewelled string on his breast, and a fine crown on his head, Takka is a passionate person, of white complexion, and his body besmeared with sandal-paste, carrying flower globes in his hand, like a clever messenger of love, he roams (i.e. sung) at all times.’

Some of the melodies described have very curious designations. Vāhulī is said to be a Maharaṭṭa lady (? *Marahatta-vanītā*), and Deśī is said to be a grand-daughter of Ahaṅga (? *Ahaṅgasya papautrī*).² Puṇḍarik Viṭṭhal’s descriptive verses are more iconological, and hieratic, and very rarely indicate the emotive significance of the melodies in dramatic conceptions such as met with in the verses of Nārada and others.

The text *Catvāriṃśatchata-rāga-nirūpanaṃ* attributed to Nārada belongs to about the same time. The author adopts the descriptive verses given in earlier texts, but also provides verbal visualizations for many minor melodies not cited elsewhere. Thus Vaulikā, and Ārabhī, wives of Śrī-rāga, are thus described:

“Carrying peacock’s feather, fond of sweets, dark in complexion and having an attractive figure, Vaulikā shines.”

“Always attended by her lover, covered with *nava-*

(1) According to the technical meaning of the word ‘gati’ used by Puṇḍarika, it refers to a note which moves from its normal and natural ‘suddha’ position to a vikṛta or sharpened form by adding śrutis to its normal form. As Mr. Bhaṭkhande has pointed out, “Each ‘gati’ will be measured by a śruti; for instance ‘gāndhāra’ rising one śruti will be called ‘trigatikā’; when it rises two śrutis, it will be supposed to have gone up to two ‘gatis’ and so on.”

(2) Ahaṅga may be the *prākṛta* form of *Abhaṅga*.

mālikā flowers and engaged in drinking, sweet-speaking Ārabhī is thus described.”

Other verses from this text are cited on Plates.

(LXXXIII, LXXXIV, LXLIV, LXLVII,
LXLVIII, CI, CIII-F, CX).

Like Puṇḍarik Viṭṭhala, Somanātha, offers in his *Rāga-vivodha* a series of original verses, describing 52 melodies. His descriptions are very terse, and sometimes enigmatic and unintelligible, but for the annotations that he himself provides on these texts. That the verses are not adequately descriptive is proved by the fact that in many cases the author has to indicate in his commentary—the name of the *nāyikā*, to suggest the emotive essences of the melodies described. Of the melodies visualised in the *dhyāna-formulas*, some are of peculiar interest, such as, the Pāvaka rāga, and the Mukhārī.

‘Dressed as a cow-herd, playing on the flute, and always in a playful mood, and his body decorated with patterns, Pāvaka rāga is beautiful in bluish complexion.’¹

‘Blue in complexion, under the grip of passion, being unable to bear any separation from her beloved, Mukhārī is a very clever lady, having jewelled covers for her breasts, and carrying a lute in her hand.’²

Other verses from this text are cited on Plates LXL, LXLI, LXLII, LXLIV, LXVIII, CII, CV, CVII, CX, CXIII.

Dāmodara Miśra, follows the School of Hanumāna in his *Saṅgīta-darpaṇa*, which is a compilation rather than an original treatise. He cites descriptive verses for 36 melodies according to the system of Hanumāna. The *dhyāna-formulas* are identical with those given in the *Nārada-Saṃhitā* and other texts.

Two of the works of Bhāva-bhaṭṭa (1674-1701 A.D.) namely: *Anūpa-saṅgīta-vilāsa* and *Anūpa-saṅgīta-ratnākara*

Saṅgīta-
darpaṇa:

Bhāva-
bhaṭṭa:

- (1) “Gopāla-veṣa eṣaḥ kvaṇayan-veṇuṃ sadā mudā krīḍan|
Citṛāṅga-rāgo-bhāvaḥ Pāvaka-rāga’sīto lālitaḥ”|| 214 ||
- (2) “Śyāmā kāmākrāntā kānta-viyogā-sahā Mukhārīyaṃ|
Maṇi-maya-sukucāvaraṇā vīṇā-pāṇiḥ pravīṇocaiḥ”|| 212||
Rāga-vivodha, (Poona edition, p. 105-106).

(both of them compilations, which liberally quote earlier authorities), contain quotations from earlier *rāga-mālā* texts. Of these, *Rāga-kutūhala*, and Viṭṭhal's *Rāga-mālā*, have already been discussed. He however cites some anonymous verses, giving the *dhyāna* formula of three of the early *grāma-rāgas*, two of which are of interest, as will appear from the examples cited below:

“Śuddha Khāḍava: ‘Seated at the foot of a tree, with his mind under control, (yet) smiling in company with his beloved, his head covered by a coronet, Śuddha Khāḍava is thus described.”¹

“Gāndhāra-pañcama: ‘Of golden complexion, having golden (pendants) on his ears, and smiling in company with his beloved, Gāndhāra-pañcama is under the protection of the shade of a deodāra tree.”²

Some of the early *Rāga-gītis* and *Bhinna-gītis* (a group of melodies as old as Kaśyapa) are visualised by anonymous descriptive verses in this text. Of these the typical examples are those describing Takka-Kaiśika, Souvīra, Souvīrī, and Bhinna-pañcama:

Takka-Kaiśika: “A youth of bluish complexion, with his body besmeared with saffron, awaiting at the trysting-place, at the bidding of his beloved, smitten with desire, such is Takka-Kaiśika.”³

- (1) “*Taru-mūle sthita-cetāḥ priyayā saha saṁhasan|*
Vṛto-ttamāṅga-mukutaḥ śuddha-ṣaḍava īritaḥ” || 288 ||
Anūpa-saṅgita-vilāsaḥ, p. 130.

- (2) “*Svarṇa-varṇa-karṇaḥ priyayā saha saṁhasan|*
Deva-pādapa-śuṣkāyām (? su-cchāyām) śrito
Gāndhāra-pañcamah” || 331 || *Ibid*, p. 137.
The verse for Madhyama-ṣaḍava is a fragment:
“*Sūraḥ khaḍgaṁ dadhat-savye kare vāme sucarmākaṁ ****
ṣaḍavo madhyamādikaḥ” || *Ibid*, p. 179.

- (3) “*Śyāmo yuvā kuṁkuma-lipta-dehaḥ| saṅketa-mākhyāya-*
kṛta-pratikṣaḥ|
Priyā-janasya smara-pīḍitasya| Takko' yamuktaḥ kila
kaiśikākhyah” || 345 ||
Anūpa-saṅgita-vilāsa, page 139.

Sauvīra-rāga: "Seated on pure petals of flowers (?), he is an anchorite of great power, in a mood of peace, very thin and delicate in his body, known by the name of Sauvīra-rāga."¹

Sauvīrī (bhāṣā): "With eyes like lotuses, with her desires fulfilled, but again bent on desires, in a mood of peace, and having the effulgence of the lotus, such is Sauvīrī known by reputation."²

Bhinna-pāñcama: "Of yellow complexion, with hairs of russet hue, he strikes great terror in his enemies in battles, taller than the tallest, he carries strings of skulls on his breast, incessantly loud and terrific laughs emanate from his throat to resound in the skies,—Bhinna-pāñcama has thus been indicated by the learned."³

The picture of Turuṣka Toḍī (described by Puṇḍarik as Yāvanī Toḍikā) cited by Bhāvabhaṭṭa, is worth quoting:

'Very much current in the country of the Turks, carrying white and other coloured flowers, draped in brilliant red costume, Turuṣka Toḍī is thus spoken of by the sages.'⁴

The latest datable treatise to contain *rāgamālā* texts in Sanskrit, visualising the melodies is that represented by *Saṅgīta-mālā* by an anonymous author; it is represented by

Saṅgīta-
mālā:

a single MS. dated 1778, so that the work may be a few years earlier, say about the 1750 A.D. The work follows a system of six rāgas with five rāgiṇīs each. (See Appendix 3). The descriptive verses are elaborate and not only give a visualized picture of each melody but also its note-structure, and an indication of its appropriate hour of singing. Each verse is followed by a note in Hindī under the title of *Sāhitya gūḍhārtha* (i.e. implicit rhetorical significance of each melody) in which the nāyikā (the heroine), the nāyaka (the hero) and the *rasa* (emotive flavour) of each melody are specified, and is accompanied by two or three examples of old songs in which each melody has been appropriately sung.

Some typical examples from this text are quoted below with paraphrases in English.

‘Gauḍī Rāgiṇī: The fair damsel has defeated the cuckoo by the flourish of her word surpassing nectar; she had decked her ears with new sprays of mango-blossoms, having a complexion like the beautiful blue cloud, her handsome body is robed in white silk; her lotus-face subdues the pride of the Moon, (for) the creator used all his skill and art in creating her form with great care; her grace and beauty are attractive alike to the eyes and the mind; (its structure is) Sa ri ga ma pa dhā ni, with *ṣadja* as its initial note. Gauḍikā is sung at the end of the day in autumn.’

‘Rhetorical interpretation: The heroine is a married spouse of the middling type, she is in the fullness of her youth, and (for the time being), separated from her lord who has gone abroad. The hero is a tender-hearted young man. The prevailing emotive flavour is unsatisfied love-longing. This melody should be applied to emotions of this quality.’¹

Tagore's
Sangita-
sāra-
samgraha:

Saṅgīta-darpaṇa.

S. M. Tagore's *Saṅgīta-sāra-saṃgraha*,—which has been largely used in citing the texts quoted on the descriptions of the Plates of the present work, is also a compilation, which gives a large variety of *rāga-mālā* texts according to the three schools. The descriptive verses cited are quoted from *Nārada-saṃhitā*, *Rāgārṇava*, *Saṅgīta-ratnamālā*, *Saṅgīta-darpaṇa*, and *Saṅgīta-nārāyaṇa*.

Hindī
Rāgmālā
Texts:

Having taken a bird's eye-view of the available texts of *rāga-mālās* in Sanskrit, we will proceed to make a show survey of Hindī texts, with the data so far available. It must have been realised from very early times in the practice of the *rāgas*, that the Sanskrit texts of the *rāga-mālā* could only be accessible to a very few of the practising musicians learned in Sanskrit literature, who could study the theory of the musical science from the original texts. The necessity of translating the Sanskrit texts into a popular vernacular must have been felt, with the growing popularity of music during the period immediately preceding the advent of the Moghuls. The Hindī Language had already lent itself to a complete *vulgarization* of the classical 'Sanskrit' culture in terms of a popular folk-psychology, accessible to the general public to whom the academic classical culture was a *terra incognita*. With the development of a wide-spread interest in musical culture and development, a group of Hindī poets devoted themselves to unlock the key to the Sanskrit musical texts and to render them in easily accessible popular versions in Hindī quatrains and couplets (*copaī* and *dohās*). In this way, short popular recensions in Hindī verses opened to all and sundry the secrets of musical theory and sciences hitherto locked up in learned treatises in Sanskrit. This duty of popularising the academic knowledge and culture for popular apprehension was undertaken by well-known and talented poets, and also by lesser luminaries. One would expect Tānsen, (c. 1520-1589 A.D.) the great exponent of Indian music, and a Hindī poet of some distinction (who composed several Dhrupada songs in old Braja bhāṣā), should have been the first composer of *rāga-mālā* texts in Hindī as foundations for pictorial illustrations. Unfortunately, his hand as an iconographer has not been discovered in any Hindī compositions visualising the melodies. Of poets of

distinction who condescended to write these popular guide-books on music, the most famous name is that of Deo-Kavi, a bright luminary in Hindī Literature. But he seems to be forestalled by another poet, of considerable talent, but whose name and fame was not hitherto known to the history of Hindī Literature. This was the poet Harivallabha, the author of an elaborate treatise on Indian music. His work introduces a new name in Hindī literature, as he is totally ignored in all known anthologies and histories of literature.

Hari-
vallabha
(C. 1625-
1643)

This musical poet is represented by an elaborate treatise which he himself describes as a vernacular version of *Saṅgīta Darpaṇa*, written in an obscure form of old Hindī. The work survives in four manuscripts, the earliest, in the collection of the British Museum¹ and bearing a dated colophon: 'Finished vernacular version of *Saṅgīta darpaṇa* by Harivallabha Saṃvat (1710 (=1643 A.D.), the second day of the black fortnight of Phālgun (February-March) written by copyist Sāranga'.² The second manuscript written by Khemankar Miśra at Shāhajahānāvād (Delhi) is in the collection of the Sarasvatī-bhavan Library, Benares, and bears a colophon which purports to bear date Vaiśākh Sudi 7, Saṃvat year 1748 (=1691 A.D.)³ The third manuscript, undated, is in the collection of the Asiatic Society of Bengal.⁴ The fourth manuscript is a magnificent *editio princeps*, finally written and illustrated with numerous pictures of the rāgas, now in the collection of Mr. P. C. Nahar, Calcutta. It contains a dated colophon which runs as follows: 'Finished

chapter on dancing,—the vernacular version of the essence of music by Harivallabha Saṃvat 1855 (=1798 A.D.) first Śrāvan (July-August), black fortnight, the auspicious twelfth moon, Thursday, written by Brāhmaṇ Giridhāri for the benefit of Babu Meghraj in the District of Murshidabad at Azimgunge near the bank of the Ganges, copy finished.¹ The work is in five sections, or chapters: (i) Musical notes (ii) Melodies (iii) Compound melodies (iv) Musical measures and (v) Dancing. The chapter on melodies (*rāgādhyāya*) appears to be based partially on the Sanskrit text *Saṅgīta-darpaṇa* by Dāmodara Miśra (described above pp. 32, 62) and which seems to lend its name to the Hindī work, which appears to have borrowed its materials freely from other and older texts.² As the colophon at the end of each section suggests, Harivallabha gave in a vernacular version the substance of musical data abstracted from authoritative treatises.³ Any how, the date of the work cannot be earlier than 1625 A.D., when Dāmodar Miśra's work was composed.

Confining ourselves to the chapter of *rāgādhyāya*, we find Harivallabha, following Hanumāna, describing six rāgas and thirty rāgiṇīs. He first indicates the note-structure of the melodies and then gives a visual picture of the same in very rhythmic and mellifluous verses of *Kavittas*, generally

- (1) "Iti sri Harivallabha kṛta vākhā prākaraṇa saṅgīta-sāra
nṛtyā-dhyaya samāpta| Saṃvat 1855 ādika sāvan mās kṛṣṇa

madhye
nikaṣa Gaṅgā-tīre Azimgunj madhyhe likhi sampūrṇam."

(2) The printed text of *Saṅgīta-Darpaṇa* (Tagore's Edition, Calcutta 1881) only gives the text up to the *rāgādhyāya*, and does not give the complete text which must have included the chapters on Measures and Dancing.

- (3) "Harivallabha bhākhā raceyo sava saṅgīta ke sār|
Tāme sampūrṇa bhayo nṛtya vicār apār"]|

'Harivallabha has composed in vernacular the essence of the principles of music, of which the incomparable dissertation on dancing forms the final, or terminating portion.'

containing in its last line (*bhanitā*) the name of the poet. As will appear from the descriptive verses quoted on the plates in the second volume from the text of Harivallabha (with variant readings according to the Asiatic Society and the Nahar Mss.), the poet does not slavishly follow the original Sanskrit verses, but gives an amplified and original version of the 'picture' of each *rāga*, though following the main outlines of the Sanskrit models. The descriptive picture for each melody is preceded in the first instance by the note-structure of the melody. This is well illustrated from typical pages reproduced from the Nahar Ms. on Plates LXVI, LXXXVIII-B, LXL-B, XLV-C, and CII-A. Considering the fact that the poet had to conform to the conventional pattern of the 'picture' of a *rāga* as laid down in the Sanskrit text, he has displayed not only great technical skill in smooth and attractive versification, but has also given proofs of considerable poetic imagination, both in ideas and diction, and his alliterations are mostly made of significant choice of musical words and not of mere mechanical assemblage of a cheap jingle of empty vocables. Harivallabha's chapter on melodies include (over and above the thirty-six *rāgiṇīs* of Hanumāna) a number of *sankīrṇa* (composite melodies) and *upa-rāgiṇīs* (additional melodies not affiliated to the six *rāgas*). Some of these are cited with quotations on the Plates LXXXVIII-B, LXL-B, XLII-B, XLV-C, & CII-A.

It is a matter of some conjecture, if the verses of Harivallabha represent the earliest *rāga-mālā* texts in Hindi versions. For, if the couplets (*dohās*) quoted on the back of the series of *rāgiṇī* pictures in the Museum of Fine Arts, Boston (No. 17.2371 to 17.2385) and on the back of analogous examples in the Ghose Collection in Calcutta are proved to be contemporaneous with the pictures which have been dated about 1600 A.D., then the texts endorsed on these early *rāgiṇī* series must be older than Harivallabha.

Earlier
Hindi
Texts:

The fact that none of the verses of Harivallabha has been found quoted on any *rāgiṇī* pictures, would suggest that texts composed by other hands had already acquired popularity which could not be displaced by the higher literary merits of Harivallabha's compositions. Dr. Coomaraswamy considers the Hindi texts quoted on the earliest *rāgiṇī* paintings mentioned above, as of the same date as the

paintings themselves. "We know nothing of descriptive *Rāgamālā* poems older than those found on the paintings themselves, and these are apparently in a Bundeldkhaṇḍī dialect which is related to the language of the *Padumāvati* of Malik Muhammad Jaisī, which can hardly be older than the beginning of the sixteenth century."¹ The careless and perfunctory style of the writing of these texts endorsed on the back of these early *Rāgamālā* pictures (designated as S. 1 and S. 2 in the Boston Museum, *Catalogue* Part V, p. 72) do not encourage the suggestion that the writings and, therefore, the texts are as old as the pictures. But certain significance attaches to the fact that the same couplets are quoted on Mr. A. Ghose's Mālkousa Rāga (Plate XIV-B) as on the analogous example of the same rāga in the Boston Museum (see the two identical texts with minor variations quoted on Plate XIV). The identity of this *dohā* quoted on two examples of analogous illustrations of nearly the same date suggests that both these pictures were based on the same text, that is to say, the text existed before those miniatures were painted.

Lachiman:

Now, the *dohā* quoted on a Vibhāṣā rāgiṇī in the Boston Museum (Plate LXXXV) appears to be the concluding couplet of a string of verses, quoted on a Vibhāṣā rāgiṇī in the Fogg Art Museum (Plate LXXXVI). The author of these verses, as appears from this text and the text quoted on Plate LXXVIII, was a poet of the name of Lachiman: 'Lachiman (the poet), describes king Vibhās' ("*Lichiman varnai bhūpa Vibhās*"). "This is suggested by Lachiman' ("*Karai Lachimana iha upadeś*," describing the Pañcama rāgiṇī). Three poets of this name are known to Hindī Literature, (*Misra-Vandhu-Vinod, Pariśiṣṭh*, p. 1566), but we have no sure evidence to identify the author of the verse in question. The style of our Lachiman is very terse and sometimes inclined to be archaic and obscure in idea, reminding one of the obscure diction of Keśavadās' *Rasikapriyā* (c. 1591). The merits and demerits of the style are best studied in considering the translation of the *dohā* describing Lalita [identical couplets quoted on examples in Ghosh Col-

(1) Coomaraswamy: *Catalogue of the Indian Collections*, Boston Museum, Part V, Rajput Painting, 1926, p. 43.

lection and in the Boston Museum (Plate XXXVII)] which in Dr. Coomaraswamy's translation does not reveal the emotive flavour of the melody, and which in our version, appropriately illustrates the situation of a *Khaṇḍita nayikā*, ('one whose love has been dishonoured by the lover spending the night with another and returning in the morning') as shown in the two illustrations cited on the plate. 'It is not the visit of the enemy to the hero's wife while the hero is abroad' as suggested (Coomaraswamy's *Catalogue*, Part V, p. 72), on a wrong interpretation of the meaning of the terse and obscure text. 'His lips are red with chewing betel-leaf [*Rāgai* (not *Bāgai*) *birā*], his robes are fragrant, or luminous with sandal (*āgar dūti*), the dishevelled state of his whole body shuts out the god of Love' [*"rupu vāriyatu main(u)"*]. These details suggesting a night passed with another lover justifies the interpretation of a *Khaṇḍitā-nayikā*, who is unable in her resentment to utter any words — 'after seeing such a sight how can the elephant-gaited one speak' (*"phiri kaisai kahi sakai gaja gāminī sau bain*)."

The most famous name in Hindī Literature which figures in *rāgamālā* texts is that of Deo-Kavi. "According to native opinion he was the greatest poet of his time and indeed one of the greatest poets of India." He was a Sanādh Brāhmaṇa of Etawah, born in Saṃvat 1730, and is believed to have died in 1802 Saṃvat. He wrote in pure Braja-bhāṣā and some of his verses are believed to be the finest productions of the poetic art. His poetic career began at the age of sixteen (c. 1689 A.D.). He wrote a short treatise on Music entitled *Rāg-Ratnākar*,¹ specially devoted to a classification and description of the rāgas with five rāgiṇīs each. To each melody is devoted a short descriptive couplet (*dohā*) followed by a *savāyīā* giving a more detailed picture with suggestions for appropriate season and time for singing, and, sometimes, some details of the notes composing the melody. As will appear from an example to be cited below, the image

Deo-Kavi
(1673-1745
A.D.):

(1) Printed in the collected edition of his works published by the Nāgarī-pracīrinī Sabhā, Benares, 1912. This edition and the printed text of Bhanu Kavi, *infra*, call for a modification of Dr. Coomaraswamy's assertion that "Apparently, no printed texts of *Rāgamālā* poems exist."

of each rāga is first indicated in bare outlines in a couplet (*dohā*) followed by a more elaborate description in the form of a quatrain (*savāyīā*):

Lalita (*couplet*): "Lalita is of a delicate frame of golden complexion, she wears ornaments and robes made of gold; coming out of her chamber in a spring morning, she waits, her mind full of the expectation of her lover. (*Quatrain*): Dressed in yellow, she carries a garland of fresh *campaka* flower, mingled with blossoms of mango and *aśoka*; she has decked her complexion of gold with ornaments of gold, her voice is mistaken for the song of the cuckoo in spring mornings. The Moon leaving the celestial abode (and assuming the form of her face) has secured the rare ambrosia of her sweet and juicy lips. Lalita is seeking union with her beloved (alternately—the melody seeks the notes 'dha', 'ni', 'sa', 'ga' and 'ma') and coming out of her abode is looking out for him."¹

Anonymous
Text:
British
Museum
Ms. Add.
Or. 2821:

We now come to a stage of rāga-mālā illustrations when the texts instead of being quoted on the reverse side of the miniatures (as in the early primitive series which carry on the back, the text of Lachiman) began to be superscribed on the face of the miniatures themselves at the top, in a rectangular space, allotted for the purpose. In the earlier

- (1) "Lalita (*dohā*): Lalita lalita suvarna varana suvarana
bhūṣana vās|
Madhu-prabhāta gṛhason nikasi thāḍi jiya piya ās|| 37 ||
(*Savāyīā*): Pita dukūla dhare nava campaka-phul gare mile
amva asokai||
Sonese āngani soneke bhūṣana prāta-vasanta piki dhuni
dhokai|
Oḍi sudhā madhurādhara mādHAVi pāyo sudhādhara cchāṇḍi
surokai|
Cāhati hai dha ni saṅgama ko lalitā gṛhatain cali tāhi
vilokai||" *Rāg-ratnākar*, p. 10.

The word 'oḍi' has also a double *entendre*, suggesting that it is a pentatonic (*oḍava*) melody, omitting 'ri' and 'pa'. Likewise, the words 'cāhati hai dhani saṅgama' has a double meaning suggesting that the melody requires the notes 'dha' 'ni' 'sa' 'ga' and 'ma' in its structure.

illustrations, though a small space is left at the top, it is not large enough for quotations of *dohās*, much less of *savaiyās* or *kavittas*, and is used for superscribing the name of the *rāga*, and the number indicating the place of the *rāgiṇī* and nothing more (see Plates IX, X). At a later stage, it became the practice to write out the whole text descriptive of the *rāgiṇī* on the illustration itself, as if to allow connoisseurs to compare and verify if the illustration accurately justified the idea and the situation pictured in the text. Generally, the space for the text for the superscription, pictured at the top, was coloured yellow, so as to offer an effective background against which the text could be easily read. The earliest example for this new practice is represented by two miniatures of Vibhāṣā, and Madhumādhavī in the Museum of Fine Arts, Boston (No. 15.51, and 15.53, here cited on Plates LXXXVII.—A; and LXXXII.—C) which have been roughly dated about 1630 A.D.

The *rāga-mālā* texts superscribed on these two miniatures are identical with the texts in the almost complete series¹ of *rāgiṇī* illustrations in the British Museum Collec-

(1) The series is complete excepting the *Dīpaka rāga* which is missing, but examples of illustration of *Dīpaka* in similar style, and with identical text, occur in the collection of Mr. Ajit Ghosh, Lala Shambhunath, and other collections. Next in date to the two examples in the Boston Museum, superscribed with this text, come the three examples analogous in style and with identical text in the Tagore Collection, Calcutta, and the example, *Vaṅgāla Rāgiṇī* in the author's collection (Plate VIII, B). From a study of the relative styles of these various series bearing identical texts, they seem to answer to the following chronological sequence: (1) *Vibhās* and *Madhumādhavī* No. 15. 51, 15. 53, Boston,—C. 1625 (2) *Dīpak-rāga* (Plate 20, *Year Book of Oriental Art*, 1925),—C. 1630-1640, (3) Three examples, viz. *Varāṭī*, *Vaṅgālī* and another in Tagore Collection, Calcutta, C. 1650, (4) *Vaṅgāla rāgiṇī*, Author's Collection (Plate VIII, B of this work),—C. 1650, (5) *Dīpak rāga* (Plate LVIII, A), and *Kāmode* (Plate XLVIII, B),—C. 1660, (6) Lala Sambhunath Collection (Plates XIV, C; XV, B; XXVII, C; XXXVI, C &c.),—C. 1675 (7) British Museum series Ms. Add. Or. 2821—C. 1700 (8) Lipperheide Library, Berlin, (Plates XII, C; XXII, D; XXVI, D;)—C. 1800.

tion being Ms. Add. Or. 2821, nearly all of which have been cited in the plates volume of this work. The text by an anonymous poet, quoted in this series, has been the most popular text used by illustrators of rāgamālās, through several centuries. If the estimate of the date of the two miniatures in the Boston Museum (15.51, 15.53) is correct, the text of this anonymous poet must be earlier than 1630, that is to say, earlier than the text of Harivallabha, discussed above. The popularity of the anonymous text, (which could not be superceded by the numerous series of illustrations, which bear quotations from it, viz. (1) British Museum Ms. Add. Or. 2821, (2) Lala Sambhunath Collection, Jaipur, (3) Jaipur Museum Collection, (4) Ajit Ghose Collection (stray examples), (5) Collection of Mr. S. Gangoly, Baroda, stray examples (Plate LXXXI), (6) Author's Collection, (stray examples), (7) Lipperheid'sche Bibliothek, Berlin, 1474 (stray examples), and numerous stray examples in various private collections. In one or two instances *dohās* from this anonymous text have been cited on the back of the early rāga-mālā pictures e.g., Vasanta rāgiṇī, Metropolitan Museum (Plate LX, B). This would lend support to the assertion that in some cases, at least, the texts were added later. The text on the back of the Vasanta rāgiṇī which we reproduce on the page opposite is so clumsy and careless as to preclude a supposition of its being contemporary with the miniature. One peculiarity of the text under discussion is its independent and original treatment of the themes. While the versions of Harivallabha keeps to the main outlines of the pictures and also, invariably, to the significant vocabulary of the Sanskrit text, as we have pointed out, the anonymous text shows a complete detachment from the Sanskrit models, though conforming to essential iconographic details and particulars of emotive significances. There is no verbal correspondence with the vocabulary of Sanskrit text such as we meet with in the text of Harivallabha. This may be easily demonstrated by considering the three versions (one Sanskrit and two Hindī texts) cited in the descriptions to Vangāli rāgiṇī (Plate VIII). It will be seen that Harivallabha not only reproduces the imageries but actually borrows several words from the Sanskrit model (*triśūla*, *karaṇḍa*, *vāma-hastā*, *taruṇārka-varṇa*), which the anonymous text absolutely ignores. The author

gives an independent version, altogether allowing his own imagination to weave pictures, imageries and details to realise the main essences of the themes. Thus, in calling up the picture of a Yoginī, a female ascetic, performing asterities, the poet makes her sit on a rug of deer-skin in a shining temple, or a monastery, situated in a lonely forest, where the ascetic has retired, away from the haunts of men. The picture of the forest called up by the poet includes the necessary details of a group of frisking monkey,¹ and a live lion seated near her (*maṭha siva tala siṃhaju vaiṭhāi*)'. None of the Sanskrit texts suggests a lion—which is the poet's own independent contribution to complete the picture of a lonely forest. The lion is not an essential iconographic detail required by the original *dhyāna*-formulas, but an innovation of the poet whom the artist has slavishly followed. It follows, therefore, that the illustrators had for their literary guidance the Hindī version of this anonymous text, and not the Sanskrit text of the authoritative treatises. Indeed, with rare exceptions,² the illustrations invariably quote Hindī, but not Sanskrit texts. The popular demand for the Hindī texts naturally called for poetic efforts on the part of several versifiers who came forward with original *dohās* and *savayās* giving graphic word pictures of the emotive and dramatic features of the melodies for the benefit of the pictorial artists.

We, therefore, come across various other groups of texts, some composed by poets whose names are attached to the poems, while others are by anonymous poets. A series of thirty-six illustrations in the British Museum (Or. Add. 26550 folios 1-36) are superscribed with texts in Braj-bhāṣā, written on a yellow grounded scroll enclosed within a decorative panel. The author of these verses has since been identified³ as a poet of the name of Lāl, as his name occurs in the verses on the folios 10, 11 and 12 des-

Lāl Kavi:

(1) A group of monkeys occurs in the version of Vaṅgāla rāgiṇī in the Collection of Lala Sambhunath not, here, reproduced.

(2) Sanskrit texts are superscribed on the following examples: Toḍi (Plate XV-C), Sāraṅga (Plate LXXXVIII-A).

(3) Blumhardt (*Catalogue of the Hindī, Panjabi, and Hindustāni Ms. in the British Museum*, 1899, p. 61) mistook an adjective describing the heroine, viz, *obhirām* as the author of the poem.

cribing Mālaśrī, Rāmkeli and Guṇakeli. 'Lāla says: she is the rāginī of Malkous' ("Lāla kahai Mālakosaki rāgiṇī," P. XXXII). Other examples from this text (not containing the author's name) are quoted on plates descriptive of Bhairava (Plate III), of Gurjarī (Plate LXXII), of Pañcama (Plate LXXVIII), of Seta-malār (Plate LXX), of Vilāvala (Plate XXXVIII), of Dīpaka (Plate XLI), of Mālaśrī (Plate LIV), of Śrī-rāga (Plate LIII), of Naṭa (Plate XLIV). That Lāl Kavi's text won some amount of popularity with the illustrators is proved by the fact that his *Kavittas* are quoted in more than one series of miniatures. Thus, we find, they are quoted on another series of miniatures in the British Museum (Pers. Ms. Or. 8839, bequeathed by Baroness Zoucha and presented by Lord Curzon), late in style, and with oblong panels, flanked with square knob-decorations containing the text, one of which (with an illustration) is cited here (Plate XXIII). Identity of the texts in the two series is further supported by the verses cited for Kakubha (Plate XXVII). The same text is also quoted in an analogous series, also late in style, in the British Museum (Pers. Ms. Or. No. 8838, presented by Lord Curzon, 13th October, 1917) of which an example, Megha-mallāra (f. 31) is cited here (Plate LXIV, C). Yet a third series appears to quote the same text, as will appear from a stray example, a Kedāra rāgiṇī, cited here, from the author's collection (Plate CIII—H). As will appear from the last line of the illegible text, it contains the name of the poet.

As may be judged from examples cited on the above plates and the simple diction of the verses, free from obscurities, this series of Hindī texts remind one of the grace and beauty of the text of Harivallabha, with whom Lāl Kavi appears to have occasional correspondence in ideas and in words. Without a comparative study of the style and of philological and phonetic peculiarities, it is difficult to say if the author of this rāga-mālā text is identical with the court poet of Bundela Rājā Chhatraśāl who espoused the cause of Aurangzib and fought against Dara Shuko at the battle of Dholpur (1658 A.D.).¹ The style of the miniatures

(1) Lāl Kavi wrote a ballad on this battle in Kanauji dialect

of the *rāga-mālā* pictures (B.M. Add. 26550) is very clumsy and mechanical and cannot be earlier than the middle of the 19th century. Lāl Kavi's text is of iconographic value as it helps to identify certain versions of *rāgiṇī*s different from other pictorial patterns. The literary merit of his verses may be judged from a typical quatrain describing Bhairava *rāga* (Plate III) and the one describing Pañcama *rāgiṇī* quoted on Plate LXXVIII.

Peāray
Raṅgalāl:

Particular interest attaches to an incomplete series of six *rāgiṇī* pictures in the British Museum (Add. 21934, Blumhardt, *Catalogue*, 95, p. 62). In the first place, these miniatures are signed by artists of whom we get the following names: Pañcama (the 4th *rāgiṇī* of Vasanta *rāg*) by Sītaldās (Plates LXXVIII, D); Gaurī (the 4th *rāgiṇī* of Śrī-rāg) Girdhārī Lāl (Plates XXIII, A); Devagāndhārī (the 1st *rāgiṇī* of Śrī-rāg) by Sītāl Dās (Plates LXLI, D); Śrī-rāga (the 3rd *rāga*) by Bāhādur Singh (Plates LII, C); Hindola (the 5th *rāga*) by Bāhādur Singh (Plate XXXI, A); Megha-mallār (the 2nd *rāga*) by Sītāl Dās (Plate LXLI, D); Śrī-rāga (the 3rd *rāga*) by Bāhādur Singh (Plate LII, C); Hindola (the 5th *rāga*) by Bāhādur Singh (Plate XXXI, A); Megha-mallār (the 2nd *rāga*) by the Sītāl Dās (Plate LXV, B). The versions of these melodies as illustrated in these miniatures are peculiar conceptions different from their usual types, and they offer very valuable examples of these peculiar versions. In the second place, each of these six miniatures bears on the top in a rectangular space allotted for the purpose, a Hindī verse, descriptive of the *rāgiṇī*, composed by a poet named Peāray Raṅgalāl, whose name is given in the last line. In the quatrain for Gaurī cited on Plate XXIII—A, he signs his name, simply, as 'Raṅgalāl'. If he is the same poet as is noticed in *Miśra-vandhu-vinod* (p. 762) he lived about Saṃvat 1807 (1754 A.D.) and wrote his poems under the patronage of Surajamul Raja of Bharatpur.¹ The style of the pictures which follows the

entitled: '*Chhatraśāl ki laḍāī*' (Blumhardt, *Op. Cit.*, p. 35). He also wrote a poem describing the love of heroes and heroines (*nāyikā*) called "Viṣṇu-vilās".

(1) Without a careful comparison of phonetic and stylistic peculiarities it is not possible to identify the *protegé* of Surajmull with Peāray Raṅgalāl, the author of this *rāgamālā* text.

manners of the late Moghul miniatures does not take us earlier than the nineteenth century. Probably these examples are copies of earlier versions. The illustrations were evidently painted to justify the peculiar versions indicated in the Hindī texts. The style of Peāray Raṅgalāl, in spite of the pretentious and long-winded rhythm of his verses, is somewhat heavy, artificial and turbid and lacks the grace and easy flow of the earlier rāga-mālā texts. We have no certain data as to the date of this text, unless we can identify him with Raja Surajmall's court-poet.

Vrajanāth:

Two stray examples of rāgiṇī miniatures, Gunakālī (Plate XXIV, C) and Deśākhī (Plate XXXV) in the Collection of Mr. P. S. Nahar, furnish two interesting quartrains, one of them bearing the name of the poet Vrajanāth. It is a name known to Hindī literature and he is probably the same poet as is cited in *Miśra-vandhu vinode* (Vol. II, p. 167). He was born in Saṃvat 1780 (1727 A.D.) and his literary activity dates from Saṃvat 1810 (1757 A.D.). He was the author of a treatise on Rāgamālā, from which apparently the verses quoted on the reverse of the two miniatures have been quoted. The Miśra brothers characterise him as a poet of average merit (*sāḍhāraṇ śreṇī*). To judge from the two *coupaīs* available to us, the poet appears to have been capable of giving vivid descriptions, in strong and effective diction, not entirely devoid of some charm and an easy flow.

A complete set of rāga-mālā text is cited on a complete series of pictures which, at one time, belonged to a dealer in Jaipur (here cited as 'Jaipur Private Collection'). This series (cited here in twelve examples: Plates II, VII, XII, XIII, LVI, LVII, LVIII, LXII, LXXV, LXXVI, LXXVII) of miniatures are not of much aesthetic merit, (though the treatment of the trees is quite distinctive), being apparently copies of better versions. But their interest lies in the fact that they have helped to fill up one or two gaps which occur in the available series of complete illustrations. As a rule, complete series of rāgiṇī pictures are now almost impossible to obtain. This series (the present *provenance* of which is unknown) offers an illustration of Tanka rāgiṇī (Plate LXXVII) of which only one other illustration has been traced. The author of this text, who has composed the descriptions in *modaka chanda*, gives his name twice, once

in the *copāi* and once in the terminating *dohā* describing Deskārī rāgiṇī (Plate LXXV, D): 'Paidā says: She is fond of pleasing her lover'; 'To be sung in the fourth hour, so says Paidā.' After giving a description of each melody, the poet indicates in the closing couplet, the note-structure of the melody and the appropriate time and season for its singing. The style of the poet is simple and devoid of flourish, or ornamentations. The quality of his verse may be judged from a typical *copāi*, describing Māru rāgiṇī (Plate LVII). He seems to have been a mediocre versifier, not having found a place in anthologies and his name is not noticed by any compilers of Hindi poems.

An anonymous Hindī text, is quoted on a series of rāga-mālā pictures formerly in the Mouji Collection (Bombay) now dispersed. They were published, along with the miniatures, in a series of articles in a Gujarati Journal¹ from which we cite here, two typical quotations, describing Dīpaka and Deśī:

Anonymous
text:

"Mounted on an elephant, surrounded by a bevy of young damsels, with gaits of elephants, his complexion is rosy, his robes are scarlet, he carries garlands made of pearls. His dress is beautiful, his hair dishevelled, he sings in auspicious words like the bee in a grove, such is Dīpaka to be understood."

"Dressed in blue, and of shining complexion, she is standing near her lord, carrying a fan, full of desire for dalliance. She is burned by passion and has a voice like the cuckoo which captivates the heart of her beloved. Proud of her youth, and full of joy, she is called Deśī rāgiṇī"³.

(1) "*Suvarṇa-mālā*," a quarterly journal, in English and Gujarati, edited and published by Pursuttom Visram Mouji, 1923-1926.

(2) "*Sauhata gaja pīṭha parana āvrta gana (gaja)-kāmani*
Āruna tana lāla vasana mālā mugataki vani

Rūpa rasika gāvana pika pritama manamohani
Jovana mata riḥhata cita Desi kahāta rāgañi||" *Suvarṇa-mālā* Vol. I, No. 4, p. 32-33, 1924.

Both the text and the miniatures are late versions not ante-dating the middle of the nineteenth century.

To the third quarter of the eighteenth century belongs an interesting Hindī text which provides some very attractive verses for rāga-mālā illustrations. It is a short treatise called *Rāga Kutūhala* composed by a Gauḍa Brahmin of Jayanagar named Rādhā Kṛṣṇa (Kavi-Kṛṣṇa), under the patronage of Prince Bhīm Singh of Unyār-gaḍ (Jaipur State). It bears a colophon¹ dated Saṃvat 1853 (1781 A.D.). It gives a general survey of the theories of Hindu music and also describes the 'pictures' of the melodies ("*Kahaun rīti saṅgīta kī, rāga-rūpa darasāi*"). It survives so far as we can gather in a single manuscript,² which has not yet been published. The rāga-mālā text of this poet has, however, been utilised and published by Bhānu-Kavi in his *Kāvya-prabhākara*. And we have quoted several verses from this text (Plates VII, X, XIII, XIX, XXV, XXVIII, XXX, XXXII, XXXIV, XXXVII, XXXIX, XLIII, XLIV, XLIX, LXI, LXIII, LXIV, LXVII, LXXXVI, and LXXXVII) to indicate the high merit of these rāga-mālā verses. The composition of this text proves that the demand for rāga-mālā texts and pictures had continued unabated, at any rate, as late as the end of the eighteenth century. We have not, however, been able to trace any, miniatures which have utilized the excellent verses of Rādhā Kṛṣṇa. Whether they have offered materials for pictorial illustrations or not, the verses are very distinguished compositions of their kind and are marked by qualities of ideas, imageries, and dictions very rarely met with in the average level of rāga-mālā texts. We

(1) "Saṃvat guna sara vasu mahi mās anūp|

Sudī pācai ravi-vara-yuta bhayou prantha sukha-rūp||"

(2) The work is described from a Ms. by Kunwar Brajendra Sinha of Dholpur in an article entitled "Rāg-Kutūhala", published in the Hindi Journal *Sarasvatī*, November 1933, pp. 425-26. I am indebted to the writer of the article for other informations connected with this text. He has cited from *Rāg-Kutūhala* six descriptive verses on the iconography of Bhairava, Mālkous, Des, Bhūpālī, Deśkārī, and Śyām. On comparison of these verses with the text borrowed in *Kāvya-prabhākara*, we find slight variations in readings which suggest that Bhānukavi had used some other Ms. of the text.

have, therefore, frequently quoted from this text for the purpose of affording comparison with the earliest and the latest poetical efforts on this topic, though the quotations have been made under the erroneous assumption that they are works of Bhānu Kavi, the author of *Kāvya-prabhākar*. As typical examples of the qualities of his verses one may particularly study the *savaiyās* on Toḍī (Plate XIX) and Kakubha (Plate XXVIII) which are marked by remarkable depth of feeling and also by considerable technical skill.

We quote here from the text of *Rāg-Kutūhala* two more verses, not cited on the descriptions of the plates:

“Bhairava: On his matted locks the Ganges sparkle and play; his large forehead is clasped by snakes; his three eyes offer emancipation from all woes; and round his face the earpendants dangle; his body, smeared with ashes, carries ornaments provided by snakes; and his hands carry the trident, and the drum which he beats; it is the incomparable picture of Sadā-Śiva (a gracious aspect of the God). The melody of Bhairava shines as a great masterpiece (picture).”¹

‘Śyām: Her body shines with the beauty of clouds; she has snatched away the picture of the figure of Kṛṣṇa (Ghana-śyām). The glitter of her yellow robes is full of beauty; she has decked her brow with specks of saffron. The damsel dallies in sweet smiles which raise new desires in one’s heart. Such is the great melody Śyām, carrying a wreath of jewels round her neck,—a captivating beauty,—as the incarnation of Cupid.’²

- (1) “*Sisa jaṭā sira saṅga umaṅgati, bhāla viśāla mayaṅka virājai*
[*v.r. pīta jaṭā sira gaṅga umaṅgata (Kāvya-prabhākara)*]

Aṅga vibhūti dharai ahi-bhuṣana, sūla liye kara damarū
(*v.r. bhairava*) *vājai*

Rūpa anūpa Sadā-śiva-mūrati, Bhairava-rāga mahā chavi
chaājai”

Rāg-kutūhala (Sarasvatī, Nov. 1933, p. 426).

- (2) “*Śyām: Tan syām-ghaṭā abhirāma lasai,*

Ghana-syām ghaṭā-chavi chīni lai”

Ati sobhita pīt dukūlani kī duti,

Kum-kuma-vindu līlā daī

If we judge by a comparison of the verse describing Mālkous rāga as cited from *Rāg-Kutūhala* with the verse cited by us from a Ms. of the text of Harivallabha (Plate XIV: Hindī text: Harivallabha As. So. Ms.) we find that Rādhākṛṣṇa has sometimes adopted the text of Harivallabha. In the case of Mālkous, the verses are identical except in the two concluding lines.¹

A late text of Rāgamālā which we owe to an author named Gangādhar, is a small treatise of 27 verses. It was composed in Samvat 1855 Chait vadi 2 (April, 1798 A.D.).² According to the system followed, the author accepts the following major rāgas: Bhairava, Mālkous Hindola, Dīpaka, Śrī-rāga and Megha-rāga. The rāgiṇīs are those given in the scheme of Hanumān (Appendix 7). Each of the six rāgas are described in a *dohā* followed by a *savaiyā*, while the rāgiṇīs are described in short and simple *dohās*. We cite here four illustrative examples:—

Gangādhar:

“Now, the image of the melody Mālkous: Malkous wears

*Mrdu hāsa-vilāsa karai vanitā,
Ura main umagai abhilāṣa nai|
Vaha syūm visāl garai mani-māl,
Manohara mūrati main-mai||*”. Ibid, p. 426.

The above verse is not cited in Bhānu-Kavi's *Kāvya-prabhākar*.

(1) “Mālkous: Tana jovana jora marorani soun

*Rasa-vīra chakeo mana dhīra dharai|
Kara-mai karavāl liye chavi soun
Paṭa lāla pravālaki joti harai|
Rati koka-kalā paravīna mahā
Dṛga dekhata rūp anupa bharai
Yahi Mālai kos udata kiye*

Aravindo-prasāna ki māla gai|| Ibid, p. 426.

(2) It has been printed as the second part of Rāga-ratnākara, a collection of Hindī Hymns published by Khemraj Kṛṣṇa Das in the Vyankatesvara Press, Bombay 1893. In the colophon which gives the date, the author states that with six rāgas and 30 rāgiṇīs they make up 36 melodies. But Miya Tansen has sung about 111 melodies'. The writer is indebted to Rai Bahadur Bishan Swarup of the discovery of the treatise, and the name of the author, which is not given in the work itself but is gleaned from a reference in another work dated 1874.

a robe of blue, he holds a white staff in his hand. He wears on his shoulders a string of pearls, he is accompanied by a number of lady companions. Dressed in blue robe, his shining complexion puts to shame the prince of Kausaka (?) With garlands on his shoulders and a white staff in hand he is the very picture of the purity of the flavour of Love. He overpowers the heart of women, and by his beauty attracts the gaze of all. At early dawn he is up and seated. Hero and Lover, he is contemplating on his colourful exploits of love.”¹

“Now the image of Madhu-mādhavī: Golden in complexion, with eyes like lotuses, the damsel is of incomparable beauty. She is seated laughing with her beloved—such is the picture of Madhu-mādhavī.”² Now the image of Hindola-rāga: Hindola is robed in yellow, he is seated at the centre of the swing. The confidanté are swinging him with passion, singing and singing with smiles.

“Who has made this masterpiece of beauty, seated on the swing in a mood of passion, as it rocks to and fro? The ladies are swinging him, singing songs with gusto and without reserve. Their shining complexions enhanced by their yellow robes flash like lightening. All the young damsels indulge in the sport, carried away by hilarious mirth and passion.”³

The Hindī authors we have discussed do not exhaust all the poets and versifiers who have provided rāga-mālā texts for the pictorial artists. We have only been able to notice those who have been cited on rāg-mālā pictures.

The compilation of music data, offered by Maharaja Sawai Pratap Sinha Deo of Jaipur (1779-1804) in his Hindī work entitled *Sangita-sūtra*, gives the iconography as well as the note structure of a large variety of rāgas. The iconographical notes giving the image (*svarūpa*) are in prose, and are mere paraphrases of well known Sanskrit texts as will appear from the specimens cited below. The author has cited several new rāgas of which, four quoted here, may be found interesting.

“Now the picture (image) of Velāvalī is written: For the purpose of meeting her beloved in the trysting-place, she is putting on her jewels, (sitting) on the terrace; and she is repeatedly recalling and invoking her favourite deity—the god of love; her complexion is like the colour of blue lotus. A rāgiṇī visualised as above, one should recognize as Velāvalī.”¹

“Now the picture (image) of Lankā-dahan is written. His complexion is fair, he is dressed in a white robe, he is turning a lotus in his hand, his eyes are large, his tresses are long, he is an adept in the Art of Love, his body is soft, he wears jewels on all his limbs, he carries a staff in his other hand, he is contemplating in his heart on the God Siva, he is associated with his friends. A rāga thus visualized should be recognized as Lankā-dahan.”

*Savaiyā: Kinhe-vanāva mahā-chavi sundara bhāvate vaithyo
hidolahi dolai: jhūla-jhulāvata ournihūm sava gāvata
hai sakhiyān-mukha-kholai: Gore jo gāta dipāta vari
dyuti dāminisī mānou pita paṭolai: Keli karai avalā
āaveli alola-svai-rasa kāma kilolai|| 50 ||*

“Rāg-ratnākar, pp. 326-327.

(1) “Atha vilavaliko svarup likhyate|| Sanketamai piyake pās
jāyveko anganmai ābhūṣan pahare hain| Or apano iṣṭa
deva jo.

*Kāmdēva tāko bārambār smarāṇ kare hai|| Nile kamalako
so jāko*

Sarirako rang hai| aisi jo rāgiṇī tāhi Vilāvali jāniye||

The melody is a hybrid rāga, composed of Devagiri, Kedār and Gārā.¹

“Now, the picture (image) of Līlāvati is written: her complexion is red, her eyes are like the petals of lotus, her gait is like that of a rutting elephant, her friend is Indra, she is dressed in variegated robes, she wears ropes of pearls, she carries a lotus, she is immersed in the flavour of love, she is of sixteen summers, she is accompanied by confidantés of the same age, her braid is strung with garlands of flowers, she is wearing a smile. A rāgiṇī thus visualized should be recognized as Līlāvati.”²

This melody is a hybrid rāgiṇī, composed of Jaita-Śrī, Lalit and Deśkār.

“Now the picture (image) of Tārā-Dvani is written: her complexion is fair, she is dressed in yellow robe, she is

Saṅgita-Sār, Saptamo rāgādhyāya, Poona Edition, 1912, Part VII, p. 41.

This is an obvious paraphrase of the Sanskrit text, cited on Plate XXXIX.

besmeared with sandal paste, she has saffron spot on her forehead, her eyes are large, she has tied a pair of amulets on her head, she is contemplating on the God Śiva, she is attended by her confidantés, she wears a rope of pearls on her neck, and various jewels on all her limbs,—she is sporting in company with pea-cocks, she is generous and liberal. A rāga thus visualized should be recognized as Tārā-dvani"¹

A short treatise on Hindu Music, in Brajabhāsā verse by Diwan Lachiram, written in Gurumukhī characters survives in a manuscript² bearing a colophon dated Samvat 1880 (A.D. 1823). The second chapter (*prabhāva*) describes the six rāgas and in the following chapter the rāginīs are described with some elaboration. The verses given in this text have not been traced on any rāginī miniatures.

A music-scholar³ has cited some verses from a Hindi treatise named *Sangīta-Sudarśana* composed by another theorist from the Punjab named Sudarsan-ācārya, who quotes the opinion of another named 'Svara-sāgara.' According to this text, Mālakous has five wives:—It has been said in the *Svara-Sāgara* that this rāga (malkous) has the picture of an ascetic, it has Visnu as its presiding deity, and, therefore, it is a peaceful and spiritual melody, its principal

- (1) *Sivji-nai un rāgan-mai-son vibhāg kariveko apanai mukha-son Śuddha-mallār sankirna-Kedāra gāike vānko Tārā-dvani nām kino|| Atha Tārā-dvaniko svarūp likhyate|| Goro jāko rang hai|| or pītamvarko pahare hai|| Candanko anga-rāg lagāye hai|| līlāmai kesarko tilak lagāyo hai|| or vadē netra hai|| Vāranko judā mātthe vandho hai|| Śiv-jiko dhyān kare hai|| nūtran karīke saran hai|| motinaki māla kanthamai pahare hai|| or say anganmai ābhāsana pahare hai|| moranke samuhamai vihar kare hai|| param udār hai|| Eso jo rāga tānhi Tārādvani jāniye|| Ibid, p. 176.*

queen is Bhaṭṭāhārī.”¹ But the meagre quotation specifying the names of the melodies according to an unknown school of Ganapati, does not give us any idea as to the verses descriptive of the different melodies.

That the practice of Hindu music had not missed the significance of emotive values and their related pictorial illustrations and musical iconography is proved by the interesting work in Hindī entitled *Nād-vinod*, by Gossain Cunni Lalji published in Samvat 1953 (1896 A.D.). The author cites the standard Sanskrit śloka descriptive of the rāgas and rāginīs and paraphrases the Sanskrit texts in Hindī prose. He does not offer any independent rāga-mālā texts. His descriptions are illustrated by quaint wood-cuts giving pictorial versions of some of the melodies of which some typical specimens have been cited on Plate CXV.

The latest poet who has bequeathed to us a dissertation on Indian music in Hindī is a modern poet of great distinction who wrote voluminous verses on a variety of topics under the pen-name of Bhānu Kavi, and which were collected and published under the title of *Kāvyaprabhākar*.² This volume treats of various conventions at topics, which it has been the practice of old Hindi poets to write verses upon. The topics are divided under 15 chapters (mayukhas), the second chapter being devoted to music (*Sangīta*). As explained in the short preface to this chapter, the author's materials are derived from older authorities and treatises e.g. *Mūlādhār*, *Rāga-ratnākar* and others. Bhānu Kavi, has thought fit to give us a short metrical treatise on music with a complete rāga-mālā text for the current rāga-system. As pointed out above, his verses describing the iconography of

(2) This was printed and published in Samvat 1966 (1909) by Ganga Vishnu Srikrishna Das, Lakhni-Vyankateswar Press, Kalyan. The Poet's real name is Jagannath Prasad. He received a good education in English and served as a Deputy Collector at the time of retirement.

rāgas (*rāga-rūp*) are borrowed from the text of Rādhā Kṛṣṇa's *Rāga-Kutūhala*, although he does not acknowledge the debt. When we quoted, on the descriptions of the plates, from the *Kāvya-prabhākar* the texts describing several rāgas, it was not known that Bhānu Kavi had drawn his materials bodily from the text of *Rāg-Kutūhala*.

It cannot be claimed that this modern poet, the latest contributor to rāga-mālā texts, wrote his verses to answer the demand of illustrators. For, the demand of rāga-mālā pictures had ceased by the middle of the 19th century. During the centuries, the practice of composing rāga-mālā verses had grown up, and poets accepted this subject as a conventional topic, worthy of poets. And Bhānu Kavi has only touched upon a topic hallowed by ancient poets, without the slightest hope of his verses being put to any practical pictorial uses.

The large body of rāga-mālā texts in Hindī, a fraction of which we have been able to consider here, came into existence in answer to a demand to popularise the currency of the melodies in accurate presentation of their distinctive emotive values, for, they have been used in intimate application to the pictorial illustrations, the pictures justifying the texts as much as the texts justified the pictures, both contributing to an accurate knowledge of the different emotional significances of the different, though sometimes, related melodies. As compared with the brief and miniature forms of the Sanskrit prototypes, the Hindī descriptive texts are not confined to essential iconographic lineaments of the images suggested in the Sanskrit prayer formulas (*dhyāna-śloka*s), but in their popular Hindī versions, these original musical images are each amplified and elaborated in an emotional situation, in an appropriate dramatic form which makes it easier to apprehend their inherent emotive concepts. This may be typically illustrated by comparing the Sanskrit dhyāna and the corresponding Hindī version of the Lalita rāginī (plate XXXVI) in the meagre Sanskrit texts, there is hardly room for anything but a suggestion that the lady, carrying a wreath as a memento of her dalliance over-night heaves heavy sighs (*"vinīśvasantī sahasā prabhāte"*), when with the sun-rise her beloved walks out of the love-chamber to attend to the duties of the day. In

the Hindī version,—the germ of this idea is elaborated into a dramatic device—in which the forlorn lover left alone in her couch when the sun is up, is plunged in grief (*“Ugata Bhānu cale navakānta tāvai tiya dekhi viyogame bhīnhi”*). Unable to detain her lover by any plausible excuse She tries to pick up a lover’s quarrel, unreasonably taunting him with the false charge that he is going to another lover, whom he loves. And the poet, in order to elucidate the state of the feeling of the lovers parted at day-break, (the appropriate hour for singing the melody), introduces this clever dialogue with remarkable dramatic effect. All this elaboration is implied but not actually suggested in the Sanskrit text, and naturally grows out of the seeds imbedded in the essence of the emotional idea connotated by the melody of Lalita rāginī. Other examples of such happy dramatization of the essential emotive concept, in charmingly picturesque situations of profound feelings of diverse flavours and shades, are strewn over the numerous Hindī texts quoted on the Plates (in Volume II) which the reader may find out for himself.

While the Hindī versions helped to broadcast the message of Indian music and to a popular realization of the qualities of rāgas among an ever-growing circle of appreciation far beyond the narrow clique of learned experts, it was found that the meaning and significance of the rāgas were inaccessible to a large group of cultured men ignorant of the Hindī dialects. India has hardly seen more sincere and enthusiastic admirers of her music, than the enlightened princes of the Moghul dynasty whose patronage brought about very rich and significant developments in the art and the science of music. But the Moghul patrons took care to ascertain accurately the fundamental principles of Indian musical science, before proceeding to help towards its further growth and enrichment. And for this purpose, more than one authoritative treatises in Sanskrit were translated into Persian as the basis of a scientific investigation.¹ The most typical effort on this line, was the translation of the Sanskrit and Hindī treatises into Persian. The *Rāga-darpaṇa*, the

Persian
texts.

(1) The investigation has been going on since the days of ‘Amir Khusrau (1296-1315 A.D.).

Sangīta Darpaṇa, *Sangīta Pārijāta*, and the Hindī treatise. *Mān kutūhala* were made available in Persian versions.¹ Led by Akbar, the grandeés of the Imperial Court, (Hindu as well as Mohamedan), became intelligent connoisseurs of Hindī Music, and developed an ardent curiosity to study music from all points of view. The popularity of the rāga-mālā pictures helped to stimulate and satisfy this curiosity, through pictorial and literary forms. The descriptions of the distinctive 'images' (*tasvīrs*) of the rāgas were demanded in Persian versions and musical interpreters learned in the two languages, were not wanting to answer the demand. Various illustrations of rāginīs had already been painted by Mussulman artists. A typical example is the Moghul version of Toḍī rāginī, wrongly attributed to Rizzā 'Abbāsī. Though the attribution is wrong, the example proves the popularity of rāginī pictures amongst Mussalman artists."

The earliest attempts to indicate the nature and quality of the motive of rāgas in Persian versions appear to be represented by interpretive annotations written on rāga-mālā pictures of which some typical examples are borrowed here (Plate CXI, A.B. & C) from the Johnson Albums in the India Office. They appear to be quite early, if not the earliest specimens of their kind. The miniatures B & C (Plate CXI) appear to be earlier than A, and have the explanation in Persian crudely inscribed on the top and at the bottom beyond the borders which frame the pictures. The other examples, Śrī-rāga (Plate CXI-A) is of much more interest as it provides the Persianized version of the Hindī original cited on Plate LII-C, which it copies somewhat crudely substituting an interpretation in Persian in place of the Hindi verses of Pearay Rangalāl. An early series of examples in the Government Art Gallery, Calcutta, are of high aesthetic merit, both in their lovely and native types of figures, and in

(1) The *Mān-kutūhala* was translated by Fakur Ullah; the *Pārijāt* was translated by Deena Nauth in 1724 A.S. (Vide Sir W. Ouseley 'Anecdotes of Indian Music,' *The Oriental Collections*, Vol. I).

(2) Coomarswamy *Catalogue of Indian Collection*, Boston Museum, Part VI, Moghul Paintings, Plate LXI, p. 71.

their deeply felt emotional contents. From this series, four specimens have been borrowed in the second volume (Plates XVI-C: 'Toḍi'; LXI: Vasanta; LXIV-D: Megha-rāga, and CXIV: Khamāic). On this series beyond the ornamental border in yellow, certain Persian texts are inscribed indicating the name of the rāginī, and the rāga to which it belongs. Strictly speaking, the texts are mere labels for identifications, and do not suggest the atmosphere of the melodies, and have no literary pretensions. These labels show the necessity of Persian texts for a class of patrons of Hindu music who had no knowledge of the Hindī language and to whom the Hindi texts conveyed no information. These Persian labels establish a demand for Persian texts for which we have other evidences.

The most important and authenticated evidence is provided by the unique Persian rāga-mālā album, three pages from which are cited in Volume II (Plate LXXIII-B, Śyām Gujarī, Plate CXII-A, Dīpak rāga, and B, Khokkar rāginī). The album consists of 84 paintings together with descriptions in excellent Persian verses, explaining the illustrations opposite to the text.¹ The colophon, in prose, states that the work was executed under the command of His Imperial Majesty Muhammad Shah and completed at the city of Kābul in the year 1150 Hejira (1737 A.D.) and presented to the Emperor. The demand for rāga-mālā pictures, appears to have continued unabated to the middle of the 18th century, and also very much later. If we study the text of the Persian versions of the pictures of rāga-mālā, we find that though the identity of the characteristics of each rāga is adhered to in the interpretations, a good deal of the romantic atmosphere and mystical significance inherent in Hindi love-poetry, derived from the *rasa-śāstra* (the canons of erotics) have evaporated in the Persian translation, though the illustrative pictures still retain some of the glamour and *naivetè* of the pictorial concepts. Śyām Gujarī (Plate LXXIII B) perhaps carries the sweetest memory of the fragrance of the best prototypes. The illustrations have no original merit in their

Persian
Rāga-mālā
Album.

(1) Other pages from the album illustrating 4 rāginīs are reproduced in *Shāmā'a* vol. V, January 1935, p. 154, by Syed Hashmi in an illustrated article: 'Indian Ragamala in Persian.'

style and conception and they can only be judged by the extent of the flavour of the original that they have been able to retain. The Persian verses visualizing Śyām-Gujarī appear to lend the appropriate atmosphere for the melody by calling attention to the enjoyment of nightingale, and to the image of the forlorn heroine, vowed to join her beloved, pouring her sorrows to the peacock, the very picture of intense love-longing. The version of Dīpak is perhaps less happy; but, the whole series of pictures in this album and the charming verses describing them stand for a very sincere and ardent attempt to get at the ideas behind the conception of Indian melodies.

R ā g m ā-
lā with Per-
sian inscrip-
tions.

There can be no doubt that many such pictures must have been painted, and many more of such texts may have been rendered in Persian versions. For, we have, at least, one complete set of rāga-mālās with interpretations in Persian superscribed on the miniatures themselves. This is the admirable series in the Collection of the Prince of Wales Museum, Bombay. Their pictorial patterns are adaptations, if not copies, of finer and earlier series in the India Office (Johnson Album, Vol. 43 and Vol. 37) with the descriptive texts, in Persian, superscribed on rectangular panels at the top and at bottom. The correspondence in pictorial motifs and designs are evident from the juxtaposed examples (Plates CVI,-C and D: CVII-A, and B: CVIII-D and E: CX-C and D). On stylistic grounds, the series in the Prince of Wales Museum may be dated about the end of the 17th or the beginning of the 18th century; they, therefore, ante-date the album from Kabul discussed above. The descriptions inscribed on these series indicate the rāga to which each rāginī is assigned and also its appropriate time and season. This is followed by a somewhat bold recital of the details of the atmosphere related to the melody, but without any suggestion for the emotional background. The descriptions were put on more for the purpose of interpreting and enjoying the pictures for their own sake, rather than as graphic diagrams of musical concepts.

Later examples of rāga-mālā Pictures with Persian texts occasionally come to light. An incomplete series is in the collection of a dealer in Bombay from which we have borrowed an example on the plate on the opposite page. It is a very

rare illustration of Puhupa rāginī.

If the beauty of musical concepts levied its tribute from the scholars and poets in Hindi and Persian languages, the votaries of the Bengali language, followed suit. And we have at least one metrical treatise which provides not only a complete rāga-mālā text in Bengali, but also offers a general survey of Indian musical literature and the main essentials of the theory, expounded in simple *payār* (rhyming) verses couched in the archaic language of the time, together with specimens of songs illustrating the melodies.

Rāgmālā
Text in
Bengali.

This laudable effort we owe to the enterprise of a Bengali music-theorist named Radha Mohon Sen who published his treatise in the Bengali year 1225 (1881 A.D.). He gives a summary of the different systems of rāgas according to the School of Hanumāna, Bharata (Brahmā), Somesvara, and Kallināth, and also cites the opinion of *Tuph-e-t'ul Hind* and other Persian treatises. He devotes a section of his work to the contemplative images of rāgas and rāginīs, which offer descriptive word-pictures of the different melodies according to the School of Hanumāna. Though not of much literary merit, the verses in long strings of couplets fulfil their purpose and convey to us the main outlines of the iconographic peculiarity, and the emotive personalities of the melodies. His verses, as a matter of fact, give us attractive physical portraits of the personified melodies rather than any subjective musical values. As will appear from the citations of representative verses from his work, they are based on Sanskrit texts, but are not accurate translation, but only free rendering, sometimes with many omissions, of important iconographic details and frequent additions of original imageries.¹ "Barārī: Barārī is the second rāginī (of Bhairava), a young damsel, who makes the four quarters effulgent with her radiance. Her tresses are new clouds—her robes are white: the flowers of the Wishing Tree are her pendants for the ears. Her face is the Moon without the marks (spots) of the deer. The 'beauty' has golden bracelets on her wrists. The breadth of her waist is very narrow her navel is deep like a lake, and her breasts are firm. The

(1) The original Sanskrit text (Plate XI) has 'deodāra' flowers (*Sura-vṛkṣa puṣpam*) instead of *Kalpa-druma*' flowers.

fragrance of her body is fascinating: the blind bees mistake it as that of lotuses.¹ In a pleasant mood she smiles and indulges in pleasantries with her beloved. The damsel shines as a full-toned melody, the string of notes being Sa, -ri, -ga, ma, -pa, -dha, ni: Her home is in the note 'Sa' she should be sung at the end of the day."²

"Madha-mādh (Madhya-mādi): Madha-mādh is incomparable in beauty; her complexion is gold, her robes are yellow. Her frisky eyes are emphasized with pasted collyrium, a wag-tail seems to dance on a golden lotus. A pearl-top at the end of her nose,—resembling a dew-drop on a flower of sesame. Her body is radiant with the paste of saffron, she is a damsel from the family of septa-tonic melodies. She adores her lord like cupid and gives him kisses and embraces. The quarter of her abode is the note *ma-dhyama* (F) the succession of the notes are ma-pa-dha-ni-sa-ri-ga. Suitable for the six seasons beginning with the autumn, she is to be sung in the morning."³

(1) The Bengali version misses the fly-whisk (*cūmara*), an important iconographic detail.

“Sindhuvī (Saindhavī): She was in expectation of her lord, Sindhuvī, has given up that hope. The appointed hour has gone by, still the beloved has not come. This has led to deep resentment; she assumed the robes of an ascetic. Having cast aside her scarlet robes she has assumed russet ones (proper to ascetics). Casting aside jewellery she has be-decked herself with strings of rosaries (*rudrākṣa*: Śiva's rosary) and crystals. She abjured the fragrance of *aguru* (scented wood and saffrons, and besmeared all her body with ashes. Making pendants from Vandhuka flowers, she wore them on her ears. Taking a trident, and the counting-beads in her hands, Sindhuvī is worshipping Śankara (Śiva). A septatonic melody having its abode in the note 'sa', the succession of notes being sa-ri-ga-ma-pa-dha-ni. Proper for the six seasons, beginning with autumn, you should sing it at the end of the day.”¹

Toḍī: The damsel Toḍī, beloved of Mālkausa has a complexion of yellow: with saffron and camphor on her body,

and dressed in white robe. Her developed breasts are firm, her waist is thin. Her navel is deep, she has the shine of gold. Her tresses are strings of clouds, her face is the full-moon, in which dance her eyes like those of a fawn and in which shine her teeth like a row of pearls. She wears jewelled ornaments, of incomparable beauty. Venus says to Cupid—'Be sure do not forget me, if you please.' Her patterned beauty, lights up the four quarters: she plays on a *vinā*, reposing in a meadow. The strings of the *vinā*, shine like the rays of effulgence, discoursing melodious music with the sweet fifth note (G). She practises the form of the melody in her improvisation, by hearing the melody, birds and animals are moved to tears. Absorbed in the song, the fawns dance before her, without fear. The melody of *Toḍī* belongs to the Septa-tonic variety, and its structure is made up of the notes *sa-ri-ga-ma-pa-dha-ni*. In the abode of the note *Sa(C)* it is counted with the winter season, its songs are sung after the first quarter of the day.¹

"*Dīpak*: The eyes of the Sun are hot and severe, and there was *Dīpak* born. His robes are scarlet, and strings of large pearls grace his neck. He rides on a rutting elephant, with young lads and lassies, some on the right, some on the left, some hanging on him. His beloved indulge in pleasantries, and in this manner he roams frequently. I count it amongst the septa-tonic class, the string of notes being—*sā-ri-ga-ma-pa-dha-ni*. The season is the spring, the

Enough quotations have been given from the work of Rādhā Mohan Sen, to convey the nature and quality of the rāga-mālā texts composed in Bengali rhyming metre (*payār*) prevalent at the time. He adds many piquant accessories and details which make his portraits of the rāgiṇīs shine out in rich, vivid, attractive, and sensuous colours. No rāga-mālā paintings appear to have been painted in Bengal,¹ so that the text of Rādhā Mohan Sen have had no other uses excepting conveying to practising musicians in Bengal, ignorant of Sanskrit, the systems of the classification of the melodies, and their individual characteristics in pictorial as well as in musical form. "*Saṅgīta-Taraṅga*" appears to have acquired sufficient authority and the author of "*Rāga-Kalpa-druma*" pays it a compliment by quoting passages from this Bengali work in his anthology.

Varasādhītute vidhān| Rājānira śesa-bhāge karivek gān||"
Ibid, p. 161.

(1) Excepting, of course, the illustrations appearing in the edition of Harivallabha's Ms. in the Nahar Collection which was executed in Murshidabad. [Plates XX, XLII, LXVI, etc.].

PICTORIAL MOTIFS

That rāga-mālā pictures have been painted, (in different parts of Northern India), whether in relation to specific Hindī texts, or independently, throughout the centuries right up to the nineteenth, is amply borne out by the large number of surviving miniatures. The demand for these specimens of "visualized music" must have been continuous, and wide-spread, and, in order to meet the demand, skeleton drawings (*khākās*, pricked drawings), and other outline sketches from the patterns designed by gifted artists were used by lesser artists who found it profitable to meet the popular demand. An interesting series of skeleton drawings (not pricked outlines), from the Tagore Collection are collected on Plate CXIII and other examples are cited on other plates for purposes of comparison (Plates I-A, XIII-B). On the drawings in the Tagore collection are inscribed in Hindī and Persian, the names of the rāgiṇīs, with indications and suggestions for the colour schemes. They must have been the basis of finished miniatures, although no finished specimen corresponding to these particular designs, has yet been traced. The most interesting of these series is the one representing Hāmavirī (Plate LXLVIII-C) which has helped to identify the well-known miniatures (Plate LXLVIII, A and B), not, hitherto, recognized as illustrations of the rāgiṇī. The drawing for Bhairō (Plate I, A), also helps us to identify an analogous drawing (Boston Museum, CCXI, No. 17.2822) as an illustration of the melody. The example in the author's collection (Plate XIII-B) is perhaps the finest specimen, both in its elaborate pattern and impressive setting.

Materials are not adequate for a demonstration of the processes by which familiar scenes and experiences in life were adopted and developed and utilized into patterns and designs for visualizing the Indian melodies. But one, or two suggestions may be made how characteristic scenes and themes may have been worked out and idealized into

Sources of
Pictorial
Motifs.

a pattern for a rāgiṇī picture. The three examples of Kāṇaḍā rāgiṇī cited on Plate L, seem to indicate the three stages in which, a hunting melody, originally used by attendant *Shikāris* (hunters) helping a Prince in his elephant-hunts, later developed into the rich but plaintive strain of the melody now recognized under the name of Kāṇaḍā. Possibly, when the prince killed an elephant, the attendants stood up to salute the hunter and broke into congratulatory cheers, in some crude *minstrel-songs* (*cāraṇagitis*), in which the plaintive groans of the dying animal mingled its deeply moving notes of sorrow, which perhaps still linger in its refined, finished, and developed structure, now known to us. In the final 'picture' that it evolved, it obliterated all traces of its origin, and in this developed picture (Plate L-A) it is interpreted as a song of inspiration to Kṛṣṇa (Kānar=Kānorā) as He starts to ride out from His palace to kill the demon *gajāśura*.¹ The sources of the pictorial motifs have been forgotten, defaced, or obliterated in most cases. But we shall endeavour to indicate the origins of the motif woven into the theme of the Toḍī rāgiṇī. Possibly, the melody came originally from the peasants' field. Very probably, it was a melody sung by the wife, or daughter of the peasant who watched the paddy fields, (as they still do to-day, from sunrise to sunset, perched on a bamboo frame), chiding away the deer, and other animals which strayed into the fields, in groups, to eat up the standing crop, before it was ready to be shorn. Perhaps, the farmer's daughter, weaned away the encroaching depredator, by the music of her primitive lute, which attracted the deer, and kept them away from mischief. Some such picture, is called up by many stray passages in ancient poetical literature. We seem to have vivid pen-pictures of deer dropping the food they were chewing in the crop-fields in their depredatory raids, under the enchanting strains of music. Thus in Śrī-Harṣ's "*Nāgānandam*," in the dialogue of Ātreya and Jimūtavāhana

(1) Like Hercules, Kṛṣṇa is credited with a series of brave and adventurous deeds of valour and heroism, one of which is the vanquishing of a demon in elephant's form (*gajāśura*). Another of the exploits of Kṛṣṇa is worked into the theme of *Śiraṅga-rāga* (Plate LXL).

(Act 1), this appears to be the identical picture suggested: "Ātreya: 'Even the deer prick up their ears, and listen to the strain with their eyes closed, while from their mouth falls the half-chewed grass.'" That the depredatory deer were attracted by the songs, or the music of the dames who kept watch over the paddy fields, is suggested by a passage in Subandhu's *Vāsavadattā*: "With herds of deer delighted by the songs of happy female guardians of the rice."² This seems to be graphically pictured in the miniature (Plate XV-C), where we find the graceful guardian of the paddy-field, attracting the herds by her music, and alluring them away from the young shoots of paddy which will yet take a long time to mature. The partiality of the deer for music, was an old recognized piece of zoological knowledge, and very soon passed into poetic conventions, of which several applications are met with in Sanskrit literature. Thus in *Vāsavadattā*, we read: "With herds of deer delighted by the notes of songs of *kinnaris* (satyrs) close by."³ Other examples of the convention occur in the *Kathā-Sarit-Sāgara*⁴ and in two passages in Hemachandra's *Parīṣiṣṭa parvan*.⁵

- (1) *Nāgānandam* translated by B. H. Wortham, London, p. 28.
- (2) *Vāsavadattā* (Gray's Translation, Columbia University, 1913), p. 135-36, Text (at p. 192, line 8) "*Hṛṣṭa-kalama-gopikā-gīta-sukhita-mṛga-yuthe*." On this passage, the commentator Sivarām (Hall's edition, p. 288) glosses '*kalama-gopikā*' as '*Sāli-samrakṣikā*', that is, 'guardians of the paddy fields'.
- (3) Gray's translation, p. 126. Text (at page 187, line 9): "*Samāsanna-kinnari-gīta (śravaṇa-ramamāṇa) ruru-visareṇa*." [266].
- (4) In the anecdote of Harivara and Anaṅgaprabhā (Penzer's Edition, Vol. IV, p. 152). Text: "*Sa tena gīta-śavdena śruteṇa harīṇo yathā| Akṛṣṭo' bhyapatattatra rathamunmucya kevalaḥ||*" 197.
- (5) "*Pāṇalīputra-nagare yatra yatra jajou sa tu| Tatra tatra yayuḥ pourāḥ gītākṛṣṭāḥ kuraṅgavat||*" 39 (Bib. Indica, Edition, IX, 39). "*Rājāpi tasyāstād-akṣa-niḥ kṣobhatvena vismitaḥ| Utkarṇo' bhut kathāṃ śrotuṃ gītiṃ mṛga-ivocakaiḥ||*" 194 *Ibid*, III, 194.

"Wherever Kunāla went, the citizens of Pāṭalīputra followed like deer attracted by music." "They pricked up their ears to hear his words, like deer anxious to listen to music." These poetic conventions have also their practical application in the methods employed to capture gazelles which is described by Alberuni: "I myself have witnessed that in hunting gazelles they had caught them with the hand. One Hindu even went so far as to assert that he, without catching gazelles, would drive it before him and lead it straight into the kitchen. This however, rests, as I believe I have found out, simply on the device of slowly and constantly accustoming the animals to one and the same melody. Our people, too, practise the same when hunting the ibex, which is more wild than even the gazelle. When they see the animals resting, they begin to walk-round them in a circle, singing one and the same melody so long until the animals are accustomed to it. Then they make the circle more and more narrow, till at last they come near enough to shoot at the animals which lie there in the perfect rest."¹

This practice of hunting deer by the lure of music is recorded in a picturesque Hīndī verse, in the form of the deer's wail in which the animal hungry for the music expresses itself ready to sacrifice its body in lieu of the prize of a musical treat: "When a single leaf rustles, I fly to the island of Ceylon; (but having heard the notes of your flute, I have offered to you my head as a present; you can sell my horns and turn them into coins, and roast my meat to eat, take my skin to make into rugs, but O! do please treat me to the music of your flute!"²

Sometimes old legends and folk-stories have been adopted and worked into the themes of rāga-mālā pictures. Thus, an old snake legend has provided the theme for the Āhirī rāginī.³

The practice of visualising musical compositions in pictorial forms is no more confined to India. During the last few years a few European artists have made attempts to set down famous master-pieces of music into visualized pictures. The "Twenty-four Preludes" of Chopin have received pictorial interpretations by Robert Spies, an English artist.¹ A few years earlier, Miss Pamela Colman Smith exhibited in London, a series of pictorial drawings, interpreting famous musical pieces, which included Paderewski's "Chant du Voyage", Chopin's "Prelude No. 4", César Franck's "Symphony", Schumann's "Kinder-scenen" and Debussy's "Granada", and other pieces.² Yet, another series of illustrations of musical master-pieces were exhibited by Miss Juliet Williams at the Aeolian Hall in 1926, which included visualized versions of Bach's "Concerto in E", Chopin's "Berceuse", Debussy's "L'Après-midi d'un Faune", and Borodin's "Unfinished Symphony."³

Dr. Bake has cited the Latin verse composed by Monk Adam of Fulda (15th century) descriptive of the character of different musical modes. "There are even images of the different modes with inscriptions that run: "This mode is the first as far as the singing of songs full of melody is concerned. That which follows is the second in rank and importance. The third portrays the suffering and glorification of Christ. Then follows the fourth mode; its chants portray sorrow." The statuettes represent female figures in different attitudes and of different expressions. Consequently, it is

Painting, Part V, p. 99; *Journal, Punjab Historical Society*, IV, 2, 1916, p. 118.

CRITICISM

The function that the Indian melodies, as *rāgas*, have been made to play, namely, of spelling out in the language of symphonic formulas definitive *rasas*, capable of evoking a variety of human emotions has yet to be investigated with reference to the nature of the psychology of musical expression. So much mystery has hovered round the phenomenon of musical expression itself, that until recently no clear conception of the nature of musical utterance has been possible. Great lovers of music have helped to intensify rather than elucidate the mystery. Definitions of music such as that of Cardinal Newman, as "the out-pouring of eternal harmony in the medium of created sound", or of Carlyle, who called "music a kind of inarticulate, unfathomable speech leading us to the edge of the infinite", or that of Lafcadio Hearn—who characterized music as "a psychical storm, agitating to unimaginable depths the mystery of the past within us", can only be regarded as emotional effusions, rather than as scientific enunciations of the nature of musical expression. Even the attempts of expert musicians have not been helpful in unravelling the mystery of the riddle. The technical experts, long persisted in the psychological fallacy, that music had nothing to do with the ordinary emotions of life, but were concerned with emotions peculiar to music itself—i.e. purely musical emotions. According to this view, supported by psychologists like Dr. W. Brown¹ and M. Combarieu, music is a unique kind of thought and musical concept which connotes sensations unattainable in the other medium. Says M. Combarieu: "La musique est l'art de penser avec des sons sans concepts." [Music is an art of thinking in

(1) Dr. W. Brown: "Music expresses an emotional life peculiar to itself. The emotions expressed are not the emotions of everyday life, nor are they even idealised forms of these emotions." *The Quest*, 1912.

terms of sound without concepts']. The logical implication of this view is that music, unlike painting and sculpture and, like architecture, is incapable of rendering, or expressing a theme, a subject, or a topic. It is one thing to say that music is a language, having laws and logic of its own, and it is quite another, to suggest that music can only deal with matters peculiar to the Kingdom of Sound and is unable to utter, express, or deal with subjects of human emotion, or other thematic materials. According to this doctrine, music is a Non-representative Art,—an Art of production of certain dynamic shades, tempos, phrasings, tone colours—blended into a design of orchestration—having a significance other than that of intellectual, or emotional values. If it arouses any emotion,—the same is not akin to anything that can be imitated, or verbally described. To put it in the language of plastics, music is decorative rather than illustrative. Its patterns have dynamic rather than thematic motifs. There is a certain amount of truth in the doctrines indicated above. It insists, somewhat unduly, on the quality of music as “pure art values”—something akin to ‘abstract aesthetic qualities’ aimed by exponents of modern paintings in attempting to release the art of painting from the tyranny of subject-matter. The exponents of the modern movements in painting have demonstrated that it is possible—to produce ‘pictures’ of great aesthetic significance, without recourse to any subject, theme, or anecdote. A picture need not tell any story, or represent any imitation, or description of nature. ‘Absolute painting’ though they represent nothing,—evokes a disinterested aesthetic sensation,—due to a happy perception and contemplation of special relations, dimensions, proportions, accents, colour values and rhythm inherent in the quality of the design, claiming to attain the condition of music. But this demonstration of the quality of non-representative painting, does not invalidate the capacity of the painter’s craft to represent, delineate, or imitate nature, or to render themes of human or emotional significance. And if music possesses, as it indeed does, in a large measure, the power of creating forms of ‘pure aesthetic values’,—it is not incapable of rendering and expressing concepts evocative of human emotions. Indeed, a school of psychologists, supporting the ordinary popular view, has strenuously empha-

sized on this function of music and some have gone to the length of declaring that music possesses an emotional power greater than that of speech itself and the expression of human emotion is its essential mission and glory. 'There is little doubt that music "can suggest and stimulate feelings akin to those produced by the vicissitudes of real life, and it can interest, fascinate, delight, or weary and displease, by what we can only call the purely musical quality of its sound patterns" (Vernon Lee). Musical experience has indeed proved to us that certain musical patterns, can well induce reveries peopled with a whole phantasmagoria of tender, weird, or alarming shapes,—reminiscences which one loves to recall, or shrink from recalling,—longings too unbounded to be called hopes—a submerged world of baffled endeavours, undirected passions, romances lived only in fancy. These take form again and again and become embodied in sound, emerging from the caverns of the mind where they have been biding their time of summons into the light of recognition. This phenomena of the evocation of human passions, sentiments and feelings (*rasas* in term of Indian aesthetics) is explained by psychologists by the theory of 'emotional memory'. As enunciated by M. Ribot, this doctrine claims that emotional states divested of all their accompanying circumstances can leave behind them a memory of themselves. Feelings of love, fear, disappointment, anger, elation, disentangled and disassociated from its cause on the various occasions on which such feelings were experienced, attain an *abstract emotional state*, or *form*—which musical patterns can arouse and through them, by means of association "a kind of emotional reverberation," call up in each hearer his own particular images and ideas which once formed the settings of such emotional states when originally experienced by each individual.

The patterns of Indian musical melodies claim to answer somewhat to these *emotional abstract states* or generalized forms of emotions visualized in dramatic forms with approximate "accompanying circumstances." The melody *Ṭoḍī Rāgiṇī* [Plates XV-XX] is the emotional symbol of the "feeling of the country side." The human response to the call of nature is embodied in the image of *Ṭoḍī*, the Indian pastoral symphony *par excellence*. The melody of the early

morning—Lalita, [Plate XXXVI] symbolises on the one hand,—the break of the night and the day, and on the other hand,—the separation of the lovers with all its pangs and sufferings told in all the poignancy of the dramatic situation. Here the, 'emotion' as well as its dramatic 'setting' or 'circumstance' or both indicated. In the version of Lalita [Plate XXXVII]—in which the offending lover returns at day-break after spending the night with a rival—the sorrows of love are given in an altogether different 'circumstance', or 'setting'. Vibhāsa [Plate LXXXV], another of the early morning melodies,—pictures pangs of separation—in an analogous, though a somewhat different environment. The cockcrow is the sworn enemy of all love-carousals—and the melody is symbolised in the picture of a lover attempting to shoot the early cock with his bow and arrow. In a version of Lalitā [Plate XXXVII-D]—the feeling of the satiety of love (*rati-trpti*) is pictured in the symbol of a beautiful lady who has come out of her love-chamber early in the morning accepting the advent of the dawn as a logical termination of a chapter of love. Rāmakelī [Plate XXXII],—the melody of resentment, claims to concentrate within the orchestration of its peculiar notes—the emotion of an offended lady vainly assaured by her lover. Vasanta [Plate LX] in the dancing rhythm of its symphonic form, suggests the emotion of human-beings on the advent of the new spring. Likewise,—the manly and sonorous symphony of the Megha rāga [Plate LXV]—pictures the majesty of clouds—and the inevitable longings for love-union—that the rainy season invokes. Kānoḍā [Plate LI]—pictured in the image of a young lady—standing at the foot of the *Aśoka* tree—lean as a golden creeper and drenched in tears—is the lamentation of a heroine cut off from her lover by cruel fate. On the other hand, Bhūpālī [Plate LXXXVI]—the evening melody,—is the silent joy of the lover as she meets her beloved at the door by her bed-chamber—with her present of flower-garland which she has been weaving for him during the long hours of the separation. In a version of Kāmoda, [Plate XLVIII] the melody suggests the rapture of love-dalliance symbolised in a pair of lovers, who on the pretext of picking lotuses, have selected the loneliest spot by the lotus-pond. And if in some of the morning melodies, pas-

sion and the sorrows of separation, receive undue emphasis, this is amply compensated by the conception of Bhairavī [Plate IV],—likewise a morning melody, which,—symbolized in the person of Pārvatî,—worshipping the image of Śiva—in a crystal temple, glorifies the unsullied purity of Love without Desire, and Passion purified by Renunciation. Such are some of the radiant images which flit across the vision of Indian musical imagination. Though rendered in obviously sensuous forms,—they transcend our sense-experience and transport us to a region of super-sensual ecstasy—an atmosphere of sublimated and spiritual emotion.

LIST OF MUSICAL TEXTS

In Sanskrit, Hindi, Persian and Bengali

(Items not otherwise indicated represent Sanskrit Texts).

[This list does not pretend to be anything like a complete Bibliography of Indian Musical texts. It represents texts actually utilised in collecting data put forward in this work].

	Date.
Dattila-muni (mentioned by Bharata, 1-26): DATTILAM	Circa 2nd century A.D.
Bharata: NĀṬYA-SĀSTRA, (Chapters 28, 29, 38)	Circa 4th century A.D.
Nārada: NĀRADĪYĀ-ŚIKṢĀ CH. II ..	Circa 5th century A.D.
Mataṅga-muni: BRHAD-DEŚI ..	Circa 5th to 7th century A.D.
KUṬUMBIYAMALAI INSCRIPTION (PUDUKKOTTAI)	Circa 7th century A.D.
Nārada: SAṅGITA-MAKARANDA ..	Circa 7th to 9th century A.D.
RĀGA-SĀGARA (attributed to Nārada and Dattila)	Circa 8th century A.D.
Mammaṭa: SAṅGITA-RATNA-MĀLĀ ..	Circa 9th to 13th century A.D.
NĀṬYA-LOCANA	Circa 9th century A.D.

APPENDICES

CLASSIFICATION OF RĀGĀS IN THE APPENDICES

1. According to Dattila (Second Century A.D.)
2. According to Bharata's Nāṭya-Śāstra (C. 3rd Century A.D.)
3. According to Brhaddeśi by Matanga (Circa 5th to 7th Century).
4. According to Sangīta Makaranda by Nārada (Circa 7th to 9th Century A.D.)
5. According to Mammata (about the eleventh century A.D.)
6. According to Nāṭya-locana (circa 850-1000 A.D.)
7. According to King Nānya deva's Sarasvatī—Hṛdayalāmkāra (circa 1097 to 1154 A.D.)
8. According to Someśvara Deva (circa 1131 A.D.)
9. According to Sangīta-Ratnākara by Śārangadeva (1210-1247 A.D.)
10. According to Sangīta-samaya-śara by Pārśvadeva (circa 1250 A.D.)
11. According to Rāga-sāgara, attributed to the joint authors Narada & Dattila.
12. According to Rāgārṇava (datable about the 1300 A.D.)
13. According to Pancama Samhitā by Narada.
14. According to Kallinātha, (1460 A.D.)
15. According to Rāgamālā by Meṣakarma (dated about 1509 A.D.)
16. According to Raga-Tarangini by Locan-Kavi (circa 1375 A.D.)
17. According to Svaramela-kalānidhi by Rama-matya (1550 A.D.)
18. According to Rāgamālā by Pundalik Vithala.
19. According to Catvārimśacchata-raga-nirūpanam by Narada (circa 1550 A.D.)
20. According to Rāga-vivodha by Soma-nath (1609 A.D.)

21. According to Raga-Darpana by Dāmodara Miśra (circa 1625 A.D.)
22. According to Hrdaya-prakāśa by Hrdayanārāyaṇa Deva (circa Samvat 1724-1646 A.D.)
24. According to Catur-dandi-Prākāśikā by Vyankatamakhi (1660 A.D.)
25. According to Anūpa-Saṅgītāṅkuśa by Bhava-Bhaṭṭa (1674-1701 A.D.)
26. According to Anūpa-Saṅgīta-ratnākara, by Bhava-bhaṭṭa (1674-1701 A.D.)
27. According to Saṅgīta-narayana by Purushottama Misra, court poet of Narayana Deva of the Gajapati Dynasty (Circa 1730 A.D.)
28. According to Saṅgīta-Sārāmṛtoddhāra by King Tulaji of Tanjore (1763-1787 A.D.)
29. According to Rāga-Kutūhala by Radha Krishna Kavi, composed in Samvat 1853-1781 A.D.
30. According to Saṅgīta-sara, compiled by Maharaja Sawai Pratap Sihma Deo of Jaipur (1779-1804 A.D.)
31. According to Brahmā.
32. According to the School of Bharata.
33. According to the School of Hanumāna.
34. According to the Hindi texts inscribed on the series of miniatures in the British Museum Ms. Add. Or. 2821.
35. According to a Hindusthānī (Urdu) Manuscript of Rāga-mālā by Saiyid "Abd-al-Walī" Uzlat, (A.D. 1759).
36. According to Pandit V. N. Bhatkhande (Pundit Viṣṇu Sarma), B.A., LL.B. of Bombay, as given in his Sanskrit treatise Abhinavaraga-manjari (Poona 1921).

APPENDIX 1.

Eleven Composite Jātis (modes).

According to Dattila (Trivandram Edition, No. CII, 1930, p. 5, 49-54).

The data of this text, if not the text itself, may be as early as second century A.D.

Names.	Component Jātis.
1. Sadjā-Madhyamā	Sadjā, Madhamā.
2. Sadjā-Kaiśikī	Sadjā, Gāndhārī.
3. Sadjodicyavatī	Sadjā, Gāndhārī. Dhaivati.
4. Gāndharodicyavā	Sadjā, Gāndhārī, Madhyamā, Dhaivati.
5. Madhyamodicyavā	Gāndhārī, Madhyamā, Pancamī, Dhaivati.
6. Rakta-Gāndhārī	Gāndhārī, Madhamā, Pancamī, Naisādī.
7. Āndhrī	Gāndhārī, Ārsabhi.
8. Nandayantī	Gāndhārī, Ārsabhi, Pancamī.
9. Kārmāravī	Gāndhārī, Nisādī (*).
10. Gāndhāra-Pancamī	Gāndhārī, Pancamī.
11. Kaiśikī	Sadjā, Gāndhārī, Madhyamā, Pancamī, Nisādī.

* "Sa-nisādastu gāndhāryah kuryu karmāravīmimāḥ" 53.

The text differing from Bharata & Śārangadeva, appears to suggest that Kārmāravī is a composed of two modes:—Gāndhārī & Nisādī.

APPENDIX 2.

The Eighteen Jātis (modes).

According to Bharata's Nāṭya-Śāstra, C, 3rd Century A.D.

(Chapter 28, Verses 41-45.)

Sadjā-grāma.	Madhyama-grāma.
Sadjī (or Sadjā)	Gāndhārī (or Gāndhārā)
Ārsabhi	Madhyamā
Dhaivati	Pancamī
Nisādinī (or Nisādavati)	Gāndhārodicyavā
Sadjodicyavatī or Odicyavā	Gāndhāra-Pancamī
Sadjā-Kaiśikī	Rakta-Gāndhārī
Sadjamadhya (or madhyamā)	Madhyamodicyavā.
	Nandayantī.
	Kārmāravī.
	Āndhrī.
	Kaiśikī.

Eleven Composite Jātis.

(Chapter 28, Verses 48-54.)

Names.	Component Jātis.
1. Saḍja-Madhyamā	Saḍjī, Madhyamā.
2. Saḍja-Kaiśikī	Gāndhārī, Saḍjī.
3. Saḍjodīcyavā	Saḍjī, Gāndhārī, Dhaivatī.
4. Gāndhārodīcyavatī	Saḍjī, Gāndhārī, Pancamī, (Madhyama, G), Dhaivatī.
5. Madhyamodīcyavā	Gāndhārī, Pancamī, Madhyamā, Dhaivatī.
6. Rakta-Gāndhārī	Gāndhārī, Pancamī, Niṣādi.
7. Āndhrī	Gāndhārī, Ārṣabhī.
8. Nandayantī	Ārṣabhī, Pancamī, Gāndhārī.
9. Karmāravī	Niṣādi, Ārṣabhī, Pancamī.*
10. Gāndhārapancamī	Gāndhārī, Pancamī.
11. Kaiśikī	Saḍjī, Gāndhārī, Madhyamā, Pancamī, Niṣādi.

* “Karmāravīm niṣādi sārṣabhī pancamī kuryuh” 53.

Classification or Jātis, according to the number of their notes (svaras).

(Chapter 28, Verses 57-64.)

	4 Sampūrṇa (Hepta-tonic)	4 Sāḍva (Hexa-tonic)	10 Auḍava (Penta-tonic)
Saḍja-grāma.	1 Saḍja-kaiśikī	1 Saḍjī	5 { Ārṣabhī Dhaivatī Niṣādi Saḍja-madhyamā Saḍjodīcyavatī
Madhyama-grāma	3 { Karmāravī Gāndhāra-pancamī Madhyamodīcyavā	3 Gāndhārodīcyavā Āndhrī Nandayantī	5 { Gāndhārī Rakta-gāndhārī Madhyamā Pancamī Kaiśikī

APPENDIX 3.

CLASSIFICATION OF RĀGAS.

Into Rāga-gītis, Sādhārana-gītis, Bhāṣā-gītis, Bibhāṣā-gītis.

According to Bṛhaddeśī by Matanga (Circa 5th to 7th Century,) melodies, known under the generic name of *gītis*, or folk-songs, or airs, were of seven varieties, one of which represented the *rāga-gītis* or melodies proper. The melodies had their derivatives known as *bhāṣās*, the latter being subdivided into *Vibhāṣās*. The *bhāṣās* & *vibhāṣās*, correspond to *rāginīs* of later times.

[Bṛhaddeśī (Trivandrum Edition) p. 82-133. The Author follows two earlier authorities Yastika & Śārdūla.]

GĪTIS.

- | | | | | | | |
|---------------------|------------------------|-----------------------|-------------------------|-------------------|--------------------|----------------------|
| 1. Suddha-
gītis | 2. Bhin-
naka-gītis | 3. Goud-
ikā-gītis | 4. Sādha-
raṇī-gītis | 5. Rāga-
gītis | 6. Bhāṣā-
gītis | 7. Vibhāṣā-
gītis |
|---------------------|------------------------|-----------------------|-------------------------|-------------------|--------------------|----------------------|

SĀDHĀRANA-GĪTIS.

- | | | | | | |
|---------|-----------------|----------------------------|-----------------------|------------------------------|----------------------|
| 1. Śaka | 2. Kaku-
bha | 3. Ha-
māṇa-
Pancama | 4. Rūpa-
sādhārīta | 5. Gānd-
hāra-
Pancama | 6. Śadja-
Kaiśika |
|---------|-----------------|----------------------------|-----------------------|------------------------------|----------------------|

These were later accepted in the classes of *rāga* proper, affiliated to the earliest *rāga* system.

RĀGA-GĪTIS.

- | | | | | | | | |
|----------------------|------------|-----------------------|-----------------|-----------------------|-------------------|-------------------|----------------------|
| 1. Takka
(-Tanka) | 2. Souvīra | 3. Mālava-
Pancama | 4. Khā-
ḍava | 5. Malava-
kaiśika | 6. Voṭṭa-
Rāga | 7. Hīndo-
loka | 8. Takka-
Kaiśika |
|----------------------|------------|-----------------------|-----------------|-----------------------|-------------------|-------------------|----------------------|

BHĀSĀ-GĪTIS.

Ascribed to each of the *rāgas*.

1. TAKKA-RĀGA

- | | | | |
|-----------------------|-----------------|-----------------|--------------------------|
| 1. Travaṇā | 5. Mālavēsarikā | 9. Vēsarikā | 14. Kolāhālī |
| 2. Travaṇod-
bhavā | 6. Gūrjarī | 10. Pancamākyā | 15. Madhyama-
grāmikā |
| 3. Veranjikā | 7. Sourāṣṭrī | 11. Ravi-Candrā | 16. Gāndhāra-
pancama |

| | | 13. Lalitā | |

2. SOUVĪRAKA

- | | | | |
|------------|----------------------|--------------|-------------|
| 1. Souvīri | 2. Vega-
madhyamā | 3. Sādhāritā | 4. Gāndhārī |
|------------|----------------------|--------------|-------------|

3. PANCAMA

- | | | | | |
|------------|--------------|---------------|---------------|-------------|
| 1. Ābhīrī | 3. Māngālī | 5. Gūrjarī | 7. Āndhrī (?) | 9. Travani |
| 2. Bhāvinī | 4. Saindhavī | 6. Dākṣiṇātyā | (Āndhālī) | 10. Kaiśikī |
| | | | 8. Tānodbhavā | |

4. BHINNA-ṢAḌJA

- | | | |
|---------------|---------------|--------------|
| 1. Viśuddhā | 4. Śrī-kaṇṭhī | 7. Saindhavī |
| 2. Dākṣiṇātyā | 5. Pourālī | 8. Kāliṇḍī |
| 3. Gāndhārī | 6. Vangālī | 9. Pulindī |

5. MĀLAVA-KAIŚIKA

- | | | | |
|----------------------|---------------|--------------|----------------|
| 1. Śuddhā | 3. Harṣa-pūrī | 5. Saindhavī | 7. Khandani |
| 2. Ādya-
vesarikā | 4. Māngālī | 6. Ābhīrī | 8. Guṇjarī (?) |

6. VOṬṬA-RĀGA

Mangalā.

7. HINDOLAKA

- | | | | | |
|-----------|-------------------------|------------|-----------------------|-------------------------------|
| 1. Vesarī | 2. Prathama-
Manjarī | 3. Chevātī | 4. Ṣaḍja-
madhyamā | 5. Madhurī (?)
(Madhukarī) |
|-----------|-------------------------|------------|-----------------------|-------------------------------|

8. TAKKA-KAIŚIKA

- | | | |
|------------|-----------|----------------------|
| 1. Drāviḍī | 2. Mālavā | 3. Bhinna-
Lalīkā |
|------------|-----------|----------------------|

APPENDIX 4.

CLASSIFICATION OF RĀGAS.

According to *Sangita Makaranda* by Nārada (circa 7th to 9th century A.D.)

Two systems are given one after another. According to the first scheme, the major melodies are eight in number, and the minor melodies twenty-four, aggregating thirty-two melodies. According to the second scheme, the major melodies are six in number, and the minor melodies, thirty-six, aggregating forty-two. Owing to a *lacuna* in the text, the second scheme is not available in its entirety.

The first scheme, with three rāginis for each rāga, appears to be very old. But the text of *Sangita-makaranda* is, probably, not as early as the 7th century.

| FIRST SCHEME. |

1. BHUPĀLA

1. Velāvalī

2. Malaharī

3. Vahulī

2. BHAIRAVA

1. Devakriyā

2. Pourālī

3. Kāmbhārī

3. ŚRĪ-RĀGA

1. Kāmbhojī

2. Bhallātī

3. Kuranjikā

4. PAḌA-MANJARĪ

1. Deśī

2. Manoharī

3. Tuṇḍī

5. NĀṬA

1. Sāranga

2. Nāṭakhyā (?)

3. Aharī

6. VANGĀLA

1. Nārāyanî

2. Gāndhārî

3. Ranjî

7. VASANTA

1. Parāṭî
(? Varāṭî)

2. Drāvadî

3. Hamsî

8. MĀLAVA

1. Gunda-kriyā

2. Dhūrjarî
(Gūrjarî)

3. Goudî

| SECOND SCHEME. |

1. ŚRÎ-RĀGA

1. Gouḍî

2. Kolā-
hālî

3. Drāvalî

4. Āndō-
likî

5. Mādha-
vî

6. Deva-
Gāndharî

2. PANCAMA

1. Śuddha-
Nāṭā

2. Sāverî

3. Sain-
dhavî

4. Mālatî

5. Troṭî

6. Kou-
modakî

3. MEGHA-RĀGA

1. Sou-
rāṣṭrî

2. Kām-
bhārî

3. Van-
gālî

4. Madhu-
mādhavî

5. Deva-
krî

6. Bhū-
pālî

4. NĀTA-NĀRĀYANA

1. Val-
labhā

2. Mādha-
vî

3. Vidagh-
dhā

4. Abhi-
sārikā

5. Trivenî

6. Megha-
ranjî

5. VASANTA

6. BHAIRAVA

(The rāginis of the melodies Vasanta and Bhairava do not appear in the text available.)

APPENDIX 5.

CLASSIFICATION OF RĀGAS

into six rāgas & thirty-six rāginis.

According to Maminata (ācārya), author of *Sangita-ratna-mālā* as, cited in *Sangita-nārāyaṇa*. Some scholars identify Mammaṭa, the author of this musical text, with Mammat, the great authority on poetics, author of *Kāvya-prakāśa*, who flourished about the eleventh century A.D.

1. KARNĀṬA

- | | | | | | |
|----------------------|-------------------|-----------|------------------|-----------------------|------------|
| 1. Vand-
hanī (?) | 2. Māla-
vaśrī | 3. Sindhu | 4. Velā-
valī | 5. Prapā-
tinī (?) | 6. Vibhāṣā |
|----------------------|-------------------|-----------|------------------|-----------------------|------------|

2. NĀṬA

- | | | | | | |
|------------------|-------------------|-----------|---|------------|------------|
| 1. Kām-
bhājī | 2. Nāṭa-
bhāṣā | 3. Tudikā | 4. Guṇa-
manjarī
(?)
(-Guṇa-
kriyā (?)) | 5. Śekharī | 6. Mukharī |
|------------------|-------------------|-----------|---|------------|------------|

3. (MEGHA)-MALLĀRA

- | | | | | | |
|-----------|-----------|---------------------|-------------------|-------------------|---------|
| 1. Mallāī | 2. Lalitā | 3. Paṭa-
manjarī | 4. Madhu-
kirī | 5. Bhāṣa-
kāṛī | 6. Deśī |
|-----------|-----------|---------------------|-------------------|-------------------|---------|

4. DEŚĀKH

- | | | | | | |
|------------------------------------|------------------|-------------------|------------------|------------|-----------|
| 1. Guṇ-
jarī
(-Gujjarī
?) | 2. Rāma-
kirī | 3. Guṇḍa-
kirī | 4. Suto-
dikā | 5. Dhānasī | 6. Varāṭī |
|------------------------------------|------------------|-------------------|------------------|------------|-----------|

5. MĀLAVA

- | | | | | | |
|-------------|-----------|--------------------|-----------|------------------------|------------|
| 1. Sivi (?) | 2. Kedāra | 3. Meṣa-
mā (?) | 4. Jivikā | 5. Kandu-
śritā (?) | 6. Travaṇā |
|-------------|-----------|--------------------|-----------|------------------------|------------|

6. VASANTA

- | | | | | | |
|-------------|---|-------------------|-------------------|---|-------------------------------|
| 1. Bhairavi | 2. Rega-
hārī (?)
(-Reva-
guptā ?) | 3. Megha-
tālī | 4. Supan-
camī | 5. Amyā-
toji (?)
(-Āmbho-
jī ?) | 6. Totka
(?) (-Tan-
ka) |
|-------------|---|-------------------|-------------------|---|-------------------------------|

(The absence of the Bhairava rāga, and the ascription of Bhairavi to the group of Vasanta lend an early date to this scheme.)

APPENDIX 6.

CLASSIFICATION OF RĀGAS

According to *Nāṭya-locana* (circa 850-1000 A.D.) into three groups of Śuddha, Śālamka & Sandhi (? Samkīrna) rāgas.

(Ms. No. 111, E. 158, in the Collection of the Asiatic Society of Bengal.)

ŚUDDH RĀGAS

- | | |
|-----------------------|-------------|
| 1. Pañcama-
Mālava | 5. Velāvalī |
| 2. Mādhavārī
(?) | 6. Todī |
| 3. Hindola | 7. Gāndhāra |
| 4. Mālasikā | 8. Nāṭa |

ŚĀLAMKA-RĀGAS

- | | | | |
|------------------------|----------------|---------------|-----------------|
| 1. Lalita | 5. Gurjarī | 9. Gouṇḍakirī | 13. Rāmakirī |
| 2. Nārada-
Bhairavi | 6. Koṭa-Deśāg | 10. Varāḍī | 14. Śālamka |
| 3. Bhāṣa | 7. Deśa-Varāṭi | 11. Vangāla | 15. Deśāga |
| 4. Vasanta | 8. Vicitrā | 12. Karṇāṭa | 16. Mālava-rāga |

SANDHI-RĀGAS

1. Mallāra	7. Divādī	13. Moṭakī	19. Gouḍī

5. Himakīrī	11. Devakīrī	17. Kokīrikā	
6. Savarī	12. Loungīrātī (?)	18. Madhukīrī	

APPENDIX 7.

CLASSIFICATION OF RĀGAS

✓According to King Nānyadeva's *Sarasvatī—Hṛdayāṅkārā* (circa 1097 to 1154 A.D.) available in a single Ms. in the collection of the Bhandarkar Oriental Research Institute, Poona (No. 111 of 1869-70). The author mentions a class called Root-rāgas (mūla-rāga). Unfortunately, he does not specify them.

He gives full descriptions and notations of numerous rāgas, under three groups of 'Ṣaḍja-grāma, Madhya-grāma and Gāndhāra-grāma.

APPENDIX 8.

CLASSIFICATION OF RĀGAS

According to ⁴Someśvara Deva (Circa 1131 A.D.) cited in Rāga-darpaṇa (Raja Sir S. M. Tagore's Edition, 1881, P. 72). The Chapter in the author's Encyclopædia Mānsollāsa, does not give any classification of the Melodies. Probably this is given in his work Sangīta-ratnāvalī, the text of which is now lost.

1. ŚRĪ-RĀGA

2. VASANTA

- | | | | | | |
|---------|-------------|-----------|-----------|------------|-----------|

APPENDIX 9.

CLASSIFICATION OF RĀGAS

According to Sangīta-Ratnākara by Śarangadeva (1210-1247 A.D.). He gives an historical survey of rāgas, according to Kaśyapa, Yastika, and Matanga. He enumerates 30 grāma-rāgas, viz:—7 Sudda, 5 Bhinnakas, 3 Gouḍas, 8 Vesaras, and 7 Sādhāritas (Sādhāraṇa).

GRĀMA-RĀGAS

ŚUDDHA

- | | | | | | | |
|-------------------|--------------------|----------------------|------------------------------|---------|-------|--------------------|
| Ṣadja-
Kaiśikī | Ṣadja-
Madhyama | Śuddha-
Sādhārita | Ṣadja-
grāma
(? Ṣadjī) | Pancama | Ṣaḍva | Śuddha-
Kaiśika |
|-------------------|--------------------|----------------------|------------------------------|---------|-------|--------------------|

(Of these, the first four belong to the Śaḍja-grāma, and the last three to Madhyamā-grāma.)

BHINNAKA

(Of these, the first two belong to the Śaḍja-grāma, and the three to Madhyama-grāma.)

GOUDA

(Of these, the first two belong to Śaḍjāgrāma and the last two Madhyamā-grāma)

VESARA

(Of these, the first two belong to Śaḍja-grāma, the next four to Madhyama-grāma and the last to both grāmas.)

(These 8 Vesara melodies are designated as “Rāga-gītis” by Matanga, Appedix 3.)

SĀDHĀRITA

(Of these, the first three belong to Śaḍja-grāma, the second three to Madhyama, and the last to both grāmas).

8 UPARĀGAS

A group of 17 Rāgas, wrongly stated to be 20 in number:

- | | | | |
|--------------|----------------|---------------|--------------|
| 1. Śrī-rāga | 6. Rakta-hāmsa | 11. Soma-rāga | 15. Deśākhyā |
| 2. Natta | 7. Kohla-hāsa | 12. Kāmōda | 16. Kaiśika- |
| 3. Vāṅgāla | 8. Prasava | 13. Abhra | kakubha |
| 4. Bhāsā | 9. Bhairava- | (Āmra)- | 17. Natta- |
| 5. Madhyama- | dvani | Pancama | Nārāyaṇa |
| ṣaḍava | 10. Megha-rāga | 14. Kandarpa | |

15 JANAKA or "PARENT" RĀGAS.

(on the authority of Yāstika).

APPENDIX 16.

CLASSIFICATION OF RĀGAS.

According to Rāga-Tarangini by Locan-Kavi (Circa 1375 A.D.)

This scheme obviously belongs to the Southern or Carnatic School, according to which 12 root-rāgas or *melas* (major melodies) are chosen, and to each *mela* certain derivative rāgas (*janya-rāgas*) are ascribed. The melody Dīpaka-rāga, the last in the list, is not described and its derivative melodies are not indicated on the ground that at the time of the author, the Dīpaka had ceased to be current and had become unfamiliar to practising musicians.

Melas 12			Janya-Rāgas 77.
1. Bhairavī (?)	(1) Bhairavī, Nilāmvarī.
2. Toḍī	(1) Toḍī.
3. Gaurī	(1) Mālava, (2) Śrī-Gourī, (3) Caiti-Gourī, (4) Parādī (?) Gourī, (5) Deśī-Toḍī, (6) Deśa-Kāra, (7) Goura, (8) Trivāṇa, (9) Mūlatāni, (10) Dhanā-Śrī, (11) Vasanta, (12) Goura, (13) Bhairava, (14) Vibhāsa, (15) Rāma Kalī, (16) Gurjarī, (17) Vāhulī, (18) Revā, (19) Bhatiyāra, (20) Sad-rāga, (21) Mālava-Pancama, (22) Jayanta-Śrī, (23) Āsāvarī, (24) Deva-Gāndhāra, (25) Sindī-āsāvarī, (26) Gunakarī.

APPENDIX 17.

CLASSIFICATION OF RĀGAS

According to *Svara-mela-kalānidhi* by Rāmā-mātya (1550 A.D.)

The scheme belongs to the Southern or Carnatic School, according to which 20 root-rāgas, or *melas* (major melodies) are chosen, and to each *mela*, certain derivative rāgas (*janya-rāgas*) are ascribed. The lists of derivative rāgas given in this work are illustrative and not exhaustive. The table set out below is borrowed from Mr. M. S. Ramaswami Aiyar's edition of the work (Introduction, p. xliv, 1932).

I. Rāmāmātya's 'Genus-species' system.

Melas—(20)		Janya-Rāgas—(64)	
1. Mukhārī	Mukhārī and a few	Grāma Rāgas.	
2. Mālavagoula	(1) Mālavagoula	(6) Mecaboulī	(11) Kuranjī
	(2) Lalitā	(7) Phala-manjarī	(12) Kaṇṇada-vangāla
	(3) Boulikā	(8) Guṇḍakriyā	(13) Mangala-kouśika
	(4) Sourāṣṭra	(9) Sindhu-rāmakriyā	(14) Malharī, etc.
	(5) Gurjarī	(10) Chāyāgoula	
3. Śrīrāga	(1) Śrīrāga	(5) Śuddha-bhairavī	(9) Āndolī

	(2) Bhairavî	(6) Velāvalî	(10) Deva- gāndhārî
	(3) Goulî	(7) Mālavaśrî	(11) Madhya- mādi, etc.
	(4) Dhanyāśî	(8) Śankarā bharāṇa	
4. Sāranganāṭa	(1) Sāranganāṭa	(4) Nattānārā- yaṇî	(7) Kuntala- varālî
	(2) Sāverî	(5) Śuddha- vasanta	(8) Bhinna- śadja
	(3) Sāranga- bhairavî	(6) Pūrvagoula	(9) Nārāyaṇî, etc.
5. Hindola	(1) Hindola	(2) Mārga Hindola	(3) Bhūpāla, etc.
6. Śuddha rāmakriyā	(1) Śuddha- rāmakriyā	(3) Ādradeśî

13. Rîtīgoula	(1) Vasanta- bhairavî	(2) Somarāga, etc.	
14. Vasanta- bhairavî	(1) Kedāragoula	(2) Nārāyaṇa- goula, etc.	
15. Kedāragoula	Hejujjî and Sāmavarālî	a few Grāma R	āgas.
16. Hejujjî	Revagupti	do.	
17. Sāmavarālî	Sāmanta, etc.	do.	
18. Revagupti	Kāmbhoji, etc.		
19. Sāmanta			
20. Kāmbhoji			

APPENDIX 18.

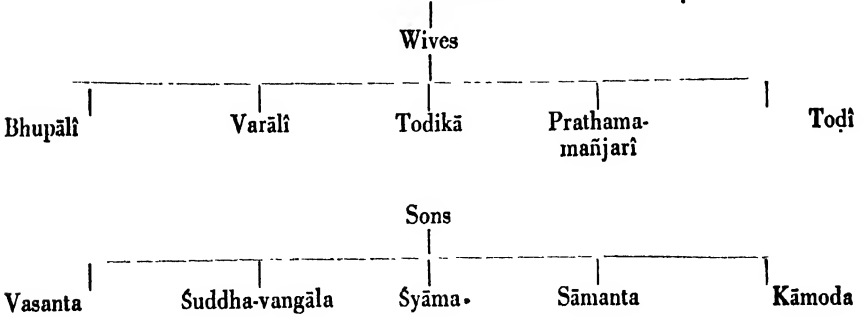

CLASSIFICATION OF RĀGAS.

According to "Rāgamālā" by Pundarik Viṭṭhala[✓], (Ms. in the collection of the Bhandarkar Oriental Research Institute, Poona, with colophon dated śaka 1498-1576 A.D.)

✓ 1. ŚUDDHA-BHAIRAVA

2. HINDOLA

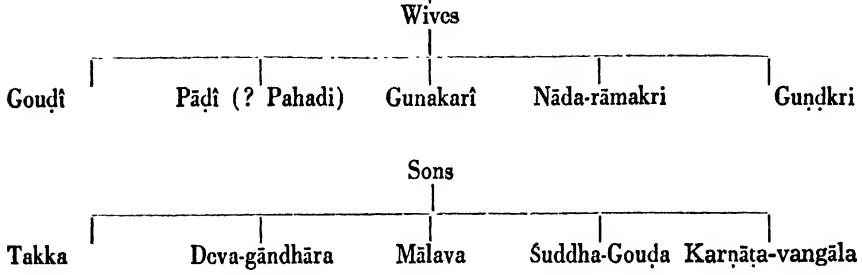

3. DEŚIKĀR

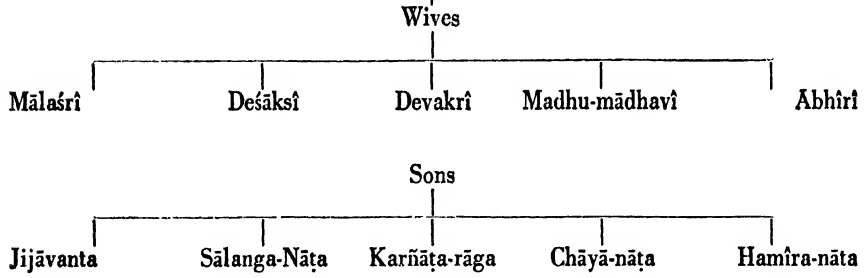

4. ŚRĪ-RĀG

5. ŚUDDHA-NĀTA

6. NATTA-NĀRĀYANA

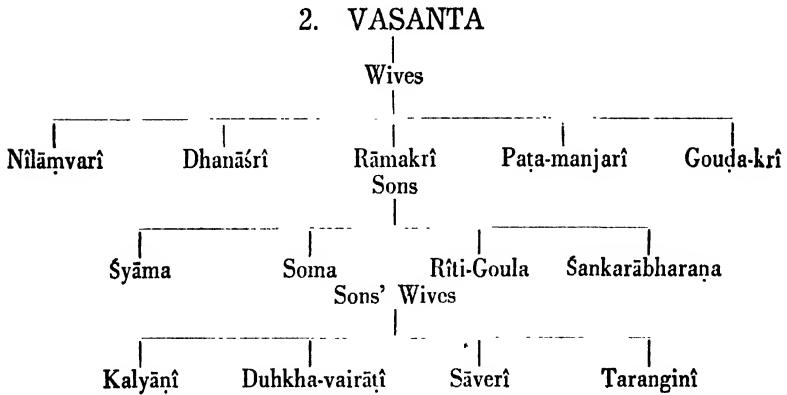

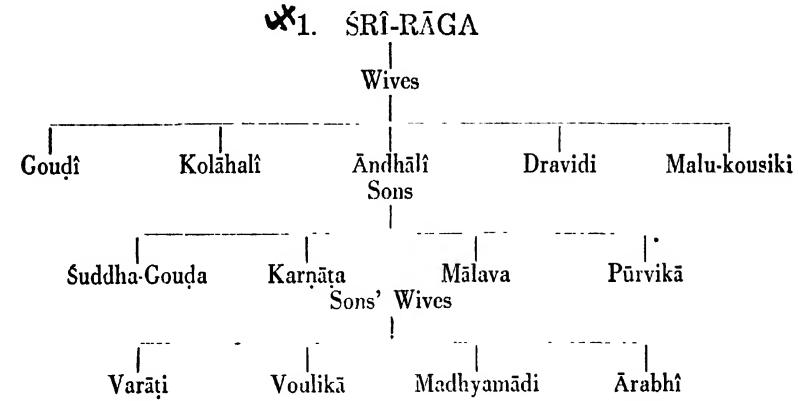

APPENDIX 19.

CLASSIFICATION OF RĀGAS.

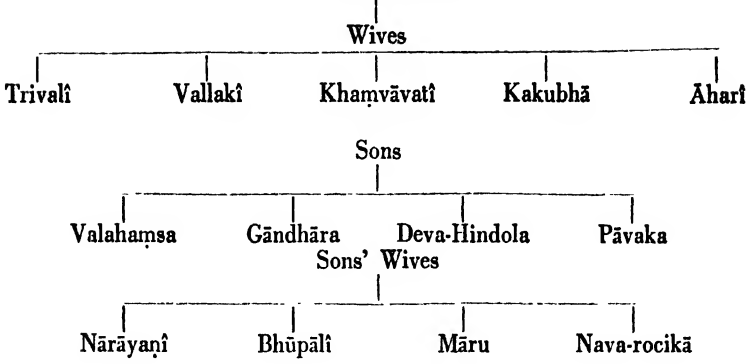

According to *Catvārimśacchata-rāga-nirūpaṇam* by Nārada (circa 1525-1550 A.D.)

This treatise offers a scheme of 10 major male melodies, with five wives for each, four sons for each with four wives. It is quite possible that a scheme of 10 male rāgas is earlier than that of six male rāgas. More probably, this is an attempt to amalgamate two alternative schemes.

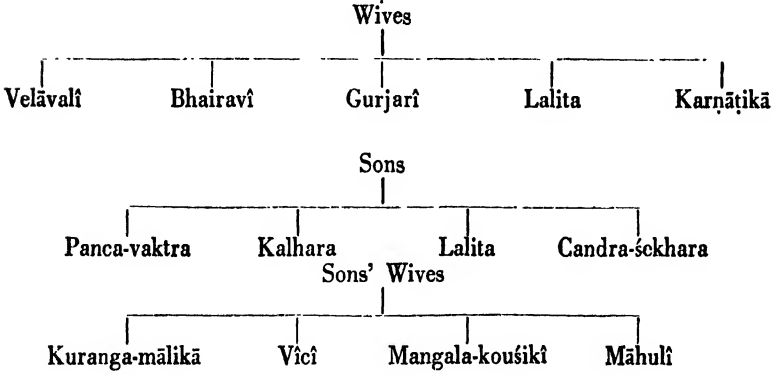

10 Male rāgas. Śrī-rāga, Vasanta, Pancama, Bhairava, Kousika, Megha-rāga, Natta-nārāyaṇa, Hindola, Dīpaka, and Haṃsaka.

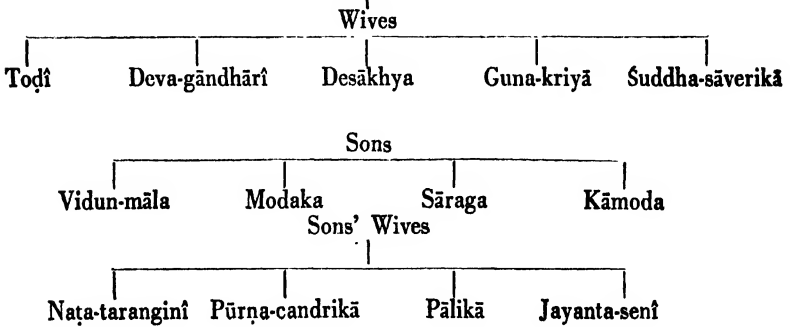

3. PANCAMA

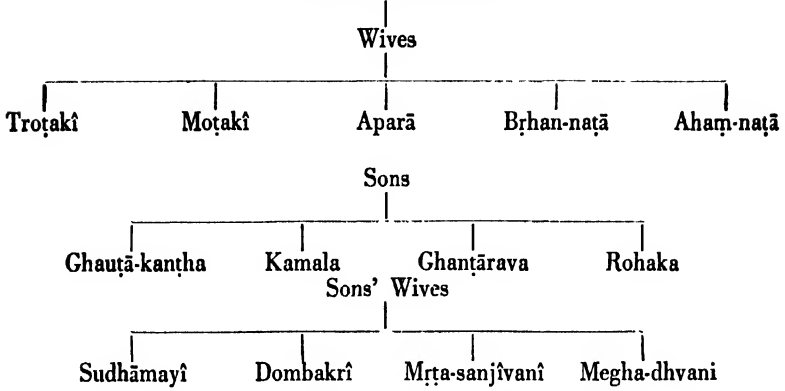

4. BHAIRAVA

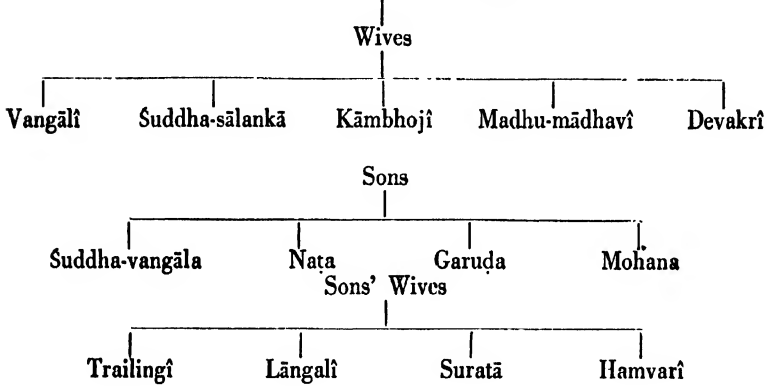

5. KOUŚIKA

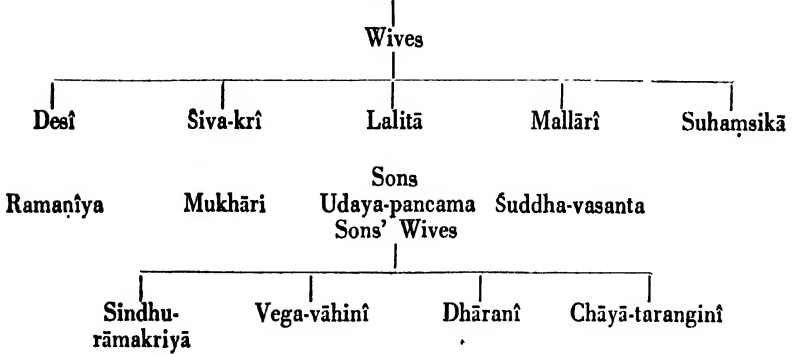

6. MEGHA-RĀGA

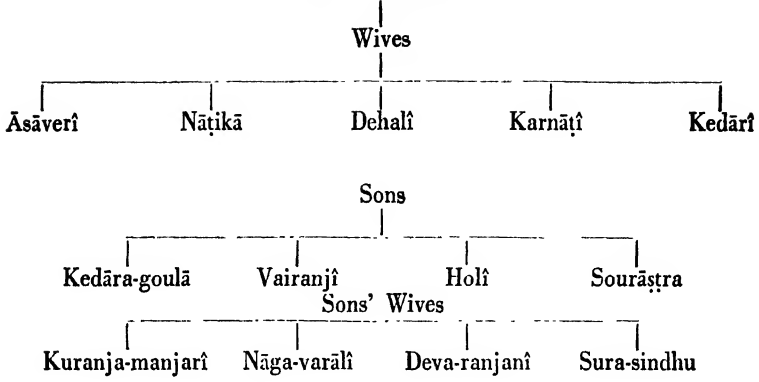

7. NATA-NĀRĀYANA

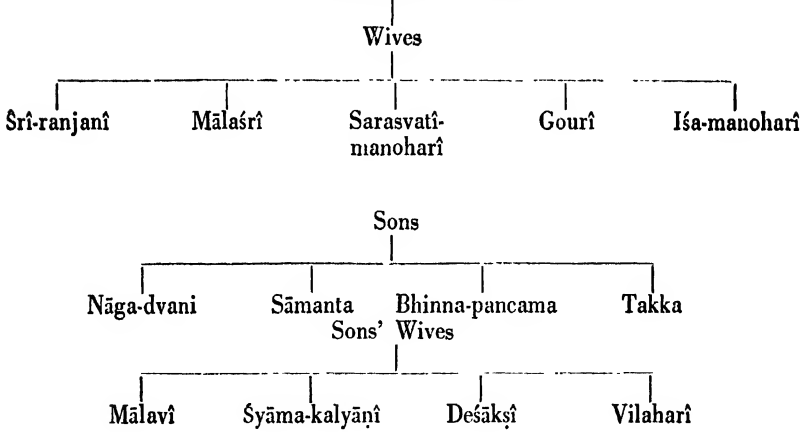

8. HINDOLA

9. DĪPAK

10. HAMSAKA-RĀGA

APPENDIX 20.

CLASSIFICATION OF RĀGAS.

According to "*Rāga-vivodha*" by Soma-nātha (1609 A.D.)

The scheme belongs to the Southern or the Carnatic system according to which the 23 root-rāgas or *mela-rāgas* (major melodies) are chosen to which certain *janya-rāgas* (derivative melodies) are assigned on the basis of an ana-

logy of note-structure. The number of derivative melodies cited are illustrative and not exhaustive.

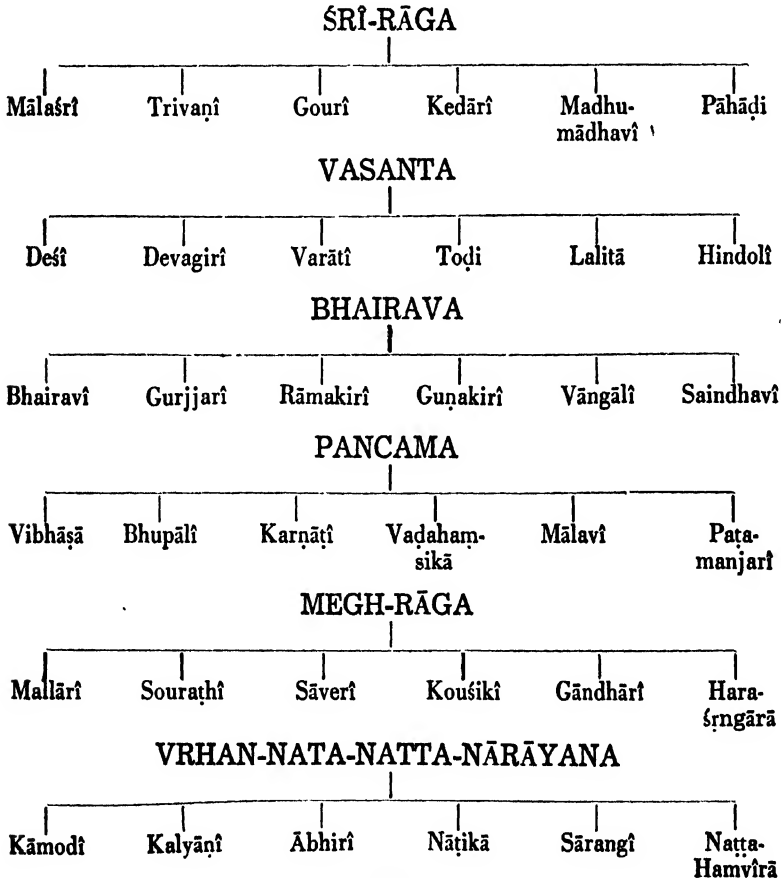

Melas (23)	Janya-rāgas (76)
1. Mukhārī	(1) Mukhārī, (2) Turuṣka-Toḍī and others.
2. Revaguptī	Revaguptī.
3. Sāma-varāṭī	(1) Sāma-varāṭī, (2) Vasanta-varāṭī and others.
4. Toḍī	Toḍī
5. Nāda-rāmakrī	Nāda-rāmakrī
6. Bhairava	(1) Bhairava, (2) Pouravikā
7. Vasanta	(1) Vasanta, (2) Takka, (3) Hijeja, (4) Hindola
8. Vasanta-Bhairavī	(1) Vasanta-Bhairavī, (2) Māravī
9. Mālava-gouḍa	(1) Mālava-gouḍa, (2) Goudī, (3) Pūrvī, (4) Pāhādī, (5) Deva-gāndhāra, (6) Gouḍa-kriyā, (7) Kuranjī, (8) Vāhulī, (9) Rāmakriyā, (10) Pāvaka, (11) Āsāvārī, (12) Pancama, (13) Vangāla, (14) Śuddha-lalita, (15) Gurjjarī, (16) Paraja, (17) Śuddha-gouḍa, (18) Caitī-Goudī and others.
10. Rīti-gouḍa	Rīti-gouḍa.
11. Ābhīra-nāṭa	Ābhīra-nāṭa.
12. Hammira	(1) Hammira, (2) Vihangaḍā, (3) Kedāra
13. Śuddha-varāṭī	Śuddha-varāṭī
14. Śucī (Śuddha) Rāmakrī	(1) Śuddha-rāmakrī, (2) Lalita, (3) Jaitaśrī, (4) Travani, (5) Deśī and others
15. Śrī-rāga	(1) Śrī-rāga, (2) Mālava-śrī, (3) Dhanyāśī, (4) Bhairavī, (5) Dhavala, (6) Saindhavī and others
16. Kalyāna	Kalyāna
17. Kāmvodī	(1) Kāmvodī, (2) Devakrī
18. Mallārī	(1) Mallārī, (2) Nāṭa-mallārī, (3) Pūrva-gouḍa, (4) Bhūpālī, (5) Gounda, (6) Sankarābharana, (7) Nāṭa-nārāyaṇa, (8) Nārāyaṇa-gouḍo, (9) Kedāra, (10) Sālanka-nāṭa, (11) Velāvalī, (12) Madhyamādi, (13) Sāverī, (14) Sourāṣṭrī
19. Śamanta	Śamanta
20. Karnāṭa-gouḍa	(1) Karnāṭa-gouḍa, (2) Addanā, (3) Nāga-dvani, (4) Śuddha-vangāla, (5) Varṇa-nāṭa, (6) Turuṣka-Toḍī-Īrākha
21. Deśākṣī	Deśākṣī
22. Śuddha-nāṭa	Śuddha-nāṭa
23. Sāranga	Sāranga

APPENDIX 21.

CLASSIFICATION OF RĀGAS.

According to Rāga-Darpaṇa by Dāmodara Mīśra (circa 1625 A.D.)

The author first cites the scheme current in his time in the North, and then quotes the schemes according to the Schools of Someśvara, Hanuman, and "Rāgāraṇava." He also gives a list of twenty rāgas, which probably represented a traditional group, which may have been popular before the time of the author. Their names are:—Śrī-rāga, Naṭṭa, Vangāla, Bhāṣa, Madhyama, Śaḍava, Rakta-hamsa, Kohlāsa, Prabhava, Bhairava, Dhani, Megha-rāga, Soma-rāga, Kāmōda, Amra-Pancama, Kandarpa, Deśākhyā, Kukubha, Kaiśika, and Naṭṭa-Nārāyaṇa. Of these many must have ceased to be current in practice at the time of the author.

APPENDIX 22.

CLASSIFICATION OF RĀGAS.

According to “Hṛdaya-koutukaṃ” by Hṛdaya-Nārāyaṇa Deva (circa samvat 1724-1646 A.D.)

The author follows the Southern principle of classification of the ‘genus and species system’ on the basis of choosing certain major rāgas calling them *Samsthānam* (thāṭa) in place of the name *Melaka* used by others.

He adopts 12 root-rāgas, from which he derives the minor melodies.

His 12 major rāgas include a new rāga said to have been created by his patron, the chief of Goḍa deśa (not identified) and called ‘Hṛdaya-rāma.’

- | | | | |

9. Hṛdaya-rāma	Hṛdaya-rāma
10. Dhanāśrī	1. Dhanāśrī, 2. Lalita.
11. Pūrvā	Pūrvā
12. Mukhārī	Mukhārī

An additional root-rāga called Dīpaka is intended to be included but it is not actually described ("Atha ṭhāṭa-prakaraṇa dīpak-saṁsthānaṁ lekhyam").

APPENDIX 23

CLASSIFICATION OF RĀGAS.

According to "Hṛdaya-prakāśa," by Hṛdayanāyana Deva (Circa Samvat 1724-1646 A.D.)

In this treatise the author uses the term *mela* (genus) in place of *Samsthana* (ṭhāṭa) used in his *Hṛdaya-Kautuka*. In the former work, he classifies the parent-scales into eleven *melas*, according to *Suddha* or *Vikṛita*-notes used in the structure of the melodies.

1. Suddha-mela	1. Saindhav, 2. Bhairvī, 3. Nilamvari.
2. Mela with 1 vikṛta note	1. Kaṛṇāṭa, 2. Kakubhā, 3. Jināvātī, 4. Sourāśtrī, 5. Sugharāyī, 6. Kāmoda, 7. Ādānā, 8. Vāgeśvari.
3. Ditto	Mukhārī
4. Mela with 2 vikṛta notes	Todī
5. Ditto	1. Kēdāra, 2. Śyāmā-nāṭaka, 3. Khamvāvātī, 4. Hamvīra, 5. Śamkarābhaṇa, 6. Jayat-kedāra, 7. Pūriyā-kedāra, 8. Vihāgarā, 9. Ahīra-nāṭa, 10. Māru, 11. Bhīma-palāsikā, 12. Chāyā-nāṭa, 13. Khedāra-nāṭa, 14. Māla-kouśika, 15. Bhūpālī
6. Mela with 3 vikṛta notes	1. Īmana, 2. Pūriyā-Kalyāṇa, 3. Jayat-Kalyāṇa, 4. Suddha-kalyāṇa.
7. Ditto	1. Megha, 2. Suddha-nāṭa, 3. Nāṭa, 4. Devagiri, 5. Goura-sāranga, 6. Alāhiyā, 7. Devā-bharana, 8. Deśākha, 9. Gound-Mallāra, 10. Suhāva, 11. Madhyamādi, 12. Mallāra
8. Ditto	Hṛdaya-ramā
9. Mela with 4 vikṛta notes	1. Gaurī, 2. Mūlatānī-dhānasarī, 3. Śrī-rāga, 4. Sadrāga, 5. Caitī-Gaurī, 6. Vasanta, 7. Jayaśrī, 8. Rāmakalī, 9. Paraja, 10. Pancama, 11. Gāndhāra, 12. Āsāvārī, 13. Deśī-Todī, 14. Bhairava, 15. Vahulī, 16. Gurjarī, 17. Gouda, 18. Gunakarī, 19. Deśa-kāra, 20. Mālaśrī, 21. Vibhāsa, 22. Trivāṇa.
10. Ditto	1. Sāranga, 2. Paṭamanjarī, 3. Sāmanta, 4. Vadhamaṁsa.
11. Ditto	Pūrvā
12. Mela with 5 vikṛta notes	Dhanāśrī

APPENDIX 24.

CLASSIFICATION OF RĀGAS.

According to *Catur-dandi-Prakāśikā* by Vyāṅkatamakhî (otherwise called Vyāmkaṭeśvara Dikṣita) (1660 A.D.)

The author belongs to the Southern, or Carnatic School. He severely criticises the author of *Svara-mela-kalā-nidhi*, who gives a list of 20 *melas*, whereas Vyāṅkatamakhî gives a list of 19 *melas*.

(Janaka-melas)			(Janya-rāgas)		
1.	Mukhārî	Mukhārî	
2.	Sāma-varālî	Sāma-varālî	
3.	Bhūpāla	1. Bhūpāla, 2. Bhinna-ṣaḍja	
4.	Vasanta-Bhairavî	Vasanta-Bhairavî	
5.	Goula	1. Goula, 2. Guṇḍakriyā, 3. Sālāṅga-nāta, 4. Nāda-rāma-kriyā, 5. Lalitā, 6. Pādî, 7. Gūrjarî, 8. Vahulî, 9. Mallahārî, 10. Sāverî, 11. Chāyā-goula, 12. Pūrva-goula, 13. Karnāṭaka, 14. Vangāla, 15. Sourāstra.	
6.	Āharî	1. Ābherî, 2. Hindola-vasanta	
7.	Bhairavî	1. Bhairavî, Hindola, 3. Āhîrî, 4. Ghaṇṭā-rava, 5. Rîti-goula.	
8.	Śrî-rāga	1. Śrî, 2. Sālāga-Bhairavî, 3. Dhanyāsî, 4. Mālava-śrî, 5. Deva-gāndhāra, 6. Āndhālî, 7. Velāvalî, 8. Kannāḍa-Goula.	
9.	Hejujjî	1. Hejujjî, 2. Revaguptî.	
10.	Kāmbhojî	1. Kāmbhojî, 2. Kedāra-goula, 3. Nārāyaṇa-goula.	
11.	Śankarābharaṇa	1. Śankarā-bharaṇa, 2. Ārabhî, 3. Nāgadvani, 4. Sāma, 5. Śuddha-vasanta, 6. Nārāyaṇa-Deśākṣî, 7. Nārāyaṇî.	
12.	Sāmanta	Sāmanta	
13.	Deśākṣî	Deśākṣî	
14.	Nāta	Nāta	
15.	Śuddha-varālî	Śuddha-varālî	
16.	Pantu-varālî	Pantu-varālî	
17.	Śuddha-rāma-kriyā	Śuddha-rāma-kriyā	
18.	Simha-rava	Simha-rava	
19.	Kalyāṇî	Kalyāṇa	

APPENDIX 25.

CLASSIFICATION OF RĀGAS.

According to *Anūpa-Saṅgītāṅkuṣa* by Bhāva-bhaṭṭa (1674-1701 A.D.)

The author belongs to the Northern School. He utilises both Southern and Northern texts both of which he quotes profusely. He accepts *Saṅgita-Pārijāta* and *Saṅgita-ratnākara* as leading authorities.

APPENDIX 26.

CLASSIFICATION OF RĀGAS.

According to *Anūpa-Sangīta-ratnākara*, by Bhāva-bhatta (1674-1701 A.D.)

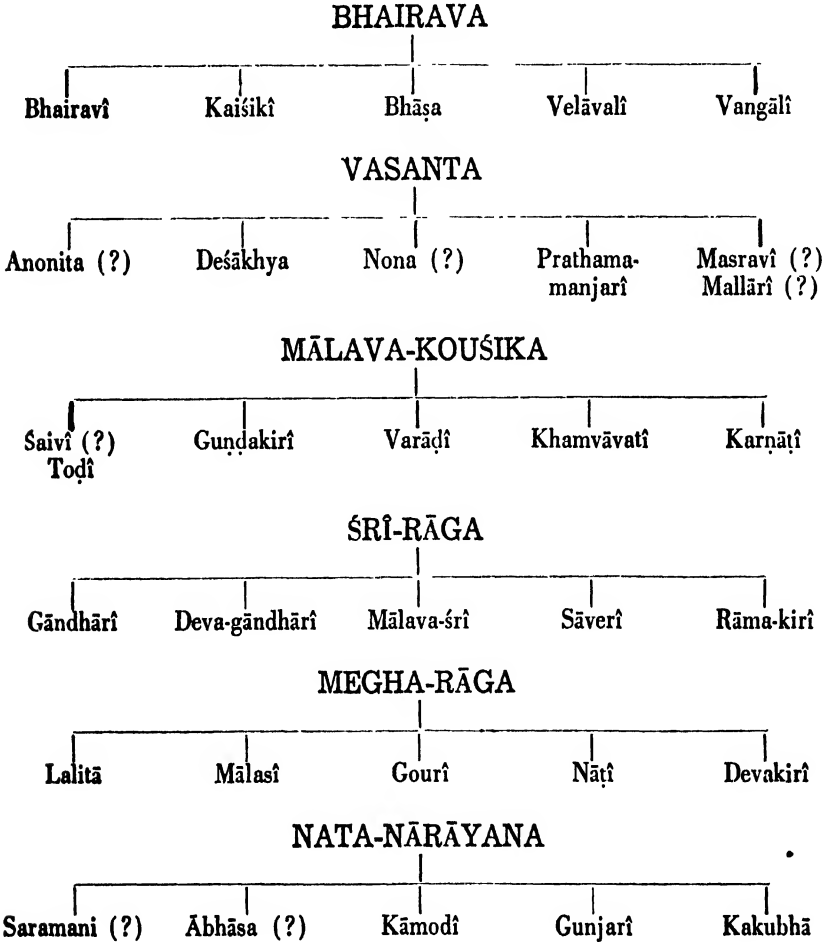

The author belongs to the Northern School. But he treats the Northern and the Southern systems. In the *Anūpa-sangīta-ratnākara*, he cites 20 different *melas* (root-rāgas) with their derivatives. In another work he cites six rāgas and five rāginīs (see Appendix 25).

1. Todī	Todī and others.
2. Goudī	1. Goudī, 2. Gurjarī, 3. Vahulā, 4. Rāmakali, 5. Āśāvarī, 6. Māru, 7. Guṇakrī, 8. Paṭa-manjarī, 9. Pancama, 10. Śuddha-lalita, 11. Takka, 12. Mālava-Gouḍa, 13. Pūrvī, 14. Vangāla, 15. Pādī.
3. Varāṭī	1. Varāṭī, 2. Śuddha-varāṭī, 3. Śyāma-varāṭī.
4. Kedāra	1. Kedāra, 2. Kedāra-Gouḍa, 3. Mālāra, 4. Naṭṭa-Nārāyaṇa, 5. Velāvalī, 6. Bhūpālī, 7. Kāmvojī, 8. Madhumādhavi, 9. Śankarā-bharaṇa, 10. Sāverī, 11. Suvāhī, 12. Nārāyaṇī, 13. Kedāra-nāṭa and others.
5. Śuddha-nāṭa	Śuddha-nāṭa and others.
6. Mālava-kaiśika	1. Mālava-śrī, 2. Dhannāsī, 3. Bhairavī, 4. Saindhavī, 5. Deva-Gandhāra and others.
7. Śrī-rāga	Śrī-rāga and others.
8. Hammira	Hammira and others.
9. Āherī	Āherī and others.
10. Kalyāna	Kalyāna and others.
11. Deśākṣī	Deśākṣī and others.
12. Deśikāra	1. Deśikāra, 2. Travāṇī, 3. Deśī, 4. Lalita, 5. Dīpaka, 6. Vibhāṣa.
13. Śāraṅga	Śāraṅga and others.
14. Karnāṭa	1. Karnāṭa, 2. Sāmanta, 3. Sourāṣṭrī, 4. Chāyā-nātaka.
15. Kāmōda	Kāmōda and others.
16. Hījeja	Hījeja, Bhairava and others.
17. Nāda-rāmakrī	Nāda-rāmakrī and others.
18. Hindola	1. Hindola, 2. Vāsanta and others.
19. Mukhārī	Mukhārī and others.
20. Soma	Soma and others.

APPENDIX 27

CLASSIFICATION OF RĀGAS.

According to *Śaṅgita-nārāyaṇa* by Puruṣottama Miśra, court poet of Nārāyaṇa Deva of the Gajapati Dynasty (Circa 1730 A.D.) The author quotes the differing views of the lists of rāgas as given by Nārada in the *Pancama-Sāra-saṁhitā* (Appendix 13), and Mammaṭa in *Śaṅgita-ratna-mālā* (Appendix 5), and cites the system of rāgas as current in his time. The text available, that of the Ms. of the Asiatic Society of Bengal (No. 2513-69-E4) is very much corrupt, and undecipherable at various places.

APPENDIX 28.

CLASSIFICATION OF RĀGAS.

According to Sangīta-Sārāmrtoddhāra

By King Tulāji of Tanjore (1763-1787 A.D.)

(Janaka-melas)			(Janya-rāgas)
1. Śrī-rāga	Kannāḍa-Gouḍa, Deva-gāndhāra, Sālaga-Bhairavī, Mādhava-manoharī, Suddha-deśī, Madhyama-grāma-rāga, Saindhavī, Kāphī, Huseñī, Śrī-ranjanī, Malavaśrī, Deva-manoharī, Jayanta-sena, Mañiranga, Madhyamādi, Dhanāśrī.
2. Suddha-nāṭa	Śuddha-nāṭī, Udaya-ravi-candrikā.
3. Mālava-gouḍa	Āḍya-mālava-gouḍa, Sāranga-nāṭikā, Ārdradeśī, Chāyā-gouḍa, Takka, Gurjarī, Guṇḍa-kriyā, Phala-manjarī, Nāda-rāma-kriyā, Sourāṣṭrī, Māgadhī, Gourī-manoharī, Māruva, Sāverī, Gouḍī-pantu, Pūrvī, Vibhāsa, Goula, Kannada-vangāla, Vahulī, Pādi, Malla-hari, Lalitā, Pūrṇa-pancama, Suddha-sāverī, Megha-ranjanī, Reva-Gupta, Mālavī.
4. Velāvalī	Velāvalī.
5. Varālī	Varālī.
6. Suddha-rāma-kriyā	Suddha-rāma-kriyā, Dipaka.
7. Sankarā-bharaṇa	Sankarābharaṇa, Ārabhī, Suddha-vasanta, Sarasvatī-manoharī, Pūrva-goula, Nārāyaṇī-deśākṣī, Sāmanta, Kuranjī, Pūrṇa-candrikā, Śura-sindhu, Julaṅgu, Vilaharī, Gouḍa-mallāra, Kedāra.
8. Kāmvojī	Kāmvojī, Nārāyaṇa-gouḍa, Kedāra-gouḍa, Vaḍa-hamsa, Nāga-dvāni, Chāyā-taraṅginī, Jadu-kula-kāmvojī, Nāṭa-kurañjī, Kannada, Nāṭa-nārāyaṇī, Āndhālī, Sāmā-rāga, Manohā. Deva-kriyā, Mohana-kalyāṇī.
9. Bhairavī	Bhairavī, Āharī, Ghantā-rava, Indu-ghantā-rava, Ritī-goula, Hindola-vasanta, Ānanda-Bhairavī, Ābherī, Nāga-gāndhārī, Dhanyāśī, Hindola.
10. Mukhārī	Mukhārī.
11. Vega-vāhinī	Vega-vāhinī.
12. Sindhu-rāma-kriyā	Sindhu-rāma-kriyā, Pantu-Varālī.
13. Hejūjī	Hejūjī.

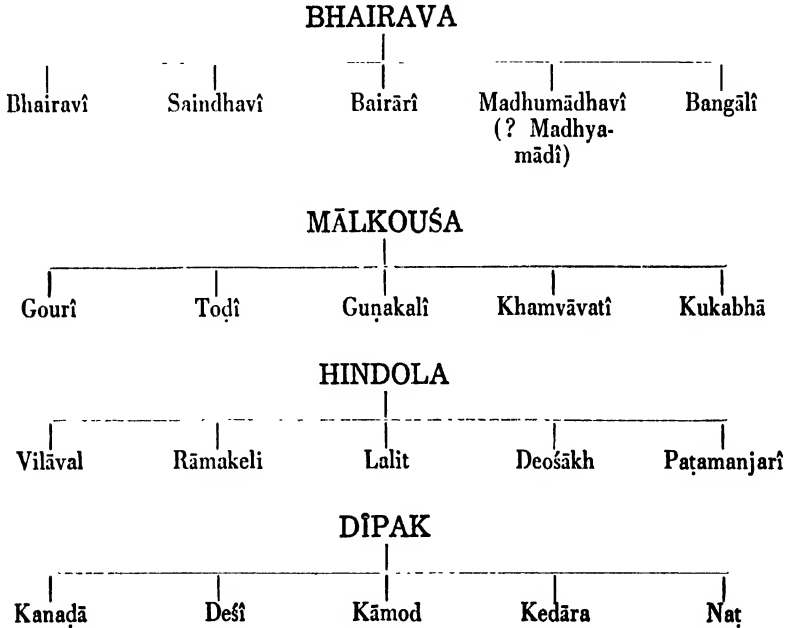

14. Sāma-varālī	Sāma-varālī, Gāndhāra-pancama, Bhinna-pancama.
15. Vasanta-bhairava	Vasanta-bhairavī, Lalita-pancama.
16. Bhinna-ṣaḍja	Bhinna-ṣaḍja, Bhūpāla.
17. Deśākṣī	Deśākṣī.
18. Chāyā-nāṭa	Chāyā-nāṭa.
19. Sāranga	
20. Toḍī	
21. Kalyāṇī	

APPENDIX 29.

CLASSIFICATION OF RĀGAS.

According to a Hindī treatise Known as “Rāgā-Kutūhala” by Radha Krishna Kavi, composed in Saṃvat 1853-1781 A.D.

(Ms. in the possession of Kuñwar Brajendra Singh, Dholpur and described by him in the Hindī monthly *Saraswatī*, November 1933, p. 425).

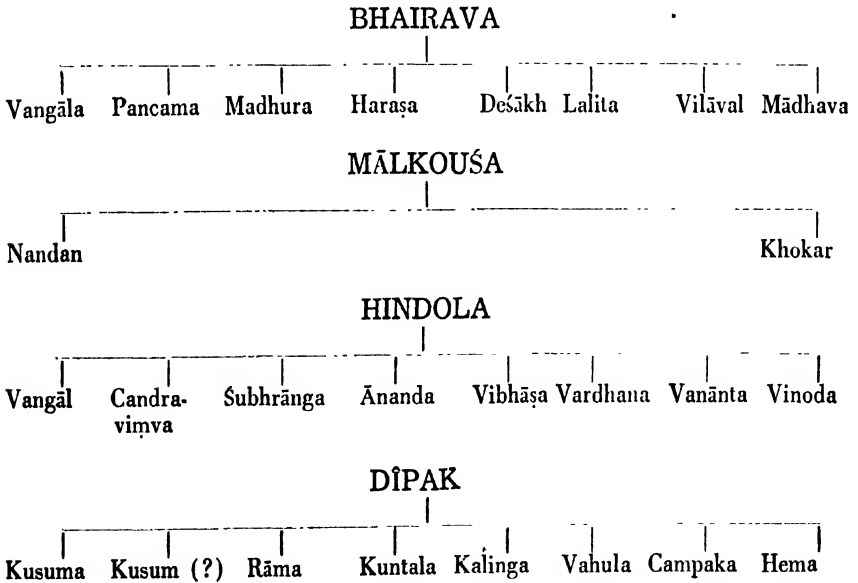

APPENDIX 30.

CLASSIFICATION OF RĀGAS.

According to Sangīta-sāra, compiled by Mahārāja Sawai Pratap Simha Deo of Jaipur, (1779-1804 A.D.)

He purports to follow the School of Hanumāna, and after specifying the six rāgas and 30 rāginīs according to Hanumāna he adds the names and descriptions of the respective sons of the six rāgas, each having 8 sons according to the scheme set out below:—

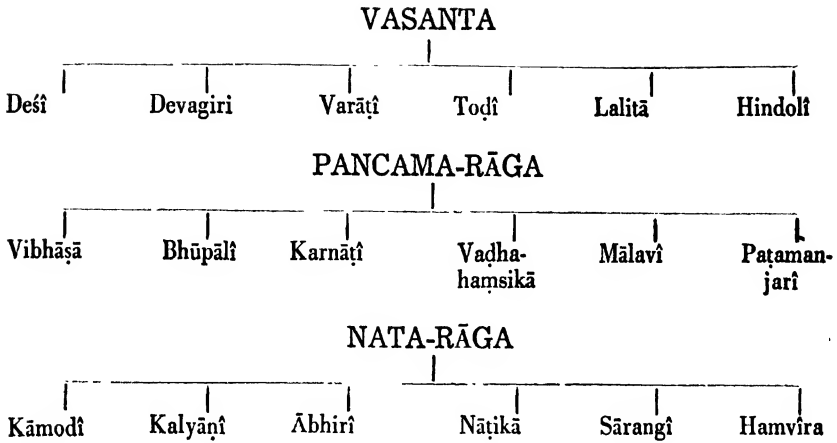

Note: Only two sons are assigned to Mālkoś, viz. Nandan and Khokar.

APPENDIX 31.

CLASSIFICATION OF RĀGAS.

According to Bramhā. This name is more or less a mythical shadow, in Indian musical literature. According to old traditions, to Bramhā is ascribed the musical lore known under the title of *Gandharva Veda Sāram*. In the *Sangīta mātaranda* of Nārada (G. O. S., Vol. XVI, p. 13, verse 18) Bramhā is mentioned as an ancient authority. But no authenticated work that could be ascribed to this author has yet been traced. The system of classification of melodies current under his name, is probably the opinion of some later authorities who ascribe it to Bramhā, in order to gain prestige and respectability. His system is followed by several authors.

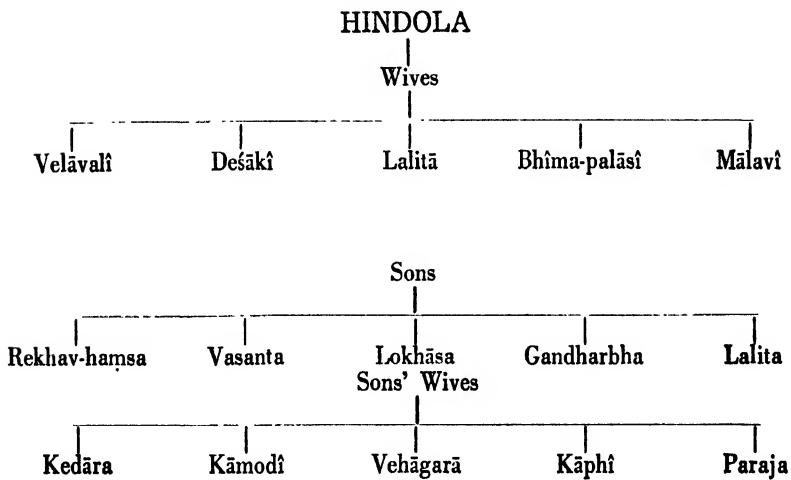

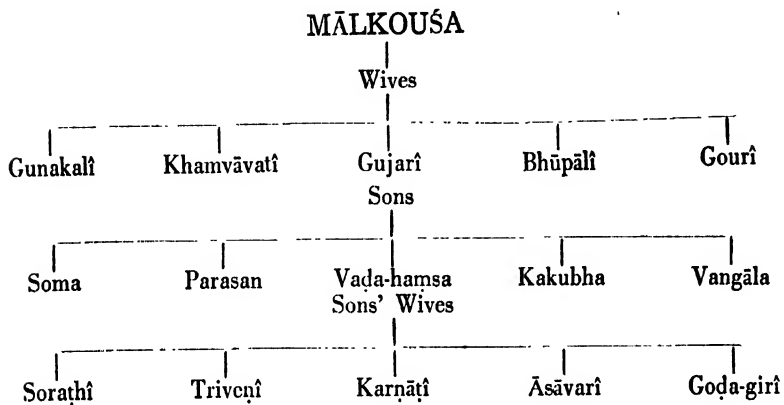

APPENDIX 32.

CLASSIFICATION OF RĀGAS.

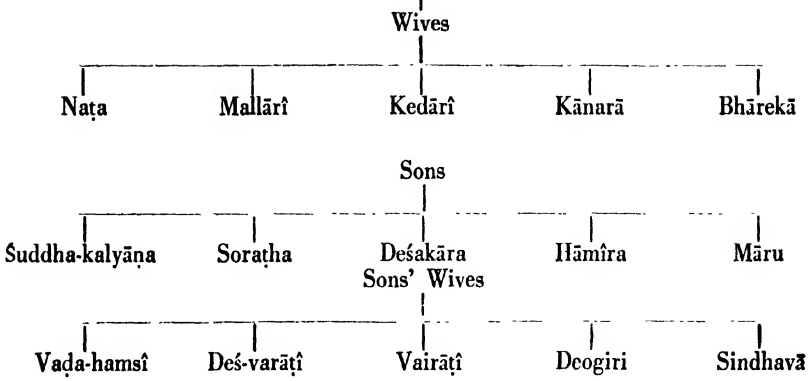

According to the School of Bharata.

Unless Bharata is taken to be some later musical authority other than the author of the *Nāṭya-sāstra*, the system of classification ascribed to him must be purely apocryphal. For, it is well-known, that at the time of Bharata, the rāgas, as understood in later times, had not evolved. The list ascribed to him by legend, must be a very late classification, attributed to him by way of courtesy, in order to acquire authority by association with a great name famous in musical history. The School of Bharata is referred to in Dāmodara's *Sangīta-Darpaṇa* (Ch. I, verse 2). The system set out below is borrowed from Radha Mohan Sen's *Sangīta-Taranga*. (Calcutta, 1818, Reprinted by Vangavāsī Press, 1203, at pp. 123-125.)

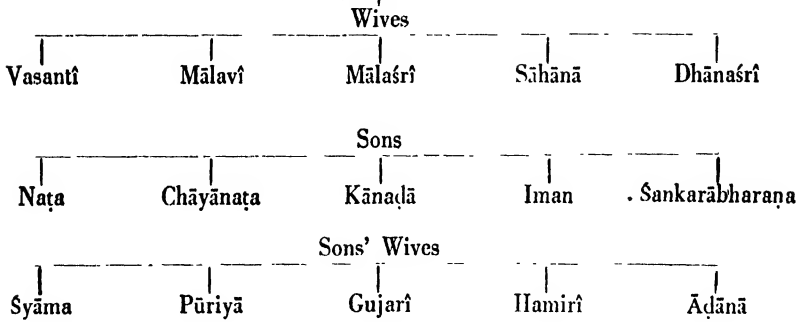

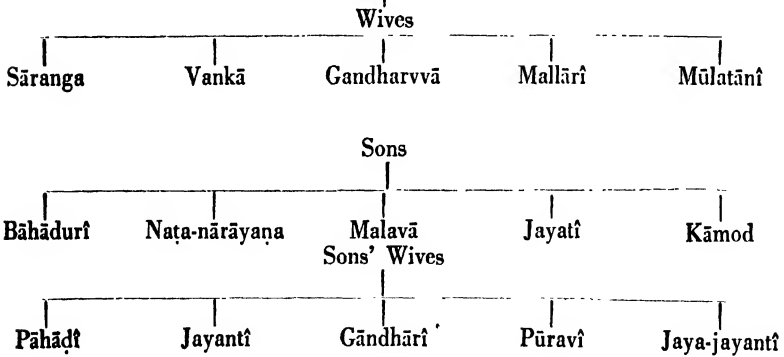

DĪPAKA

ŚRĪ-RĀGA

MEGHA

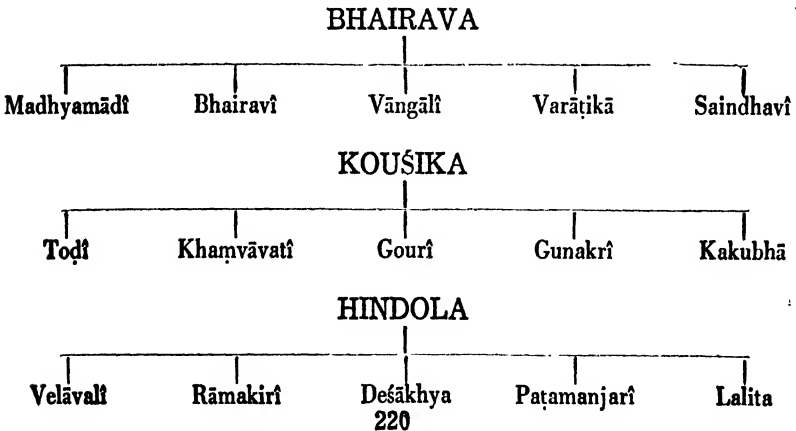

APPENDIX 33.

CLASSIFICATION OF RĀGAS.

According to the School of Hanumāna (Hanumat).

It is mentioned in the Persian Treatise known as *Tuphet-'ul-Hind* by Mahomed Rezza Khan (1813 A.D.) recently edited by the Viśva Bhārati, that at the time of this author, four classifications were current, one ascribed to Hanumāna, one ascribed to Bramhā, one ascribed to Bharata, and one ascribed to Kallinātha. The last named is set out in Appendix 14. Bharata has only mentioned certain grāma-rāgas (Appendix 2). and the classification ascribed to him must be by some later authors. As regards the School of Hanumāna, no text which could be ascribed to him appears to have survived. Ānjaneya (Hanumāna) as a musical authority is mentioned by Abhinava Gupta (C. 1930) and Śāranga-deva (C. 1247), and quoted by Śaradā-tanaya (C. 1250) and also by Kallinātha (C. 1460). In Govinda Dikṣita's *Sangīta-sudhā*, Ānjaneya is described as deriving the principles of Deśi-rāga, from Yāstika, an ancient authority earlier than Matanga. So that undoubtedly he is an ancient writer on music, although his actual work has not survived. The fact that his name is associated by Dāmodara in his *Sangīta Darpaṇa* (Calcutta edition p. 75-76) with the scheme of Rāga-raginis shows that Hanumāna expounded the Northern, or the Hindusthānī system. He is also referred to by Ahovala, as a commentator on Bharata-nāṭya. The classification of Hanumāna is followed by Dāmodara, Harivallava, the anonymous author of *Sangīta-mālā* and various other authors, with minor variations and is supposed to be still current.

(According to the list cited in Rādhāmohan Sen's *Sangita-Taranga* (p. 123, Calcutta, 1818), Raṁvā is substituted for Gaurī, and Mālinī for Mālavī).

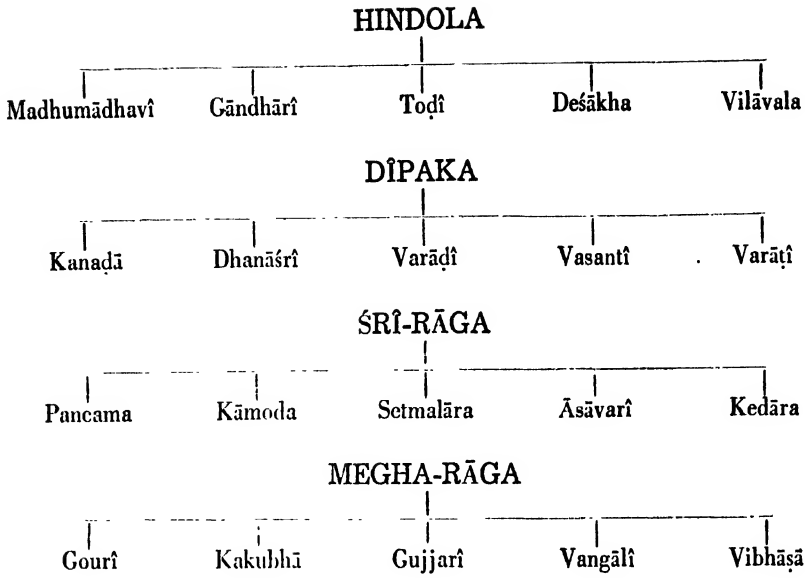

APPENDIX 34.

CLASSIFICATION OF RĀGAS. ✓

into six Rāgas and thirty Rāgiṇīs.

According to the Hindi texts inscribed on the series of miniatures in the British Museum Ms. Add. Or. 2821,—similar texts in the series in the Ghose Collection, Calcutta,—similar series in the Collection of Lala Shambhunath, Jaipur,—similar series in the Collection of Purātattva Samsodhaka Maṇḍalī, Poona.

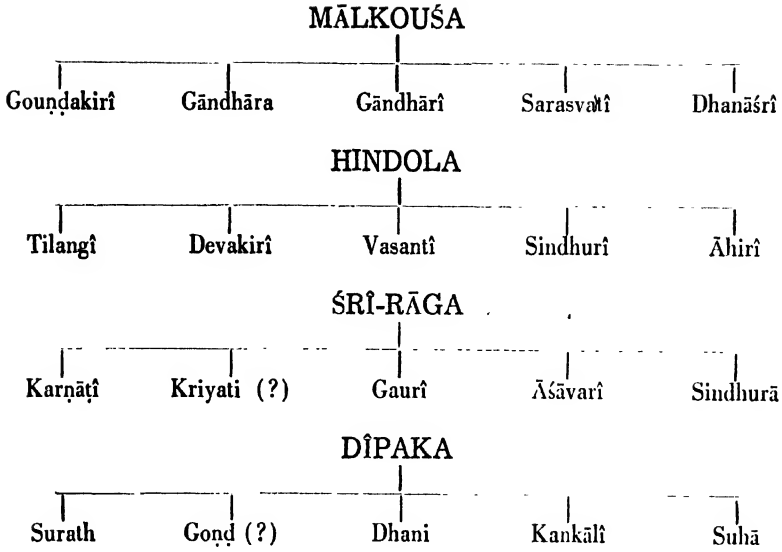

APPENDIX 35.

CLASSIFICATION OF RĀGAS.

According to a Hindusthānî (Urdu) Manuscript of Rāga-mālā by Saiyid 'Abd-al-Walî' Uzlat, dated 25th Muharam, A.H. 1173, (A.D. 1759) in the India Office, London (No. 101 P-2380-C), described at p. 54, of Blumhardt's *Catalogue of the Hindustani Manuscripts* in the Library of the India Office, 1926.

According to this scheme of classification, the melodies are grouped under six rāgas, each having five rāgiṇīs, and each having a family of eight sons (*putras*) representing 84 different musical modes. As the list of the sons (*putras*) are not complete, they are not cited here.

APPENDIX 36.

CLASSIFICATION OF RĀGAS.

According to Pandit V. N. Bhatkhande (Pundit Visnu Sarma), B.A., LL.B. of Bombay, as given in his Sanskrit treatise *Abhinava-rāga-manjari* (Poona, 1921), in the *pariśiṣṭa* (appendix), pp. 1-12.

Mela-rāga:				Janya-rāga:
Kalyāṇī	1. Iman, 2. Bhūpālī, 3. Suddha-Kalyāna, 4. Candra-Kānta, 5. Jayat-Kalyāna, 6. Mālaśrī, 7. Hindola, 8. Hammīr, 9. Kedāra, 10. Kāmōda, 11. Śyāma, 12. Chāyā-nāṭa, 13. Gouḍa-Sāranga.
Velāvalī	1. Suddha-vilāvalī, 2. Ālhaiyā, 3. Sukhla-vilāvalī, 4. Devagiri, 5. Yamani, 6. Kakubhā, Second Kakubhā, 7. Nata-vilāvalī, 8. Laccha-sakhā, 9. Sarpardā, 10. Vihanga, 11. Desikār, 12. Hemakalyāna, 13. Naṭa-rāga, 14. Pāhādī, 15. Maḍa-rāga, 16. Durgā, 17. Maluha, 18. Sankarā.

Khamāj	1. Jhinjhoṭī, 2. Khamāj, 3. Second Durgā, 4. Tailangī, 5. Rāgeśvarī, 6. Khamvāvātī, 7. Garā, 8. Soratī, 9. Deśa-rāga, 10. Jayāvantī, 11. Tilok-kāmod.
Bhairava	1. Bhairava, 2. Rāmakrī, 3. Vangāla-Bhairava, 4. Sourāstra-tankā-rāga, 5. Prabhāta-rāga, 6. Śiva-Bhairava, 7. Ānanda-Bhairava, 8. Āhīra-Bhairava, 9. Guṇakrī, 10. Kalinga-rāga, 11. Jogiyā, 12. Vibhāsa-rāga, 13. Megha-ranjanī.
Purvi	1. Pūrvī, 2. Puriyā-Dhānāsrī, 3. Jetaśrī, 4. Praja, 5. Śrīrāga, 6. Gourī, 7. Mālavī, 8. Trivenī, 9. Tankī, 10. Vasanta.
Māravā	1. Māravā, 2. Pūriyā, 3. Jeta-rāga, 4. Māligourā, 5. Sāj-girī, 6. Varāṭī, 7. Lalitā, 8. Sohanī, 9. Pancama, Second Pancama, 10. Bhattiyāra, 11. Vibhāsa-rāga, 12. Bhakkāra-rāga.
Kāphī	1. Kāphī, 2. Saindhavī, 3. Sindurā, 4. Dhānāsrī, 5. Bhimpalāśī, 6. Dhānī, 7. Paṭamanjarī, 8. Paṭa-Dīpakī, 9. Hamsa-kananī, 10. Pilu, 11. Vāgīśvari, 12. Sāhānā, 13. Suhā, 14. Sughāraikā, 15. Nāyakī-kāṇadā, 16. Devasāga-rāga, 17. Vāhāra-rāga, 18. Vrandāvanī-sāranga, 19. Madhyamādī-Sāranga, 20. Sāmañita-Sāranga, 21. Śuddha-Sāranga, 22. Mīyā-Sāranga, 23. Vada-hamsa-sāranga, 24. Śuddha-Mallār, 25. Megha-rāga, 26. Mīyā (?) Mallāra, 27. Surat-Mallāra, 28. Gouḍmallāra.
Āśāvarī	1. Āśāvarī, 2. Jaunpurī, 3. Deva-gāndhār, 4. Sindhu-Bhairavī, 5. Deśī, 6. Saḍrāga, 7. Kousika-Kāṇadā, 8. Darvārī-Kāṇadā, 9. Āddanā, 10. Dvītīya-nāyaki.
Bhairavī	1. Bhairavī, 2. Mālkośa, 3. Āśāvarī, 4. Dhanāśrī, 5. Vilāskhānī-toḍī.
Toḍī	1. Toḍī, 2. Gurjarī-Toḍī, 3. Mūla-tānī.
